THE WORLD

THE STORY THUS FAR...

Thousands of years ago, crystals were abundant in the world. A brilliant inventor crafted machines that harnessed the power of these crystals, making life easier for everyone. Large, bustling cities were erected, and everyone enjoyed the peace and prosperity made possible by the crystals. And the inventor? He was revered above all others for his part in bringing about this golden age.

The people soon became dependent upon these machines—too dependent. One day, the crystals started disappearing from the world. One by one they vanished, and the wonderful inventions stopped working. Terrible wars were fought over the few remaining crystals. The people even turned on the very inventor they had once praised. The civilization consumed itself in cataclysm and chaos—until one day, there were no crystals left at all.

Growing up in a small isolated village, this ancient history means little to you. Today is your 16th birthday and your coming-of-age ceremony. Your friends, the only family you've ever known, are planning a celebration to mark your passing into adulthood.

Nothing is ever as simple as it seems and now, 2000 years later, the events that seemed like ancient history are once again affecting your world. Though you've only just left your childhood behind, you must play a central role in these events to protect your friends, your family, and the place you call home.

THE PEOPLE IN YOUR WORLD

Though you head out into the world on your own, you are never truly alone. These people each have a role to play in your story.

SHERLOTTA

For as long as you can remember, Sherlotta has always been there for you. Her tough exterior is tempered by her compassion for those around her. No one is more proud to see you become an adult and make your way in the world than this enigmatic woman.

ERYLL

This little girl loves nothing better than to play with her friends in the village. Even when this idyllic existence is threatened, she still has complete faith in you to help her get through it.

LIAN

Lian is Eryll's big brother and is everything a big brother should be. He looks out for Eryll and wants nothing more than for her to be happy and safe. Lian's caring nature even extends to his vegetable garden, where he names each and every plant!

NORSCHTALEN

This young Yuke rarely ventures far from the village since she gets lost in the surrounding forest every time! She studies under Waltrill and dreams of the day when she will be old enough to really learn some magic. Though she is sometimes quick to get excited or upset, she is always eager to do whatever she can to help out her friends.

WALTRILL

Waltrill is a Yuke wise in the ways of magic and is well-respected among the villagers. He oversees Norschtalen's studies and though he is sometimes stern with her, he always has her best interests at heart.

TOUMLI

Though this Lily now spends her days watching out for her mischievous child, Phelple, she once led an exciting, if mysterious, life outside the village. She is kind to a fault and is embarrassed by Phelple's antics, so much so that she often finds it hard to quit apologizing!

PHELPLE

Phelple is a playful kid, often getting into trouble with his best friend Ullz and causing his mother, Toumli, no end of trouble. However, like the other villagers, he is good at heart and cares for his friends.

ULLZ

Tratt and Bachenn's son, Ullz is Phelple's partner in crime, so to speak. He never worries too much about getting into trouble—as long as he doesn't lose his dessert!

BACHENN

Between helping out with your coming-of-age ceremony and giving Aurdy a hard time, Bachenn needs his rest. You can often catch him catnapping in a shady spot in the village.

ILINA

Ilina is a friendly, thoughtful villager who wears flowers in her hair. She is always there to lend a helping hand to anyone who needs her help. Her thoughtfulness even extends to preparing special treats for your birthday celebration!

AURDY

Aurdy is headman of the village, full of wisdom learned throughout his long life and eager to share that wisdom with you. Though some of the younger villagers don't always like to listen, Aurdy offers some sage advice.

LARKEIGUS

This elderly archeologist spends most of his time in the town's library. The townsfolk think well of him and some even wish to study under him. He knows a great deal about ancient history and has an abundant interest in the nearby ancient ruins. Perhaps there is more to this kindly scholar than you can see at first glance?

VERIAULDE

Veriaulde has waited deep inside the ancient ruins for so long that he has lost track of the last time he had visitors. This mild-mannered Yuke is knowledgeable and eager to help. Though he is perfectly pleasant, there must be a reason for his self-imposed exile.

THE TRIBES

There are four tribes that can join your party in the game. Representatives from each of these tribes populate both the village and the town.

CLAVAT

Clavats are a great choice for beginning players. They are easy to control and focus mainly on dealing out physical damage. This tribe specializes in using swords, and their Sword Charge ability yields devastating results. They also have the ability to chain together attacks; up to five attacks at higher levels! Also, Clavats are less likely to get knocked around by enemy attacks. In addition, they have very high ATK and DEF stats, making them the hardiest of the four tribes. When you want to charge into the fray and let loose, this is the tribe to use.

SELKIE

Selkies specialize in the use of paddles and bows. In addition to their Paddle Charge and Bow Charge attacks, they can also chain up to three paddle attacks together to beat an enemy down! Selkies have a high ATK but a relatively low DEF stat. They can really deal out the pain, but standing toe-to-toe with a foe isn't a smart option. Paddles are good for melee combat, but bows really let the Selkies shine. They can attack from a distance, firing off multiple projectiles in one shot, up to five at higher levels, while staying a relatively safe distance from monsters. Regardless of which weapon you choose, Selkies score more critical hits at higher levels. Selkies also have the double-jump ability. This lets them jump again while in the air to reach ledges easily, pull switches, and really anything else you need to grab up high. It is a valuable skill to have in your party.

LILTY

A Lily's playful exterior often hides the heart of a fierce warrior! They are at their best when using hammers or spears. Lilies gain both a Hammer Charge and Spear Charge to use in melee combat. In addition, they can chain up to three hammer or spear attacks in a row. At higher levels, the last hit in one of these chains knocks foes to the ground! This is a huge advantage, as a foe that is flat on its back can't attack or cast any magic against you. Successful chain attacks can keep foes down fairly well.

YUKE

Yukes are best when using staves and casting magic. They have an extremely high magic attack, eventually being able to stack five magic target rings together, and possess a decent amount of magic defense. At higher levels, they have a significant chance to take reduced damage from magic attacks, but their physical ATK and DEF are low. Use magic whenever feasible to take out foes. Yukes are definitely stronger with magic attacks, but when forced into melee combat, their staff damages foes both with its physical swing and the Magic Bomb projectile that is produced each time they swing. Use the Staff Charge ability to really pack a punch against melee foes.

GAME BASICS

All of the basics are covered here, but this information is meant to accompany the excellent information in the game's instruction booklet. It's assumed you have read the booklet and know how to perform the simple actions like moving, accessing your menus, and attacking. If you don't, take a few minutes and do so now.

HOW TO USE THIS GUIDE

Echoes of Time lets you explore a unique and interesting world, while besting foes and learning to customize and craft equipment along the way. The Part III "Walkthrough" section provides all the information you need to make your way past the challenging environments, while Part IV, the "Quest Shoppe," contains the knowledge needed to play through both the single player and multiplayer quests. The "Data" section in Part V lists all the details about the various foes in the game, as well as thorough information on the game's items and equipment.

In this section, you'll learn about combat basics, including using magic. There's even a basic overview of the different monster species included here, so you'll have an idea of what you are up against.

COMBAT BASICS

- **Normal Attack:** This attack is the basic melee attack. To perform it, push the **A** Button on either the Wii or the DS. The exact attack performed depends on the character's tribe and equipped weapon. For example, a Clavat swings her sword while a Yuke attacks with his staff, emitting a Magic Bomb.
- **Jump Attack:** The Jump Attack is basically a Normal Attack, but it is performed while jumping. Jump into the air by pushing the **B** Button on either the DS or Wii and while you are in the air, quickly press the **A** Button.
- **Dive Attack:** This attack can only be performed by characters who have swords or spears equipped. Begin as if you are performing a Jump Attack, but after pressing the **A** Button to attack, hold it down. This delivers a powerful downward thrust, driving your weapon into your foe.
- **Lift Attack:** To Lift smaller enemies (such as Mus) over your head, press the **Z** Button on the Wii or the **Y** Button on the DS. Next, press the **A** Button to attack while holding those buttons.
- **Wall Slam Attack:** The Slam Attack takes the Lift Attack one step further. When the enemy is aloft in your arms, throw it against a large object like a wall or a tree to cause damage. This will occasionally cause the foe to drop items!
- **Stomp Attack:** Jump on top of an enemy and press the **A** Button to stomp on it. This is particularly effective against larger enemies.
- **Hanging Attack:** Flying foes sometimes like to hover just out of reach. Jump up while underneath a flying foe to grab it. While hanging, press the **A** Button to attack from this position.
- **Magic Attack:** To perform a Magic Attack, select the type of magic and press the **C** Button on the Wii or the **X** Button on the DS to make a magic target ring appear at your character's feet. While holding down this button, use the Wii's Control Stick or the DS's +Control Pad to position it. After releasing the button, the magic goes off.

COMBAT TACTICS

Different tribes have unique combat strengths, but the following tactics work well for everyone.

- **Attack Wisely:** Many foes put up a strong fight if you attempt to get in their faces. Instead, attack from the back or side where they can't counterattack as easily.
- **Use Range to Your Advantage:** Many enemies have a fairly short range. Use magic and ranged attacks (like bows) to take advantage of this. Deal out the damage without having to get close enough to take it.
- **Knock Down Your Foes:** Some attacks can knock enemies down, rendering them unable to attack for a moment. This is a huge advantage in battle, as it presents an opportunity to attack and not risk being attacked in return.
- **Avoiding Guard:** Some foes use Guard to block a portion of your attacks. If you see that an enemy has a tendency to Guard, use Charge attacks, magic, stomping, and other special attacks to negate this.
- **Exploit Weaknesses:** Many of your foes are weak against certain elements. Take a look at the Bestiary in Part V: "Data" to learn which elements work best against which foes. Exploiting these weaknesses can turn a difficult battle in your favor.

STACKING MAGIC RINGS

While normal casting goes a long way both offensively and defensively, the really powerful magic comes from combining spells by stacking magic rings. You can stack on your own rings, or work with other party members to create more powerful spells to aid your party and devastate enemies. As your characters gain levels, they learn to stack more target rings. In fact, Yukes can eventually stack up to five!

To stack a magic target ring, begin your spell as usual. Instead of releasing the button to detonate it, press the **A** Button (Wii), or the **L** Button (DS) to hold it in place. Quickly select another spell and stack it on top. All spells have a base effect that increases when you stack magic rings. For example, Fire can become Fira, Firaga, or Firaja, each more damaging than the last. The following charts provide information on base spells and the combinations needed to create really powerful magic spells.

SPELL EFFECTS

SPELL TYPE	EFFECT
Fire	Inflicts Fire damage and causes the Affame ailment
Blizzard	Inflicts Ice damage and causes the Frozen ailment
Thunder	Inflicts Lightning damage and causes the Paralyzed ailment
Cure	Restores a percentage of HP
Raise	Revives a KO'd ally, restoring a percentage of their HP and MP
Clear	Removes status ailments
Barrier	Increases DEF rating for a short time
Bio	Inflicts Dark damage and causes the Poisoned ailment
Gravity	Inflicts Warp damage and causes the Burdened with Gravity ailment
Haste	Increases movement and attack speed for a short time
Holy	Inflicts Holy damage
Meteor	Inflicts Stun damage
Quake	Inflicts Stun damage
Slow	Slows movement and attack speed for a short time
Ultima	Inflicts Stun damage

STACKING TWO RINGS

	FIRE	BLIZZARD	THUNDER	CURE	RAISE	CLEAR
Fire	Fira	—	—	—	Quake	Barrier
Blizzard	—	Blizzaga	—	—	Gravity	Slow
Thunder	—	—	Thundaga	—	Bio	Haste
Cure	—	—	—	Cura	Holy	—
Raise	Quake	Gravity	Bio	Holy	Arise	—
Clear	Barrier	Slow	Haste	—	—	Cleara

STACKING THREE RINGS

	FIRE	BLIZZARD	THUNDER	CURE	RAISE	CLEAR
Fire	Firaga	—	—	—	—	—
Blizzard	—	Blizzaga	—	—	—	—
Thunder	—	—	Thundaga	—	—	—
Cure	—	—	—	Curaga	—	—
Arise	—	—	—	—	—	—
Cleara	—	—	—	—	—	Clearaga

STACKING FOUR RINGS

	FIRA	BLIZZARA	THUNDARA	CURA	ARISE	CLEARA
Fire	Firaja	—	—	—	Quaga	Barriera
Blizzard	—	Blizzaja	—	—	Graviga	Slowga
Thunder	—	—	Thundaja	—	Bioga	Hastega
Cure	—	—	—	Curaja	Holyga	—
Arise	Quaga	Graviga	Bioga	Holyga	—	—
Cleara	Barriera	Slowga	Hastega	—	—	Clearaja

SPECIAL STACKS

SPELL	MAGIC	SPELL	MAGIC
Ultima	Fire, Blizzard, Thunder, Cure, Clear	Meteor	Blizzard, Thunder, Clear, Raise
Ultima*	Fire, Blizzard, Thundara, Cura, Cleara	Meteoraga*	Blizzard, Thundara, Cleara, Arise

*Rings must be placed exactly on top of each other.

STEALING MAGIC

It's possible to steal an enemy's magic stack by locking your magic target ring onto it. After stealing it, you control it and can send it back to the enemy, more powerful than before. Your magic ring must combine with the enemy's to make a valid stack. Pay attention to what your foes are casting to make the most of this ability.

ENEMY TYPES

Echoes of Time features 23 distinct species of monster and each species can contain several different types of foe, each possessing its own unique strengths and weaknesses. Even with these differences, there are some similarities that each species shares.

BESTIARY

For more detailed info on your foes, see the Bestiary in Chapter 6.

ADAMANTOISE

Type Adamantoise

These creatures rely on a tough barrier shell to protect them from most harm. While this barrier is active, you can't cause much damage to them. Wait for the barrier to go down, then hit them with everything you've got. These foes can also spit fireballs, so be on the lookout for this ranged attack. Adamantoise also have a powerful spin attack that hits everyone nearby. Wait until you see this go off, then rush in to attack. Use ranged attacks and magic as well to avoid this monster's attacks. These foes move quite slowly, so don't hesitate to back out of the battle and heal up if the need arises. When encountering more than one Adamantoise, approach from the edge of the group and focus on one target at a time. This keeps you from getting caught between the monsters while fighting, thereby avoiding damage from all sides.

AHRIMANS

Type Ahriman, Floating Eye

These flying monsters aren't too dangerous if you fight them one at a time, but they are quite deadly in packs! Use Jump Attacks to reach them in melee range. Hanging Attacks are a bad idea, as Ahrimans have a powerful counterattack that usually knocks you down before you can connect. Floating Eyes are pretty common, but the rarer Ahriman is a much more difficult foe. These creatures shoot out a powerful eye beam that can erode a party member's HP fairly quickly. Keep your characters' health up and focus on one target at a time to avoid taking damage from all sides.

BATS

Type Bat, Dark Bat, Fire Bat

These small flying creatures aren't extremely tough, but they can swoop in quickly to deal damage. They often start the battle just out of range, but eventually come down to fight within melee range. Use Jump Attacks to get in some swipes when they are in the air. You can also use Hanging Attacks, but be wary of their counterattacks. Bats can also cast spells that vary depending on their type, so watch out for their target rings and avoid them whenever possible.

BOMBS

Type Bomb, Ice Bomb, Thunder Bomb

Bombs are single-minded creatures that can only attack from the front. Move around to the side or back whenever possible to unleash some melee hits. Depending on the type, these angry little monsters can also cause damage with magic, so be on the lookout. Once they are low on HP, they begin to pulse, getting ready to explode with a lot of force! Take them down quickly to get the KO before they explode, or move to a safe distance to avoid the hefty damage that will follow.

CHIMERA

Type Chimera

Chimeras are extremely tough monsters that deal a large amount of damage. Watch them closely and move in to make your own attack during the slight pause that follows their attack. Use a Charge Attack to deal some quick damage. Use ranged attacks whenever possible and watch out for their magic attacks. Chimeras are susceptible to Holy magic, so use this to your advantage and hit them with devastating Holy spells to shorten the fight.

CLOUD BEES

Type Cloud Bee

Cloud Bees are troublesome monsters that fly around your party, darting in and out to attack. Their attack inflicts poison, so use ranged attacks and magic to take them out and be ready to use Clear to cure any poison they inflict. While they occasionally appear away from their hive, this is usually not the case. As long as the hive remains, Cloud Bees will keep appearing. Destroy the hive with a few Jump Attacks to stop the swarm.

COCKATRICES

Type Cockatrice, Dark Cockatrice

Cockatrices are quick, tenacious birds that are always looking for a fight. They use melee attacks exclusively, so you can avoid most damage by using ranged attacks and magic to take them out as soon as they appear. They don't have a lot of HP, so a strong party can dispose of them fairly quickly.

DAEDALUSES

Type Daedalus

This mechanical monstrosity can swivel its top to attack in any direction. While another party member has its attention, attack it from the side or back to avoid its counterattack. In addition to its melee attack, the Daedalus launches a group of three small missiles at a target. These missiles follow the intended target, so take evasive action to avoid them until they fall to the ground and detonate. When facing more than one Daedalus, concentrate your attacks on a single target to eliminate the threat as quickly as possible.

ELECTRIC JELLYFISH

Type Amenbo

These small aquatic monsters prefer to spend their time in the water. They are found almost anywhere there is a place for them to swim. They attack with the electrified bobbles on their heads, so watch out! They are fairly weak creatures, so a few good melee attacks should result in a KO, but these foes are quite dangerous in groups.

ELEMENTALS

Type Fire Elemental, Ice Elemental, Thunder Elemental, Dark Elemental

Despite their small size, these monsters are some of the most troublesome in the game. They are almost impervious to physical damage, so take them down with magic instead. They cast devastating spells, so stay out of melee range to create enough room to see their magic target rings. Each Elemental is immune to magic of its own type, so cast any other kind of offensive spell against it. Usually one good spell is enough to KO the critter. Elementals often appear in groups and attack together, so keep a close eye on your party members' HP and be ready to utilize a Cure spell. When Elementals are in a group with other monsters, take out the Elementals first, as they inflict a great deal of damage.

FLANS

Type Fire Flan, Flan, Ice Flan

Flans don't cause a great deal of damage, but they are strong on defense and Guard against a high percentage of your attacks. Use a Stomp Attack to avoid this and make good use of your characters' magic to take them down. The different Flan varieties have different weaknesses. For instance, Fire Flans are weak against Blizzard magic. Use the appropriate magic to get past their defenses and gain a quick KO.

GOBLINS

Type Goblin, Goblin Lord, Hammer Goblin

Goblins pack quite a punch, but their main strength lies in their defense. When threatened, Goblins crouch down into a defensive posture. While defending, they have a high chance to Guard against incoming attacks and are quick to counterattack if approached from the front. Whenever possible, attack from behind to avoid this. Use magic and ranged attacks to inflict damage from afar.

GOLEMS

Type Bolt Golem, Grappler Golem, Magic Golem

These rather disturbing-looking monsters use their long arms to deliver stunning blows and some varieties even have ranged attacks. They have a healthy amount of HP, which means they won't go down easily. Use Charge Attacks and powerful magic to take them out as quickly as possible. The Golem's most dangerous ability by far is its explosion. When it gets low on HP, a Golem begins to pulse, indicating that it is going to explode. Try to KO it before this happens, or at the very least, move out of the range of the impending blast. The Golem's explosion is much greater in both damage and range than that of a Bomb and it can turn the tide of battle in an instant.

LIZARDMEN

Type Lizardman

These vicious reptiles are most dangerous when you attack them straight on, so move to the side or back to avoid their Guard and the follow-up attack. The spikes adorning their heads aren't just for looks—they hurt! Don't use Stomp Attacks on these guys, as you will only cause damage to your characters. Whenever possible, use ranged attacks and make good use of magic to keep your distance. Lizardmen are pretty adept at using their sharp swords, so be prepared to Cure your melee fighter when attacking in close quarters.

MAGIC POT

Type Magic Pot

It's hard to believe something so small and so cute could be so dangerous! Magic Pots deal out a lot of damage using both melee and magic attacks. They can also roll their pots swiftly along the ground, bowling over any party members in their path. If a Magic Pot starts to roll around, quickly get close to them to avoid damage and knock them out. When fighting more than one, focus all of your firepower on one target to take it out of the fight as quickly as possible.

MANDRAKES

Type Walking Plant, Onion Head

In addition to their melee attacks, Mandrakes spit seeds and emit clouds of poisonous pollen at foes. When a Mandrake's head opens into a flower, be ready to Clear the poison that spews forth. When fighting a Mandrake, immediately hit it with melee attacks to cut down these weeds as soon as possible. Use Fire magic to deal additional damage while avoiding their attacks from afar.

MIMIC

Type Mimic

Mimics are quite possibly the sneakiest monsters in the game! In fact, these foes resemble the treasure chests that appear throughout the game. When you approach one, it will morph into a hideous fanged beastie! Mimics attack hard and fast with both melee and magic attacks. Your best bet is to attack from long range whenever possible and hit it with your most devastating magic. Charge Attacks deliver a powerful punch of damage to these foes, too. Any treasure chest you approach could be a Mimic in disguise, so don't get caught unaware. Never open a chest with low HP and make sure your party is otherwise ready for a fight. If your party engages a Mimic unprepared, quickly back far away from it; it will soon revert to camouflage mode.

MINI MOVERS

Type Mini Mover, Mini Bomb, Mini Mine

These colorful monsters are so tiny that you would think they couldn't possibly pose a threat—but you would be wrong. Although they aren't the most dangerous monsters in the game, they tend to travel in packs and they like to hop around, which occasionally makes them difficult to hit with melee swings. They don't deal a lot of damage when fighting one-on-one, but they keep pecking at your party's HP and this cumulative damage can become quite high. Use Blizzard magic to hold them in place, and let them have it with melee damage to clear them out.

MUS

Type Mu, Icarus Mu, Snow Mu, Vulcan Mu

A Mu's large bushy tail isn't just for looks! This foe delivers quick melee attacks at short range and uses its tail for a spinning attack that deals damage in all directions. They aren't great on defense, so hammer them with damage and they will soon fall. Mus are prime candidates for Wall Slam Attacks and you may even receive some extra loot out of it!

SAHAGIN

Type Dark Sahagin, Sahagin

Sahagin prefer to spend their time in the water, although they are eager to come out to attack. While you can certainly dive in and attack them on their own turf, it's best to engage them and let them approach dry land where your party has the advantage. Attack them from behind where you can catch them off-guard and their long arms can't reach anyone. They are susceptible to Fire magic, so use this to your advantage.

SEEDSPITTERS

Type Seedspitter

These nasty plants are rooted in place, but they can turn in any direction and fire their floral projectiles. Be on the lookout for their magic target rings and avoid them at all costs. While the Seedspitter's attention is focused on one party member, come up to it from behind and get in a few good licks before it can turn to attack. Fire magic works well against this foe, too.

SKELETONS

Type Dark Skeleton, Skeleton

These calcified creeps can deal quite a bit of melee damage, so take them out from long range whenever possible. When fighting with them within melee range, watch for their attacks, then quickly move to the side or back and unleash an attack of your own to avoid taking too much damage.

SPIKES

Type Needle Turtle, Prickly Tortoise, Spin Spine

These spiny creatures specialize in frontal melee attacks. They are always focused forward, so they can't see anyone from the sides or back. Use this to your advantage by staging your attacks from those positions. Although you may be tempted to give them a kick, don't use a Stomp Attack against them. Their spikes aren't merely decorative, but rather serve to protect the monster from these types of attacks.

DARK FOES

Some foes have Dark versions that hide in shadows and only take half damage when in this form. Use any type of Recovery magic (Cure, Raise, or Clear) on them to force them out of the dark, where they once again act like their normal counterparts.

COMING OF AGE

Your story begins in the small friendly village you have known your whole life. Today is a special day! It is your sixteenth birthday and the start of your life as an adult. To mark the occasion, the other villagers have prepared a challenging surprise. Take a few minutes and speak to everyone to learn more about the traditional coming-of-age ceremony. You are ready to face this challenge once you've finished exploring the village. Use the Save Stone near the entrance before entering the forest. [1]

THE FOREST

THE FOREST

As soon as you enter the forest, there is a helpful moogles that is happy to teach you the Basics of Battle and even provides a Mu and a Bat to practice on! [2] Pay close attention to his lessons, as they all come in handy later on. [3]

Once you've handled your first two foes, head up to clear out some more of the forest's creatures. Be careful, because some monsters can hide until you get close to them. For example, Mus can pop out of the ground when you approach. [4]

Body Slam!

You can often get small creatures to drop extra goodies by picking them up and tossing them into a nearby wall, tree, or other solid object. This is a good way to do some damage and possibly get extra items in the process. Be careful that you don't carry them around too long, though. It doesn't take long for a creature to wiggle out of your arms and attack you, so you have to be quick!

After defeating the Mu, move to the right and down into the stream to the small raised area containing a **Treasure Chest**. [5] Attack the chest to open it and then pick up the items using either your Z button on the Wii or Y button on the DS.

Continue right across the stream where you find another Mu. These small, furry critters aren't as dangerous as the foes you face later on, and they provide great practice for honing your battle skills. Continue forward, making your way past any opposition until you see a **Treasure Chest** next to a ramp leading up. [6] Loot the chest and follow the ramp to where it branches into three other paths; take the one leading to the left to locate another **Treasure Chest**! [7] & [8].

As you move into the next section of the forest, head to your right where you come across a new type of creature—a **Goblin**! [10] These hulking brutes have a bit more fight in them than the Bats and Mus you faced before, but you should be up to the challenge. The single **Goblin** you encounter near the entrance is quickly vanquished if you keep up a relentless assault.

Follow the ramp down to reach a **Sign** and a **Treasure Chest** guarded by a Mu. [11] Make sure you read all the signs you come across. Reading them gives you useful information and can sometimes even open up quests at the Quest Shoppe. Swim across the water and take on the three small **Mini Movers** barring your path. [12]

EAT YOUR FRUITS AND VEGGIES!

Creatures sometimes drop food, like grapes, potatoes, and carrots, which can replenish your HP or MP. Be sure to scoop up any food you see to keep yourself in fighting shape!

BURIED TREASURE!

Before heading through the gate, be sure to grab the **Buried Treasure** behind the tree in the lowest corner of the map. To unearth your **Scratch Cards** just run your magic target ring over the spot indicated on the map until it flashes, revealing a hidden treasure, and then cast a spell on it.

BURIED TREASURE!

Useful items are sometimes hidden right below your feet. To search, use your magic target ring to pass over the ground. It functions like a treasure detector and lights up when there is something buried underneath it. To unearth your find, cast a spell or two on the spot and wait for valuables to pop up out of the ground. You never know what you might find! [13]

Once you have cleared the path, head down the grassy steps where you find three Goblins! [14] They aren't so dangerous now that you have had some combat experience. Once you've defeated these three, a switch appears. [15] Hit it once to activate it; it lifts the gate, letting you go deeper into the forest. Before heading through, notice the **White Barrel** to the right of the passage. [16] To see what's

inside, smash the barrel by attacking it. These helpful barrels contain wonderful items such as Ether (which replenishes Magic Points) and Potions (which replenish your Hit Points). Look for them as you make your way through the world. They are often just what you need to prepare for the next battle. Use this one to replenish your HP and MP so you are ready to face the final task of your ceremony.

BOSS ENCOUNTER

The Guardian

Each boss creature you face has a weak spot, usually marked by an unusual design or feature. In the Guardian's case, it is its head. Unfortunately, this weak spot is protected by a helmet. Get rid of the Guardian's helm to expose its head to your strikes. You must attack the helmet to remove it. Some damage can be inflicted by jumping and hitting it, but the easiest way to remove the helmet is to wait until the Guardian bends over to unleash its beam attack. [17] This does quite a bit of damage if it hits you, so attack from the side and hit its helmet while it is bent over. This exposes its weak spot and gives you an advantage throughout the rest of the fight.

Jump and attack the exposed head to do greater damage than your normal attacks. Look out for the Guardian's whirlwind attack, which damages you and knocks you down, taking you out of the fight for a few seconds. [18] Watch closely, and when you see it start to spin its arms, get away and stay out of its reach until it is finished. The Guardian also has a ground pound attack that can knock you down, causing some serious damage. However, once it punches the ground, it's stuck there for a few seconds. Watch for this and jump up onto the arm that is stuck to the ground. From here, you can deliver devastating attacks to the exposed head without having to jump. [19] Keep an eye out for the Guardian's main attacks and move in to damage it after it completes each one, quickly backing out before the next attack. This way, you can deal maximum damage with minimal risk to yourself.

If you decide to stand on its head and stomp on it, be careful of the Guardian's most devastating attack! It conjures an explosion that inflicts heavy damage and knocks you back quite a distance. It's true that the weak point is on top of the Guardian's head, but don't get too hasty with your exploitation of this vulnerability, or you may wind up burnt to a crisp.

Treasure Chests line the edges of the battlefield. These contain items to replenish your HP and MP, so if you find yourself in trouble, retreat from your foe and refuel. Keep damaging and retreating until you have reduced it to scrap.

Once you have defeated the Guardian, be sure to collect your spoils before entering the doorway leading to the next area.

Once you are done speaking to Sherlotta, [20] take the shortcut leading to the left and up to reach the first part of the forest you explored. [21] Continue to the left until you reach the **Treasure Chest** that you opened on your way through. [22] Jump off the path and head to the left to arrive safely back at the village. You have passed your coming-of-age ceremony and are now a full-fledged adult!

You return to the village victorious, but all is not well. Eryll has fallen ill, and you must procure medicine for her from outside the forest. Be sure to speak with all of the villagers before following the road down past Lion's garden and venturing out into the wide world.

FINDING A CURE

With the other villagers unable to help, it's up to you to venture outside of the forest to find the medicine Eryll needs. Once you leave the village, you find yourself on the World Map. Here, you can see all the destinations currently available for you to visit. Head towards town to see if you can find a cure for Eryll's crystal sickness.

THE TOWN

ICON	DESCRIPTION
01	Ye Compleat Adventurer
02	Custom Fabrications
03	Ye Olde Storage Shoppe
04	The Adventurers' Guild
05	Scratch Card Stall
06	Quest Shoppe
07	Library

Though the village may always be home, the town is the only place to go to take care of the many things an adventurer needs. The portion of town near the entrance to Area A contains a useful **Save Stone**, as well as two shops.

Ye Compleat Adventurer

The shop to the left as you enter the town is Ye Compleat Adventurer, your basic weapon and armor shop. Successful adventuring requires good equipment, and this shop carries all the basics. On your first visit to town, their inventory is similar to what you are already wearing, but check back often as their stock is always growing. For a complete list of available equipment for sale, please see the "Data" section of this guide.

Custom Fabrications

This shop, found to the right as you enter the town, caters to the more discerning adventurer. Here, you can custom order equipment, customize your existing equipment, generate Jewels, and purchase and sell materials.

To **Custom Order** a piece of equipment, you must have a **Scroll**. Scrolls can be found during your adventures, received as a reward for completing a quest, or purchased at this shop. Each piece of equipment requires the appropriate Scroll, as well as other materials to fill the custom order. **Materials** are dropped from monsters, found in chests, won from completing quests, or purchased at this shop. While you can sell materials for extra gil, it is a good idea to keep a supply of each of the materials you pick up, especially those that are rare, so that you have what you need to custom order equipment.

At Custom Fabrications, you can also **Customize** your existing equipment. To do this all you need is a **Jewel**, which can be obtained from certain creatures or generated by destroying unneeded

equipment. The equipment must be at least level three, and you must unequip it first. Generating Jewels is a great use for your old equipment. Each type of Jewel adds a unique effect, though all are beneficial in some way. For a complete list of Jewels, Scrolls, and materials, please see the "Data" section of this guide.

Head right, past the **Save Stone**, to reach the docks, where you can find the town's other useful services.

Ye Olde Storage Shoppe

As you enter this section of the town, you see Ye Olde Storage Shoppe on your left. Adventuring often leads to accumulating lots of stuff, and extra storage is a big help. You can carry up to 50 of each type of equipment: weapon, head armor, body armor, and accessories. However, if you want to keep even more items, you can make use of Ye Olde Storage Shoppe. Here, you can store up to 300 weapons and 150 each of head armor, body armor, and accessories. There is no fee for using the Storage Shoppe, so feel free to make good use of the extra storage space.

The Adventurers' Guild

Continue along the walkway to reach one of the most important locations in the town: the Adventurers' Guild. Here, you can recruit other adventurers to your party. Before you can recruit others, you must create them. To do this, speak to the guild representative and select an empty spot in your party. Then choose Register. From here, you can create a character from one of the four tribes, just as you created your own character. Once the character has been created, he or she is registered with the Guild and you can select them for your party. While you can create many Guild members, you can only have a party of four at once, so choose wisely.

Any time you visit the Adventurers' Guild, you can switch out party members. Keep in mind though that newly registered members start at level 1 and take a while to catch up to you in levels. They are more likely to get hurt and deal less damage at first, but leveling up allies can be well worth the time and trouble.

There are also mercenaries for hire around the world, but they each have their own requirements to be met before they will work for you, and none of them offer to join your party until you have spent a great deal of time adventuring on your own.

Scratch Card Stall

Make your way down the stairs to the right of the Adventurers' Guild to reach the Scratch Card Stall. Scratch Cards are found throughout the world and may be dropped by monsters, found hidden underground, or even located in a Treasure Chest. When you take them to the Scratch Card Stall, you can play the game on each one for a chance to win the temporary ability listed on the flip side. Each card series has its own set of rules, but in each case you use your Wii pointer or your DS stylus to scratch off the appropriate spaces on the card to win the prize!

Though the effects are temporary, you can carry a winning card around with you until you are ready to use the ability. When you are ready, just go to your menu and select Scratch Cards. From there, you can select from among your winning cards to use the ability you have won. To see a list of all the Scratch Cards with their prizes, check out the "Data" section of this guide.

Quest Shoppe

A moogles is standing across from the base of the stairs, near the water; he's in charge of quests. Speak to him to see what is currently available. To perform a quest, you must pay the quest fee. Each quest on the list shows you the fee, the number of players required to participate, and your reward.

More quests become available as you progress through the story. Make sure you read every sign and speak to every person you come across, as this can often open up new quests. While you

do have to pay a (usually) small amount of gil to participate, quests are a great way to earn experience and materials for ordering custom equipment. Most quests can be done during solo play, but some require you to be in multiplayer mode. Join with a friend to work together for a common goal during Co-Op quests, or go head-to-head during the VS quests.

Once inside the town, notice the **Save Stone** to your right. This is always here so you can conveniently save your game or switch to multiplayer mode at any time. By talking to the townsfolk, you learn that the library is your best chance of finding medicine for Eryll.

It Never Hurts to Be Friendly...

Get in the habit of talking to the townsfolk each time you visit the town. They often have new information that can help you learn where to go next or just give you some interesting background on the world, and some of them even activate quests.

Walk straight ahead from the town entrance to reach the part of the town containing the library. Once there, head up the steps on either side of the fountain to reach the library entrance. [1]

CULINARY CAPERS!

Be sure to speak to the man on the left-hand set of stairs on your way to the library. [2] He is a chef on an unusual mission to make monstrously good treats! Speaking with him opens up a new quest, "Culinary Capers," at the Quest Shoppe.

Upon entering the library, you meet Larkeicus, an old scholar. The townspeople were right, and he can make the medicine you need to cure Eryll of the crystal sickness. For a promise from you to help him with his research later, he agrees to help you. To make the cure, he needs a rare ingredient—Buffasaur Horn! Unfortunately, Buffasaur are ill-tempered and greatly attached to their horns. To help you out, Larkeicus offers to teach you how to use magic. Even if you are familiar with the basics, it is helpful to listen to his lesson. At the end, he gives you three orbs that are used to raise your magic levels. Be sure to pick them up before leaving the library.

Before you can proceed, you need to know where to find a Buffasaur. The old man told you that they are often found near water. Speak to the two boys near the fountain [3] to learn the location of the aqueducts. Once you know where you are headed, make your way back to the town entrance, remembering to save your progress, and head out onto the World Map. Head southeast of the town to reach the aqueducts.

THE AQUEDUCTS

There is certainly enough water here to make the Buffasaur feel right at home! The aqueducts are crawling with other monsters as well, so keep a sharp eye out for trouble. It's a good idea to bring at least one other party member along for extra firepower.

AREA A

When you first enter, jump down into the water to the right. Defeat the Amenbo and continue right to reach a **Treasure Chest**. [4] Once you have collected your loot, head back to dry ground and make your way up the steps. Although it looks like the way is clear, two **Mus** pop up out of the ground when you get near. If you back up as soon as they appear, you can usually face only one at a time, which is easier than taking on the pair at once. [5]

After you have defeated them, approach the moveable **Block**. You automatically grab it once you're within range and you can now walk backwards, dragging it with you. Press your attack button to release the block. With the block out of the way, you are able to reach the next area. [6]

Taking a Swim

You can't use your magic while swimming, but you can use that same button to swim downwards. This is useful when treasure falls into the water.

AREA B

When you enter the area, a Skeleton comes down to meet you. [7] Skeletons deal out decent damage, so stay slightly out of its range until it moves to attack, then quickly move to its side or back to attack it. Once it's down, head up the steps to the left and take out the Skeleton blocking your way. Grab the contents of the **Treasure Chest** on the ledge to your right and continue to the top of the steps near the closed grate. [8] Remember, if any of the loot falls into the water, you can dive down and grab it.

Make your way back down to where you first entered the room. There is a

White Barrel in the right-hand corner. Break it open to replenish your MP, and make sure you use your **Recovery** spell to fill up your HP. Head towards the other **White Barrel** in the opposite corner. As you approach, three small **Mini Movers** appear! [9] Clear them out and use the **White Barrel** to refill any HP or MP you lost in the battle. Head back over to the post. Swing your weapon at it until it reaches the end of its track and activates. This causes the small block to the left of the doorway to move up, revealing a red floor switch. [10] Quickly walk over to it and step on it to open the door. If you don't get there before the block falls, don't worry; just activate the post and try again.

AREA C

Head straight to the right and down into the water. [11] You need to contend with a couple of **Amenbo** lurking on the surface. Once they are finished, continue across the water to reach a **Treasure Chest** and a **White Barrel**. [12] Once you've collected your loot, jump back down into the water and head to the left to reach another **Treasure Chest**. This one is guarded by an **Ice Elemental**. [13] This monster is highly resistant to physical damage, but vulnerable to magic. Because it is blue, you can tell that its elemental affinity is ice and **Blizzard** won't damage it. Hop up onto the platform with it and cast either a **Fire** or **Thunder** spell on it. Either one should finish it off quickly. Loot your treasure and head down into the water to the right until you see the steps that lead up and out of the water. [14]

A Thunder Elemental awaits you. This one is yellow, indicating that it is resistant to Thunder magic. Use Fire or Blizzard to take it out. The orb you see can be activated by using the appropriate type of magic on it. Since this is a yellow orb, use Thunder magic to break it. [15] Once you do, it rises up, revealing a red floor switch. Step on this to open the gate ahead.

AREA D

Once inside the next room, head directly to your right to find a **Treasure Chest**. Once you've emptied it out, hit the switch near the door to move the nearest floating tile towards you. A Fire Elemental appears and attacks! Remember that these creatures are highly resistant to physical attacks. Use either Blizzard or Thunder magic to eliminate the threat since Fire magic won't help at all.

Grab the moveable block and slide it onto the adjacent floating tile. [17] Once it is in place, hit the switch on this tile to cause it to float over into the middle of the water. [18] Swim across to the far side and watch out for the Skeleton that appears near the switch as you approach. [19] Activate the switch; this causes the nearest floating tile to move over to the tile in the center of the water where the box should be. Drag the box onto the new tile. [20] Return to the switch near where you vanquished the Skeleton and hit it to deactivate it. This brings the tile with the box back over near the rusted floor switch. Grab the box and drag it onto the switch to open the gate leading to Area E. [21] Any time you see a rusted switch like this one, you can't open it merely by stepping on it, but must use a heavy object, like this box, to activate it.

MONSTERMASH

The Keep Our Water Clean Committee is looking for adventurers to help keep the aqueducts monster-free. Read the sign directly to the right of the doorway you used to enter this area to unlock this quest at the Quest Shoppe. [16]

AREA E

As soon as you enter the room, the gate locks behind you and you're trapped! You are going to have to find a way to reopen that door. Use your Thunder magic to take out the yellow orb to the right.

[22] Next, head to the left of the door to grab the **Treasure Chest**. Follow the ledge around to face the Ice Elemental. Remember, since it has a resistance to Blizzard, you need to use either Fire or

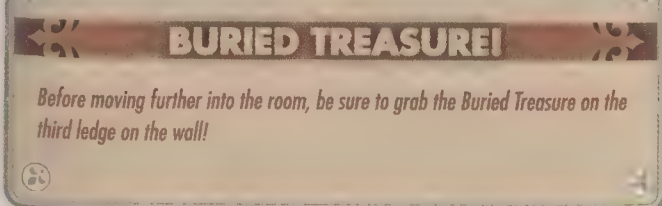

Thunder magic to take it out. Once it's clear, use Blizzard to break the orb. [24] Use the ledges on the far wall to reach the red orb on the highest ledge. Your Fire magic activates it. [25] There is a **White Barrel** underneath this ledge if you need to replenish your MP or HP. Beware the Elements that keep popping up until all the orbs have been destroyed.

Once the orbs have been destroyed, the gate opens, letting you proceed farther into the room. Here, you find a couple of Amenbo, as well as a Mu, who try to stop your progress. Head to the right and

take out the yellow orb and open the **Treasure Chest** nearby. [26] Hop onto the ledge near the blue orb and use Blizzard to destroy it. This leaves only the red orb along the far wall. [27] Once you have used Fire to activate it, the gate opens to let you into the rest of the room. Grab the goodies in the **White Barrel** near the gate.

Head to the right, towards the **Treasure Chest**, and deal with the group of three Mini Movers. [28] When finished, cross the water to face a Lizardman guarding the switch and a **Treasure Chest**. [29] When the scaly creature is out of the way, push the long switch into the wall, just like you would push one of the moveable blocks. [30] This opens up the door leading back into Area D. From here, drop to the left and follow the wall to reach the newly opened doorway to Area F.

AREA F

Use your Blizzard or Thunder magic to take care of the Fire Elemental near the Keystone Pedestal. [31] Once you do, two Lizardmen appear, eager to defend their territory. Keep a close eye on your HP and MP and use the **White Barrel** in the right-hand corner if you need to refill. Once these foes have been vanquished, a **Keystone** appears in the center of the room. [32] Pick it up and toss it onto the **Keystone Pedestal** to unlock the nearby door leading to Area B. Don't worry about the locked area on the other side of the room. You can't access it from here, but that's only temporary. Walk into Area B and set off down the stairs and into the now open doorway to reach Area G.

AREA G

This room has five rusted floor switches you need to activate: three on the side you entered on and two on the far side. Notice that the boxes here are different than the heavy ones you have used before. You can't grab onto these and slide them, but you can pick them up. Approach one of the boxes, pick it up,

and drop it on the nearest floor switch. It can be difficult to place it exactly where you want, but you can always pick it up and try again, or jostle it into place by walking against it, which moves it in small increments. [33]

Now you've got three switches covered, but you're out of boxes! To activate the last two, you need two more boxes; luckily, you can reach a couple.

Hit the post repeatedly until it slides all the way down its track and activates. [34] As soon as it does, be ready to run to the far corner of the room, against the same wall as the locked gate. Activating the switch raises an elevator in both of the far corners, each containing a box. Run quickly over to the right corner and grab the box and place it on one of the remaining switches. Go back to the post and activate it again. This time, run to the opposite corner and grab the box from the elevator there. A Skeleton tries to stop you! Ignore him until you have taken the box out of the elevator, then deal with the bony foe. [35] Place this last box on the remaining switch to open the doorway at the top of the stairs. It leads to the caged section of Area F that you couldn't reach before. [36]

Grab the **Dungeon Key** and step on the red floor switch to open the gate. [37] Loot the **Treasure Chest** as well. Make your way back through Area F to Area B and into Area G again. Now that you have the Key, you can access the locked section. [38] Here, you find a **Save Stone** and a **Treasure Chest**.

In addition to letting you save your game or switch to multiplayer, **Save Stones** also fill up your HP and MP when you touch them. Encountering a **Save Stone** while adventuring is a good indication that you are close to a boss fight or other dangerous encounter. To proceed, push each of the four switches completely into the wall to open up the door to Area H, the den of the Buffasaur! [39]

BOSS ENCOUNTER

The Buffasaur

As Larkeicus warned you, the Buffasaur is tough, but it has a weakness to magic. The creature has a defensive shell that protects it from your attacks. Use your Fire, Blizzard, or Thunder magic to take out the shield, forcing the Buffasaur into a vulnerable position. With the shield down, you can inflict damage anywhere, but the weakest part of the creature is

the large diamond on its back. [40] Make your way past its attacks to this spot. The shield doesn't stay down for long, so be ready to short circuit it with another blast of magic and dive in again to continue your attack on the Buffasaur.

The Buffasaur has plenty of attacks (and that annoying magical shield doesn't help matters). Look out for its whirlwind attack, hammer slam, shoulder uppercut (which occurs if you stand on it for too long), and a charge attack where it races across the screen in an attempt to trample you. [41] (The charge attack is preceded by lightning sparks visible on the Buffasaur's horns as it lowers its head.) [42]

This beast also has a defensive posture in which any normal attack to its front will be blocked and countered by a quick swing of its club. Take notice of when the Buffasaur enters this stance and refrain from attacking its front arc. Attack from the side and back if possible.

However, the real trick to overcoming this monster is to remove its magical shield and inflict as much damage as possible while it's down. If you cast Fire, the shield drops and the Buffasaur takes a bit of extra damage. If you cast Thunder, the magical shield drops and stuns the Buffasaur for two seconds. Blizzard drops the shield and freezes it for four seconds. With these three magical options in mind, Blizzard seems like the best option. Cast Blizzard and unleash your full physical might against the diamond on its back. It's likely that you'll get off two or three attacks before the Buffasaur thaws, but stay on its back and attack as much as possible to inflict as much damage as you can.

Once the magical shield returns, the Buffasaur will be immune to spells for a few more seconds (look for the blue flame above its head). When the flame dies out, cast another Blizzard and crush the diamond once again. There's a chance that you may not have enough MP to use this tactic during the entire battle. If you run out of replenishment items around the room in the chests, don't fret. Buffasaur isn't unbeatable. Stay behind it and slowly chip away. While behind it, the only attack you have to worry about is the whirlwind, and if you wait for him to attack before you get close, you can easily dodge it.

The Buffasaur is one tough foe, but by taking your time and using caution you can win the day. Use magic to keep its defensive shield down, avoid its more powerful attacks whenever possible, and go for the weak spot on its back to make the most of your attacks. Once you have destroyed the monstrosity, collect your rewards and pick up the Buffasaur Horn to be transported out of the aqueducts.

Head back to town to give the Buffasaur Horn to Larkeicus. Once he has prepared the cure, return to the village and speak with Sherlotta to deliver the medicine.

PHOENIXDOWN

Boss encounters are special; you have an extra option to get back into the fight if one of your party members gets KO'd. As long as at least one party member is still up, you can switch to the KO'd party member and grab a **Phoenix Down**. These red and gold objects allow you to resurrect a character during a boss battle and get back into the fight without another party member's help. Some boss encounters have more than one, so be on the lookout if you find yourself in this predicament.

MONSTER DROP TABLES

REPAYING A DEBT

Now that you know Eryll is out of danger, it is time to return to the town and repay the favor you owe Larkeicus. He told you he needed assistance with his archeological research; how much trouble can research possibly be?

AREA A

The monsters on Ice Mountain are serious about defending their territory. Before you can proceed, you must eliminate the Snow Mus that attack! Once the way is clear, jump up onto the ledges that

form makeshift steps and face the Ice Bomb and Bat that try to stop you. [1] At the top, locate the pull lever. Jump up and grab it, opening the door to Area B. Whenever you see a lever like this, you can bet that grabbing it causes something useful to happen! [2]

BURIED TREASURE!

Run your magic target ring over the mound on the right side of this area to find a buried treasure! [3]

AREA B

HUNT THE HIDDEN 1

Be sure to read the sign to the left of the entrance to open up a new quest at the Quest Shop.

Find the Ice Pot as you enter the area. [4]

These pots can be used to freeze water into solid ice, letting you walk on it or drag objects across it if necessary. Use your Blizzard magic to freeze the Ice Pot. Pick it up and toss it into the water. [5] This freezes it solid and leaves the Amenbo that was swimming there at your mercy on the surface.

Walk across the ice and make your way through the Snow Mus and Ice Bomb here to the doorway leading to Area C. [6]

BEHRRRI! IT'S GOLD UP HERE!!

Many of the monsters that call Ice Mountain home are acclimated to the cold. Refrain from using Blizzard and instead stick with your Fire and Thunder spells for most foes.

AREA C

Use your Fire or Thunder magic to take out the Ice Elemental moving to attack you. Next, go after the Amenbo in the water. Once the area is clear, freeze the nearby Ice Pot with Blizzard and toss it into the water. [7] When it freezes, a Floating Eye pops out. Eliminate it, drag the moveable block onto the ice, and position it under the pull lever. Climb up onto it and jump to activate the lever, causing a tile to rise up to the right. [8] Use it to make it across the chasm where an Ice Flan awaits. Use your Physical attacks and your Fire or Thunder magic on it to quickly take it down. Be sure to grab the **White Barrels** and **Treasure Chest** here before continuing. At the edge, you find a rope and pulley system. Jump up and grab the handle. [9] This takes you to the other side of the second chasm, where you can reach the passage to Area D.

AREA D

Eliminating the Ice Bomb and Snow Mu that come at you as you enter causes a pull lever to drop near the side of the cliff. [10] Break open the White Barrel here if you need to replenish your HP or MP.

Jump up and grab the pull switch, which causes a tile to appear to the right. Jump onto it and leap to the next tile. From this second tile, turn to your left and jump onto the small pillar where you find another pull switch. [11] Activate it to reveal another tile. Jump back onto the tile you recently vacated and onto this new tile. From here, you can reach the small area on the ledge below the next pull switch, causing another tile to pop into place. Jump from the ledge to this new tile and onto the one adjacent to it, and then ahead to the larger pillar with yet another pull switch. Pull it to activate the last tile. [12]

Jump onto it, take care of the Bat that tries to give you trouble, and head up the stairs to take out the Ice Flan. Don't forget to grab the **Treasure Chest** here before continuing to Area E.

BURIED TREASURE!

After grabbing the last pull switch, run your magic target circle up the wall and just above the pull switch to unearth a secret stash of Scratch Cards!

AREA E

Notice the red floor switch under the water and remember its location. Use Blizzard on the nearby Ice Pot and drop it into the water. Once it is frozen, drag the moveable block until it is directly over the switch. As you move out onto the ice, a Floating Eye appears, so be ready for it. [13] Once the monster has been dealt with and the block is in place, use Fire to ignite the Fire Pot and drop it onto the ice. This melts the ice and, if you positioned it correctly, drops the block onto the switch. [14] When it hits the button, the tile with the block raises up to become level with the bridge. Don't worry if upon melting the ice you discover you have placed the block in the wrong spot; it reappears and you can try again.

AREA F

It's a good idea to use the Save Stone here before continuing. When you are ready, grab the handle and slide down the pulley rope to reach the thin snow-covered wall in the center. [17] You have to time it just right! If you miss the ledge, you reappear near the pulley and can try again. There are two Ice Bombs here, along with a Floating Eye. Once you beat them, a post switch appears. Use the **White Barrels** on the steps to the left if you need to refill your HP and MP, and then activate the post switch. This causes a pull switch to come down at the end of the wall opposite the steps. Grab it and hang on as it lifts you up to the next ledge where you can reach the doorway leading to an upper ledge of Area G. [18]

Now there is just one switch left to go. Use the Ice Pot again to freeze the water. Once it's frozen, move the block from the bridge onto the ice and over to the rusted floor switch, which opens the door. [15] Watch out for the Elemental and Floating Eye guarding this side of the room! Before going through the door, make sure you have replenished your HP and jump down the ledge to the right to reach two well-guarded **Treasure Chests**. Take out the Elementals and Ice Bomb here to claim the treasure. [16] Head back up the ledges to the door to enter Area F.

BURIED TREASURE!

Before moving on to Area F, use your magic target ring to dig up the Buried Treasure underneath the bridge!

AREA G

This ledge contains two **Treasure Chests**. [19] After claiming your rewards, head back into Area F and drop down onto the snow-covered wall where the post switch was located. KO the Ice Bombs and the Floating Eye to make your way up the steps and into Area H.

AREA H

You are nearing the summit and it is well-guarded. An Ice Elemental is joined by three Ahriman to guard the steps leading up to the summit. These are much tougher than their smaller green cousins. They can shoot a powerful eyebeam that damages you and knocks you back. Obviously, you want to avoid that attack whenever possible. Their most powerful attack, though, is their Blizzard spell. Keep a sharp eye out for the enemy magic target and move out of the way if you see it coming for you. One of these monsters alone would put up a respectable fight, but three together can be awfully dangerous. Concentrate your attacks on one at a time to eliminate the threat as quickly as possible. [20]

Once you have cleared these enemies out, jump from block to block to reach the summit. Here, you must push the loose stone into the center of the ruins at the summit. [21] Doing so returns you to the World Map where you can go back to the town and the waiting Larkeicus.

FIRE MOUNTAIN

You've completed the first of Larkeicus's tasks! When you tell him about your experiences on Ice Mountain, the old archeologist sends you to Fire Mountain to activate the ruins there as well.

AREA A

As you enter, a Vulcan Mu attacks! Just as the creatures on Ice Mountain were resistant to Blizzard, the creatures here are resistant to Fire. When using magic, stick with Blizzard and Thunder spells here.

Touching the lava won't instantly KO you, but it does inflict a great deal of damage. If you happen to fall in, get out as quickly as possible and be ready to use a Recovery spell right away.

Head up along the left path and take the stairs leading to a **Treasure Chest**. It is guarded by a set of three Mini Bombs. [22] Come back down and take the path to the right, which crosses over the lava. Take out the Bomb and the two Vulcan Mus to clear your way. The Oil Barrel here can be used to clear stone out of your way. Before you use it to break open the way ahead, you can put it to good use and get yourself some treasure. Pick up the barrel and jump down to the lower level on the right-hand side. Place the barrel in front of the blocked door. [23] Use your Fire magic to light it, and stand back! The force of the explosion obliterates the stone, letting you access the **Treasure Chest** hidden inside.

Head to the left once you've collected your goodies. Quickly jump across the lava using the wooden plank floating on its surface. The plank starts to sink as soon as you touch it, so you must be swift! [24] Once across, take the upper path across the lava again and use the barrel, which has reappeared, to get rid of the stone blocking the way to Area B.

AREA B

When you enter Area B, you are greeted by one of the strangest creatures you have encountered so far, the Magic Pot. Don't let its smallness fool you; this is a dangerous critter! [25] Take it down quickly and vanquish the Hammer Goblin that soon appears. Use the **White Barrels** to your left to replenish any HP or MP lost during the battle.

BRING THE COW HOME!

Be sure to read the sign before proceeding. Someone has lost a darling pet and could use your help in finding her. Check out the **Quest Shoppe** to lend a helping hand. [26]

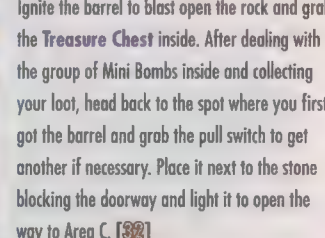

Before you can continue, you must take care of that large flame blocking the path. Luckily, there is a large **Water Jar** handy. Pick up the jar and toss it near the flames. Break it open to drench the fire, clearing the path. [27]

Next, go to the end of the path and jump quickly across the three wooden planks to cross the lava. [28] The planks sink after a moment, so you have to be quick on your feet. Once you reach the other side, you face a group of three Mini Bombs and a Fire Flan. [29] After you clear them out, use the pull switch to reveal an Oil Barrel.

Pick up the barrel and jump back across the first two planks and onto the adjacent ledge. [30] Still holding the barrel, jump onto the ledge to the left and then to the upper ledge on the right. [31]

Ignite the barrel to blast open the rock and grab the **Treasure Chest** inside. After dealing with the group of Mini Bombs inside and collecting your loot, head back to the spot where you first got the barrel and grab the pull switch to get another if necessary. Place it next to the stone blocking the doorway and light it to open the way to Area C. [32]

AREA C

Avoid the treacherous falling rocks as you fight Vulcan Mus, Magic Pots, and Fire Elementals, and head up the rocky path. Loot the **Treasure Chest** resting on a step on the left hand side of the path (where the path turns to the right). [33] Continue dodging the falling lava rocks and take down the Walking Plant. Once the path is clear, make your way to the right and pick up the Water Jar there and carry it to the ledge. With the jar, jump up on the floating stone. [34] Toss the jar near the flames and destroy it to douse the fire. Next, jump to the back ledge and grab that Water Jar, using it to put out the fire on the nearby ledge. [35] Run across the ledge and take out the Fire Bat in your way. Pick up one of the Water Jars and stack it on the other. [36] Pick them both up and jump onto the floating stone with the flames. Place the jars in between the fires and destroy them to put out the flames. Jump back off the stone and grab one more Water Jar. Take it with you on the floating stone to reach the remaining flame on the other side. [37] Once you put out the fire, you can safely reach the next area.

BURIED TREASURE!

Before heading up the path, be sure to dig up the treasure buried near the rock in the center of the path, across from the entrance. [38]

AREA D

The monsters in this room each have an Oil Barrel on their heads! You need those barrels, so make your way around the room, defeating the monsters. [39] Once you are finished, grab the treasure chests on the left and right of the doorway you entered. [40] Use the barrels to destroy the four large blocks in the center of the room, revealing four floor switches. [41] Step on each one to reveal a Dungeon Key. Head to the right to grab it, and head through the doorway to Area E. Be careful, since the monsters respawn once you destroy all four stones.

BURIED TREASURE!

A treasure is buried on the other side of the room, across from the entrance! Loot it once you have eliminated your foes. [42]

AREA E

Walk forward as you enter the room and take care of the Bomb on your left. Use the White Barrels here if you need to replenish your HP or MP before starting the dangerous ascent up the path. [43] When you are ready, head up the path, being careful to dodge the lava rocks rolling towards you. These can be quite dangerous; they not only knock you down, but can also knock you off the path completely, pushing you in the lava. In addition to the rocks, there are also a few monsters trying to slow you down. Make your way cautiously through them until you see the path turn to the left. Locate the ledge with a Water Jar straight ahead. [44] Take down the Magic Pot guarding the jar and use the White Barrel to boost your HP and MP, if needed. Leave the Water Jar for now, and continue up the path, clearing out any opposition ahead. Once you reach the top, head back down the path and grab the Water Jar, avoiding the rocks as you carry it up the path.

AN EXTRA SET OF HANDS

When playing solo, it is nearly impossible to make it up the path with the Water Jar unless you clear out the monsters first. Your party members are helpful, but not nearly as helpful as another player could be. With a human behind another party member, you can run interference with the monsters while your teammate runs the Water Jar up the path, saving time.

Once you reach the top, carry the Water Jar over to the flame. [45] Be careful not to linger on the wooden plank, or you may find yourself swimming in lava. Use the Water Jar to put out the fire and approach the door to unlock it with the Dungeon Key to reach the summit, Area F.

BOSS ENCOUNTER

Lava Spider

The Lava Spider is one dangerous arachnid, but with a little bit of patience, you can squish this bug. As you have seen, large foes have weak spots. In the Lava Spider's case, it is on the top of its head. There is one problem though—this spot is protected by a burning flame! Before you can attack there, you must put out the fire. Lucky for you, the battle area is ringed by several continuously respawning Water Jars. Grab one and toss it at the monster's head. Jump up and break it open to douse the flame. [43]

Once the fire is out, focus your attacks on the large diamond on the top of the head. Pay close attention though, as there is no indication of when the flame is going to reignite. As soon as it reignites, back off and grab another Water Jar to repeat the process.

This fiery arachnid has many attacks. It swings its front legs, spits two different ways from its back end (which inflict Slow if successful), spits fire from its mouth, and has a stomp when you stand on it for too long. The main attack, however, is when it is in its ball form. From this position, it does one of two things: 1) shoots fire balls at you if you're far away, or 2) spins in your direction to try and roll over you. [43] This is the main point of attack.

Grab one of the respawning Water Jars when the Lava Spider enters its ball form. Remain close to the Lava Spider and dodge it like a bullfighter as it rolls your way. When it's disoriented from hitting the wall, throw the Water Jar on its head to douse the flame and jump on its head to unleash your attack! With the right timing, you should be able to inflict 10-16 stomps on the Lava Spider. However, the Lava Spider soon regains its bearings, so quickly jump off and dash to grab another Water Jar, waiting for it to enter its ball form once again.

Continue whittling the Lava Spider down in this manner and you shouldn't have to worry too much about getting hit. Keep your health up, continue dousing the flame and attacking while it is vulnerable, and you soon defeat this creepy crawl. Now that you have climbed both Ice and Fire Mountain, it is time to return to Larkeicus and report what you have seen.

CONSEQUENCES

After speaking to Norschtalen, make your way into the forest and on to the pond where you last saw the Crystal Core. The shortcut is still open, so you can easily reach it by going up the ramp. [1]

TREASURE HUNT

Before heading up the ramp, speak to the moogles behind it to open up the "Treasure Hunt" quest at the Quest Shoppe. [2]

After speaking to Eryll and Norschtalen, return to town to search for a way to track down pieces of the Crystal Core. As a student of the Ancients, Larkeicus might know something. The townsfolk once again point you toward the library, but it is no longer the quiet place of learning you saw before.

AREA A

As you enter this area, it is apparent that Larkeicus is not at his usual post. The monsters have been let loose in the library! Two Mini Movers hop out to try to stop you once you move inside. [3] Dispatch them quickly and proceed deeper into the library by going through the door to the left of the desk.

AREA B

A few overzealous monsters guard this long hallway, with the first you encounter being a Spike. Don't perform a stomping attack on these guys, since their long spines are dangerous. [4] Break open the White Barrel if you need to replenish your HP or MP stores.

A group of three Cloud Bees moves in to attack next. If you get hit by their stings, use Clear to take away the poison. Before you reach the end of the hallway, a Skeleton appears as a last effort to block your progress through the hall. The door ahead is locked, but you've got the means to open it right here. Pick up the Book lying to the right of the sign, and toss it onto the Lectern. [5] Whenever you see a brown Book like this one, it is used for opening up a door. Loot the Treasure Chest next to the doorway before heading into Area C.

AREA C

Make sure you loot the Treasure Chest on the far left side of the room. [7] Notice the empty bookcase to the left of the locked door. Grab this just as you would if it were a small moveable block, and drag it back away from the wall. [8] It was blocking a doorway leading deeper into the library!

One of the first things you see upon entering is a Magic Pot. To quickly eliminate it, grab the purple Book lying on the floor and place it on the Lectern. [6] This unleashes a powerful spell that travels from the Lectern to a monster, dealing massive damage. Keep an eye out for these books as you make your way through the library; they can give you an edge against challenging groups of foes.

AREA D

To get out of this small section of Area D, push the ladder over to the far left wall and climb it to reach the upper level. [9]

BURIED TREASURE!

Before heading up the ladder, use your magic target ring in the left-hand corner to find some buried treasure! [10]

AREA E

When you enter Area E, eliminate the Magic Pot and the Skeleton here. There is a purple Book on the left side of the room that helps take them down quickly. In order to open the closed doorway to the right of the entrance, you must use the white Books to break the Orbs that come down when you activate the switch in the center of the room.

Pick up the white Book near the closed door and place it on the Lectern to the left of this door. [15] Quickly run to the center of the room and activate the switch. Once the switch is active, you only have a few seconds to break all three Orbs. [16] As soon as you hit the switch, run to the White Orb on the opposite side of the room from the entrance and wait for the magic you unleashed to break it. [17]

At the top of the ladder, you encounter a third type of Book. This one causes a beneficial magic to follow you or your magic target around. This spell can be used to break the White Orb you see here. [11] Once the spell hits it, the Orb breaks and moves the bookcase that was blocking your way. Before you can get past the next bookcase blocking your path, you need another Book. Jump off of the upper level near the leftmost Lectern. [12] Down here, you find a couple of Needle Turtles eager to stop you.

MULTIPLAYER TIP!

STICK TOGETHER!

Remember that you can always bring your other party members to your location by quickly clicking your casting button. This is extremely helpful when you've jumped or climbed to another area and need their backup in a fight.

Once you've cleared the critters out, a Book spawns on the top level. [13] Push the ladder over to the right side and climb up to face the two Skeletons guarding the Book. Grab the Book and carry it over to the Lectern near the bookcase blocking your way. Place the Book on the stand and quickly move your magic target ring along the ground to the White Orb on the other side of the bookcase. [14] Once the Orb activates, the bookcase moves and you can reach Area E. It doesn't matter what type of magic you use; the Book's magic follows your target ring. If you miss the Orb, the Book reappears in its original spot and you can try again.

Next, pick up the Book in front of the orb you just activated and take it to the Lectern on the left. Run to the White Orb directly to the left of the entrance and let the magic do its thing. [18] Now you've only got one Orb left to break. Pick up the Book that has reappeared where you grabbed the first one and toss it on the closest Lectern. Hurry to the stand near the last Orb, which is to the right of the entrance. [19] This opens the door, allowing you to proceed to the next area.

AREA F

A Walking Plant tries to halt your progress through this hallway. Once you clear it out, you must deal with a large group of Mini Movers when you approach the Book on the floor. [20] Pick up the Book and carry it to the opposite end of the room, where you must vanquish the two Skeletons lying in wait. Once you do, a past switch appears. It takes quite a few hits to activate it, but a Lectern slides out from behind a bookcase once you succeed. [21] Quickly pick up the Book and place it on the stand to open the nearby door to Area G. Before going through, open the Treasure Chest to the right of the door.

BURIED TREASURE!

Before heading through the gate, be sure to grab the Buried Treasure behind the tree in the lowest corner of the map. To unearth your Scratch Cards just run your magic target ring over the spot indicated on the map until it flashes, revealing a hidden treasure.

AREA G

Take out the Skeleton that attempts to get in your way once you enter the area. Next, grab the empty bookcase and push it off the ledge onto the lower level. [22] Jump down beside this bookcase and deal with the Walking Plant. Once the area is clear, grab the bookcase again and drag it to the right until it covers the red floor switch, causing the Lectern to rise up. [23]

Head to the left to the ladder, where another Walking Plant stands in your way. Once you have eliminated it, push the ladder to the back wall. Climb up and head to the right, picking up the white Book and crossing over the bookcase you had pushed down onto the lower level. Once you are across, drop the white Book for now. Here, you must deal with a few Mini Movers, but there is a purple Book there to help you out. Toss it on the Lectern to give the monsters something to think about.

The door to the right, which leads to Area H, is locked. To open it, you must activate the White Orb floating nearby. Doing this can be a bit tricky during solo play. Position one of your party members to stand on the red floor switch, which raises the bookcase from the floor below. Quickly pick up the white Book and put it on the Lectern. [24] Run swiftly across the top of the bookshelf to the White Orb. [25] The magic follows you from the Book Stand and breaks the White Orb, opening the nearby door on the right.

MULTIPLAYER TIP!

PUSHING YOUR BUTTONS

It is so essential that you always have a friend that can stand on the floor switch for as long as you require is a great help.

AREA C

Make your way to the right side of the room and hit the switch. This lowers the nearby bookcase, revealing a moveable ladder. [26] Grab the ladder and drag it out and to the left until it is between the floating White Orb and the other bookcase. [27] Climb the ladder to the upper level. On your left, you see a **White Barrel** and two **Treasure Chests**. However, everything is not as it appears. The second **Treasure Chest** is actually a **Mimic**! This devious creature masquerades as a loot-filled **Treasure Chest** to fool unwary adventurers. [28] Destroy this sneaky monster and take its treasure by force.

Once you've cleared out the left side, pick up the white **Book** and toss it onto the **Lectern**. Move quickly across the top of the bookcase and the ladder to reach the **White Orb** before the magic you released catches up to you. [29] Activating the Orb lowers the bookcase on the lower level into the ground, exposing two **Magic Pots**. [30] Once you destroy them, a **Dungeon Key** appears. When you pick it up, the bookcase on the left drops into the ground, revealing a **Book**. Pick it up and place it on the tile between the bookcases. [31] Climb up the ladder and stand on the red floor switch to raise the tile with the **Book** to your level. Pick up the **Book** and head to the right.

You must make it past a **Skeleton** and a group of **Cloud Bees** before you can use the **Book**. When facing the **Cloud Bees**, let your party members keep their attention while you go straight for the hive. [32] If you don't take it out, the **Cloud Bees** keep emerging, and you have to fight them forever. Once the way is clear, pick up the **Book** and carry it down the path to the **Lectern** by the door to open the way. [33]

The door leads you to the upper level of Area A. You have to deal with a group of the tiny **Mini Movers** when you enter. Drop down and make your way through Area B again to reach Area C. Take advantage of the **Save Stone** before unlocking the door and entering Area I.

BOSS ENCOUNTER

[35]

It looks like the old archeologist is more than he seems! When the battle begins, you face Larkeicus and three of his **Grappler Golem** minions. [35]

Begin by concentrating on a single minion. This is a fantastic strategy with which to begin. The minions pack a punch, but that's not the true danger. When their HP gets low, the minions begin to flash, indicating that they're about to explode and cause massive damage within a small radius. However, you can use this to your advantage and turn the tables on the boss. Lure the minion close to Larkeicus so that he's in the minion's blast radius when it explodes. This tactic stuns Larkeicus for around 9 seconds when successful! Do everything you can at this point to damage Larkeicus, but keep an eye out for the other two minions.

During the fight, keep a lookout for the old man's devastating spells. Larkeicus has many attacks and a variety of spells. He can cast **Slow**, **Bio**, and **Quake**. He also has the ability to fire magic orbs from his hands that inflict plenty of damage and can shock or freeze you, or set you on fire. As with other bosses, standing too long on Larkeicus's head results in a reprisal attack; in this case, he unleashes a flip kick. Keep a close eye on the ground and move quickly if you see an enemy magic target ring coming your way. His deadly spells unleash some incredible damage, and you don't want to get caught in them any more than necessary. You can also tell when Larkeicus prepares to cast because a glowing purple circle appears around him. [36]

This damaging spell really knocks the wind out of him for a few seconds. Use this time to get in close and let him have it with your melee party members. Characters that can attack from range are a boon in this fight. The old guy is resistant to magic, so your magic users can hurt him, but they rarely score as strong a hit as those from physical attacks. [37] Larkeicus also has a brutally damaging fiery knockback spell. [38] This can be especially deadly if you are low on health. It deals a solid amount of Fire damage to you on impact, then continues to damage you for the next few seconds.

There will be points during the fight where there are no minions to pop next to Larkeicus. Stand about three floor tiles away to retain enough room to dodge any of the orbs he shoots and reduce the effectiveness of his spells. Once Larkeicus initiates a spell and the magic target ring begins heading toward you, run directly towards Larkeicus, through the target. If you were more than two floor tiles away from him (and are not affected by **Slow**, **Stun**, or **Poison**), the spell should go off behind you. This provides a short window in which you can hit Larkeicus a couple of times while he's recovering.

The Golems respawn after a short time, allowing you to begin the minion stun tactic once more. The added bonus to destroying the minions is that they yield **Ether** and **Potions** when you take them out. Replenishing your stores is a necessity in this long, tough fight. Also, if one of your characters gets KO'd, remember to grab a **Phoenix Down**. Save your MP for offensive spells and **Cure**.

This is by far the toughest boss battle you have faced so far. To succeed, you must be constantly aware of your surroundings and keep a close eye on all your party members. Watch your health above all, avoid Larkeicus's spell damage, and get in attacks when you can. Don't expect a short battle; in the end, your patience pays off!

MULTIPLAYER TIP!

BRING A FRIEND!

While you can certainly beat the old guy on your own, this battle is much easier with a friend or three along for the fight. Independent players have a much better chance of avoiding Larkeicus's magic and striking at the most beneficial time. Because of the high damage output of these foes, you want your friends to be of the same level or higher than you to help with this battle.

THE ANCIENT RUINS

After the events in the library, return to the village and speak with Norschalten. She directs you to the ancient ruins east of the town, where you hope to find clues to the missing Crystal Core.

THE RUINS

The first thing you see as you enter the ruins is a giant red floor switch. Head straight past it and up the stairs to empty the Treasure Chests on the left and right of the blocked entrance. [1] Go back down to the floor switch and move all of your party members onto it, dropping you down into the ruins. [2]

AREA B

Once you reach the bottom, deal with the Thunder Bomb and head to the far right to plunder the Treasure Chest. [3] Cross the room to the left, past a single Flan, to reach the doorway leading to Area C.

AREA C

CHARGE IT UP!

Pyramids need to be charged in order to work. Whenever you come across a pyramid that is not glowing blue, use your Thunder magic to give it a charge!

Once through these sets of spikes, you must contend with swiftly sliding spikes! Make your way down as quickly as possible to remove the pyramid from its socket. [6] This stops these menaces from buffeting you around. Take the pyramid with you down the steps, dropping it when you need to deal with the Cockatrice and the Thunder Elementals. Carry the pyramid to the right and up the small ledges to the socket. [7] This transports the pyramid to Area A, and activates a floating tile on the other side of this room. Make your way back up the stairs to where the spikes are, stopping to take advantage of the White Barrel. [8]

Ride the floating tile back to the side of the room where you started. [9] Take the doorway in front of you to reach Area D.

First, break the Yellow Orb on your right using your Thunder magic. [4] This causes the pyramid to drop onto its socket, activating the spikes at the other end of the room. Now, instead of blocking the way, they move up and down, giving you a way to get through. Before you can brave the spikes, you must get past the Cockatrice. Make short work of this feathered foe and head through the spikes. Watch carefully and time your movements when the spikes have just retreated into the ground. [5] Don't run through here with low HP. The spikes don't inflict a great deal of damage, but if you are already low on HP, they can be dangerous.

AREA D

Go around the rolling alarm to reach the Treasure Chest located in a corner behind it. If you happen to trigger the alarm, you must deal with the Daedalus that appears! [10] Head down the stairs and take on the Lizardmen readying for battle at the bottom. If you need to replenish your MP or HP, there is a White Barrel near the center of the room as well as one in the upper right-hand corner.

AREA B

Head back through Area C to reach Area B. Once there, you need to clean up the Thunder Bombs and Cockatrice again. Head to the far left of the room, grab the pyramid, and take it to one of the sockets near the upper corner. Next, grab the other pyramid on the right and put it in the remaining socket. This drops you down a level to Area E.

AREA E

Once you clear out all the monsters, a third socket appears near the center of the room, opening the way to Area F.

AREA F

You need to be light on your feet to make it through this area! Take out the Flan in front of you and head down the stairs towards another feisty Flan. Watch out for the falling rocks! If they hit you, they cause damage and can even knock you off the edge. Break the White Barrel here if you need to refuel, and then grab the pyramid on the right-hand corner of the platform. [14] Head to your left, still dodging the falling rocks, and jump across the thin chasm, being careful of the spikes, to face another Flan. [15]

There is a pyramid on the right side of the room powering another rolling alarm. [12] Wait until the alarm rolls away and then pick up the pyramid, deactivating the alarm. Carry it to the bottom right corner of the room and charge it up with Thunder magic. Toss it into the socket. [13] This moves the pyramid into Area B for use there.

Carry the pyramid up the steps and past the swinging ball and chains. Be careful to time your movements just right, as these vicious pendulums sweep you off your feet—and right off the path. Set the pyramid down at the top of the steps and return to the post switch. [16] Strike the post switch until it has moved down its track and activated. This is harder than it looks! You must avoid the treacherous pendulums while striking. [17] Confirm that you have a good amount of HP so if you get knocked off, you won't get KO'd.

AREA G

Walk down the steps until you reach the sign. From here, jump and grab the swinging rope. (It helps to be a few steps to the left of the sign.) When the rope comes towards you, jump and catch it while in the air. [19] When it swings out over the spikes, jump again to let go, letting your momentum carry you to safety. Bring your party to you as soon as you hit the ground, as they are going to try to run right through the spikes to get to you if you don't.

When the switch activates, run up the stairs and step on the red floor switch to make a socket appear. Pick up the pyramid, charge it up with Thunder magic, and set it in the socket, clearing the way to Area G. [18]

MULTIPLAYER TIP!

A LITTLE HELP FROM YOUR FRIENDS

Playing with a friend here is extremely helpful. One of you can handle carrying the pyramid through the pendulum gauntlet, while the other handles the post switch. This minimizes damage because non-player-controlled members aren't getting themselves knocked off the path by blindly following you.

Grab the pyramid, which stops the spikes from moving, and go down the stairs. [20] Set the pyramid back up and take it towards the socket on the right, facing another Golem. Charge up the pyramid and place it in its socket, which causes it to move to Area E. [21] Take the doorway to the left of the socket to reenter Area E.

AREA E

Pick up the pyramid to the right of the doorway and deliver it to the socket in the center of the room. [22] This drops you down a level to Area H.

AREA G

Here you face several Elementals and Flan. Once you have cleared the monsters out of the room, head through the doorway to the lower level of Area G.

AREA G

Go forward down the stairs and drop down to the floor. If you are low on HP or MP, there is a **White Barrel** on the left side of the stairs, before you go all the way down. [23] Once on the lowest level, you are set upon by Floating Eyes and a Thunder Elemental. Once you clear these out, a **pyramid** pops up to the far right. [24] Charge it up and carry it over to the **socket** in the center of the room. This starts a rope swinging far above you. Head to the far left and jump back up onto the stairs. Position yourself so that you can jump and catch the rope. [25] Swing across to the other side, defeat the Floating Eye, and take the doorway leading into Area I. [26]

AREA I

Make your way up the stairs, taking out the troublesome Golems you come across. At the top, head to the right and position yourself far out on the ledge. [27] Catch the rope and swing across to the small floating platform. Press the red floor switch and wait for the floating tile with the **pyramid** to come to you. [28] Get on the floating tile with it and pick it up. The tile moves left, back to the stairs. Jump to the stairs when you're close enough and carry the **pyramid** all the way to the top. Charge it up and place it in the socket on the left. [29]

This causes a Cockatrice to appear and, more importantly, makes a Blue Orb and socket materialize as well. Take out the irate monster, and then remove the **pyramid** from the **socket**. Carry it over and put it down in front of the Blue Orb's path, positioning yourself next to it. [30] You've only got a few seconds for the next steps, so be ready to move quickly. As the Blue Orb comes toward you, cast your Blizzard on it. As soon as you release your spell, switch to Thunder and charge up the pyramid on your left. Immediately pick it up and place it on the **socket**, which moved towards you when you hit the Blue Orb. [31] The socket won't stay there for long, so you've got to be exceedingly quick. Once you place the **pyramid** on its **socket**, the doorway to Area J opens.

AREA J

There are four **pyramids** in this room that need to be charged up and placed on the four **sockets**. It doesn't matter in what order you do them, but it is easiest to just go clockwise. Take out the Golem to your left to gain possession of the **pyramid** on its head. Charge this up and place it in the nearby socket. Next, make your way up the room on the left side to the post switch. It takes a lot of swings to activate this one. Once you do, a **pyramid** rises out of the floor near where the post started. [33] Quickly grab it; you don't have much time. Charge it up and place it in a **socket**.

Next, climb the steps next to the post switch and grab the swinging rope. When it swings over, jump and grab the pull switch. This makes a **pyramid** lower beside you. [34] Jump onto the tile with the **pyramid** and pick it up. Drop down to the floor, charge it up, and place it in a **socket**. To get the final **pyramid**, defeat the Golem on the right-hand side of the room. Once you place the fourth **pyramid**, a Dungeon Key appears in the center of the room. You can now access Area H!

MULTIPLAYER TIPI

MAY I GET THE DOOR FOR YOU?

Opening the door is much easier during multiplayer. Take care of the Blue Orb, while the other charges the pyramid, getting ready to drop it on the socket.

BURIED TREASURE!

Before heading up the stairs, be sure to use your magic target ring to dig up the buried treasure hidden to the left of the entrance! [32]

SECRET LOOT!

Before heading to the next area, use the swinging ropes on the right side of the room to reach a couple of well-hidden Treasure Chests. Jump up to grab the lowest one and, at its highest point, jump to grab the second one. Repeat this process for the third. From the third rope, you can jump and reach a small area containing two Treasure Chests! [35]

BOSS ENCOUNTER

Veriaulde

Veriaulde seemed like a reasonable Yuke, but something has transformed him into this horrible beast—Grim Gaze! You've got no choice but to take him down.

This flying monstrosity is no pushover, but he only has a few attacks. He can inflict serious damage as well as paralyze and knock back the target by slapping his wings together. [86]

This sometimes energizes him and makes any that touch him take the same damage as they inflicted on the attack. When the sides of his wings glow purple, he casts one of two spells. [87] One paralyzes and the other is Gravity which prevents jumping. Grim Gaze also conjures a ball of light in front of him which explodes, dealing plenty of damage and paralyzing those unfortunate enough to be caught in the blast.

When his wings glow purple and he brings them together in front of him, run out of his range and be on the lookout for his magic target ring. Stay out of its way to avoid taking costly damage. Grim Gaze's attacks are dangerous, but the main difficulty in this fight is getting this monster to land! You can jump up and hit him while he is in the air, but the damage is minor. Stack your spells to cast Gravity (Blizzard plus Raise) to drag him down to your level. Once he is down, concentrate your attacks on the center of his wings. [88] When the weak point on the back of the wing is exposed, focus all your attacks on that.

Grim Gaze doesn't stay down for long. Be ready to back off when he starts to stir so you don't get caught unprepared for one of his attacks. Use the two in the room to replenish your HP and MP when you start to get low. Use your casters to knock him out of the air as much as possible and keep on those wings. Damaging the vulnerable spots on the back of his wings is the quickest way to finish this nasty boss; he soon falls at your feet.

After winning the battle, watch the following event until you acquire Veriaulde's gift.

IN A DARK CORNER

Now that you have Veriaulde's gift, you can see where fragments of the Crystal Core are located. Go to the World Map to see that the aqueducts, Ice Mountain, and Fire Mountain all contain fragments of the Crystal Core.

When you travel to the aqueducts, you discover that another entrance has been uncovered! Enter here to begin in Area A. When you enter, you are greeted by a Sahagin! Get rid of this beast as well as the three Amenbos swimming around in the water. Once the monsters have been taken out, hit the post switch until it reaches the end of its track and activates. [1] This drains the water out of the room, letting you reach the **Treasure Chests** on the far left and right. [2] Step on the red floor switch in the bottom corner to open the door to Area B. [3]

An Ice Elemental and a Thunder Elemental greet you as you enter Area C. Use your magic to take them out. Push the first switch you come to into the wall. [5] Drag the moveable block sitting just to the right of it until it is directly in front of the pushed-in switch. [6] This keeps the switch from moving when you activate the second one. Head to your left and push in the second switch. This opens the door to Area C. Go to the left of the switch and up the steps to reach a **Treasure Chest**!

Watch out for the Fire Elemental on the way. [7] Once you've claimed your goodies, head up the stairs to the right of the switches, pausing to take out the Skeleton that appears on the steps. Loot the **Treasure Chest** in the upper left corner before heading to the now open doorway to Area C.

Take out the Sahagin that advances to attack as you enter this area, as well as the Skeleton located to the left at the bottom of the stairs. Activate the post switch, which raises the adjacent tile with the moveable box. [8] If possible, switch to a Selkie character and quickly double-jump onto the tile. If not, you need to rapidly run up the steps to grab the moveable box and place it on the rusted switch. [9] Once the post switch makes it back to its starting point, the raised tile falls back to its original position, so you don't have much time. If you don't make it, just activate the post switch and try again. Once the switch is activated, the door to Area D opens. Be careful moving your party up the stairs to reach the door. Three Elementals, one of each flavor, block your way. [10] Blast them with magic to get rid of them and move on.

BURIED TREASURE!

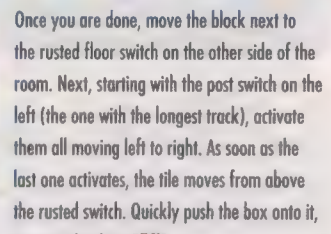

Before moving on, grab the treasure here. Stand on the tile in the center of the room and use your magic target ring to find the buried treasure. Once you do, the tile rises too high for even a Selkie to reach by jumping, so you must be on it to claim your **Scratch Cards**. Underneath the tile, you'll find a **Treasure Chest** with an **Anti-Stun Boost** in it! [04]

You don't have to solve any puzzles to get through this area, but you do face some tough opposition! As you enter the room, you'll face three Elementals, one of each type: Fire, Ice, and Thunder. Put your magic to work quickly to take these monsters out of the fight as fast as possible. You also have a Goblin to deal with! [11] Once these monsters have been put down, three Golems appear! Take them out one at a time so you can eliminate them before they explode. If you need to refuel, there is a **White Barrel** in the upper right corner of the room. Once you have dealt with all the monsters, the door to Area E opens. Before passing through it, be sure to empty the **Treasure Chest** in the alcove on the left side of the room. [12]

Head to your right and jump down to the lower level of the room. [13] Take out the Golems you find here so you can use the post switches with no interruptions. Before using the switches, grab the box and drag it to the right, between the switch on the right and the floor plate. [14] You can now jump up onto the box and onto the ledge to reach a **Treasure Chest**. If you have a Selkie in your party, you don't need to move the box; you can just double-jump to reach the ledge!

Once you are done, move the block next to the rusted floor switch on the other side of the room. Next, starting with the post switch on the left (the one with the longest track), activate them all moving left to right. As soon as the last one activates, the tile moves from above the rusted switch. Quickly push the box onto it, opening the door. [15]

BURIED TREASURE!

Before moving on to Area E, be sure to get the buried treasure at the base of the ledge leading out of the room. [16]

AREA F

Grab the **Treasure Chest** to the left of the door upon entering and continue to the other side of the room. Activate the switch to raise the moveable block. [17] Use the ledges along the wall to jump up and reach the **Treasure Chest**. [18] Read the sign underneath the chest, which unlocks the "Fragile 1" quest. There is also a **White Barrel** here if you need to replenish your HP or MP.

Grab the block and push it into the trench in the center of the room. [19] Watch out for the Golem that appears to stop you! Drag the box along the trench all the way to the far end of the room and onto the middle of three switches. [20] Beware of the Skeletons that appear as you move past. Take the second moveable box from the center of the room and move it to the switches the same way you dragged the first one. Position it on the leftmost switch. Finally, push the third box located near the switches down the steps and onto the third switch, eliminating the Goblins in your way. [21] This opens up the door from which you entered Area F.

Before going back through that door, loot the **Treasure Chest** on the ledge along the left wall in the middle of the area to find a **Scroll**! [22] Use the **White Barrel** in this section of the room if the battles have left you depleted.

AREA E

Enter Area E again to see a floating tile appear. Jump onto it and ride it over to the right to reach Area B. [23] If you want the extra loot and experience, jump down by the switches to clear out the Golems that appear.

AREA B

Make your way down to the lower level of Area B and all the way to the left to reach the **Save Stone**. There are a couple of Goblins that try to stop you, but you can make short work of them. [24]

AREA G

In this last room, you face three Chimeras! Concentrate on one target at a time to eliminate them as quickly as possible. These monsters have a few tricks up their sleeves, including an attack that causes blindness. [25] Use **Clear** on yourself and your party members to get your sight back as quickly as possible.

The Chimeras are vulnerable to Holy magic. Combine **Raise** and **Cure** to create Holy spells, which inflict the most damage. [26] Watch your health and don't let it get low. Chimeras cause plenty of damage, and if you let your party get low, you can be KO'd before you know it. Once you finish off the beasts, loot the **Treasure Chests** to grab a **Scroll**, among other goodies. When you are ready to leave, pick up the **Crystal Core Fragment** on the far left to be transported back to the World Map.

MULTIPLAYER TIP!

HOLYGA

This is a great place for multipeople help. Two players can work together to create Holy magic to really do the Chimeras in at least your single party. It's a powerful spell like Holyga!

ICE AND FIRE

Now that you've made your way through the aqueducts, you still need two pieces of the Crystal Core. Head to Ice Mountain and Fire Mountain to find the remaining pieces.

AREA A

Go to the lower right corner and use Fire magic on the Orb there to make a moveable box appear. Dispatch the Snow Mus on your way. [1] Drag this box out to the center of the ice. Light the Oil Barrel and drop it onto the ice to melt it. [2] This causes the block to drop onto the rusted switch, which opens the way to Area B. There is a **White Barrel** in the upper right corner if you need to replenish your HP or MP.

AREA B

The first things you see as you enter Area B are two **Treasure Chests**, one to the left and one to the right. Once you are done collecting the contents, push the moveable box over to the ledge. [4] Now you can jump onto the ledge.

As soon as you climb up, two Bats appear. Take them out, drag the block over to the next ledge, and jump up. At the top, Snow Mus and a Floating Eye attack. Swing at the post switch to activate it, causing a pull switch to drop near the end of its track. Jump up and grab on to open the doorway to Area C. [5]

FRAGILE! 2

If you didn't pick it up on your first visit to Ice Mountain, the archeology team needs someone to carry extremely fragile vases down from Ice Mountain. If you think you are the person for the job, you can find all the details at the Quest Shoppe. [6]

BURIED TREASURE!

Buried treasure lies at a point straight ahead from the entrance; it's on the ledge in the corner. Run your magic target over it to make it yours! [3]

BURIED TREASURE!

Check under the bridge to uncover a stash of buried treasure!

AREA C

Loot the **Treasure Chest** as you enter the area. Jump down the ledges along the right wall to reach the long ledge in the middle. [7] Once you reach it, be prepared for the Ice Bombs and Floating Eye that ambush you. When you've cleared them out, a post switch appears. Before using it, head left to grab the **Treasure Chest** and **White Barrels**. [8] It's always a good idea to keep your MP and HP maxed out!

Activate the post switch and grab the pull switch that appears at the end of its track to reach the ledge up above which leads to an isolated ledge of Area D. [9] Once inside, raid the two **Treasure Chests** for their **Jewels** and return to Area C.

Jump to the left to reach the far side of this area. [10] Once there, be ready to take on some serious opposition in the form of Ice Bombs, Ice Flans, and a Floating Eye. Once you've cleared these out, grab the **Treasure Chest**. Next, pick up the **Keystone**, jump up, and place it on top of the pull switch. [11] Grasp the pull switch and ride it up to the ledge. Leap onto the ledge, quickly turn around, and get the **Keystone** before the pull switch goes back down. [12] Toss the **Keystone** in the **Key Pedestal** to open the way to Area D.

TREASURE HUNT 2

Before riding the pull switch up, speak to the moogles to unlock "Treasure Hunt 2" at the Quest Shoppe!

AREA D

When you enter Area D, a welcoming party of monsters is there to greet you! Use your magic to quickly get rid of the two Ice Elementals and knock that Bat out of the sky. Head to the left and take on the Floating Eye guarding the **Treasure Chest**, and then collect your bounty. [13] Next, quickly jump onto the first floating tile and onto the pull switch. Once this switch is activated, you can ride it across to the second floating tile. [14] Remember: don't let your feet touch the tiles for too long; they plummet after a second if you stand on them. If you have a Selkie in your party, he/she can use a double-jump and make it across without using the pull switch.

There is a **White Barrel** to replenish your HP and MP when you make it. Use your **Blizzard** on the Ice Pot and toss it into the water to freeze it. Deal with the Sahagin lurking there and keep moving left. Once you cross the ice, you are greeted by a trio of Mini Bombs. [16] Get rid of them, along with their brethren who soon appear.

Once you've cleaned out the monsters, go back and grab the Ice Pot again and use it to freeze the water. Move out onto it to reach the pull switch. [16] Activating the switch reveals a post switch. Light the nearby Fire Pot with your Fire magic and drop it onto the ice to melt it. Next, grab the **Key** from the ledge and set it near the water. [17] Activate the post switch, causing the **Key Pedestal** to briefly rise out of the water. Immediately move to pick up the **Keystone**. Jump to the **Key Pedestal** and place the **Keystone** on it. [18] You only have a few seconds, so you must be quick! If you miss it, you'll have to activate the post switch again. Once the **Keystone** is safely in the stand, the doorway to Area E opens up.

AREA E

As you move through this area, several groups of Mini Bombs appear to give you trouble. Eliminate the monsters as you move around the room. Once you have gotten them all, four Grappler Golems appear! [20] If the Golems don't appear, you are missing a Mini Bomb somewhere. Take another walk around the room and keep an eye out for them. Take out the Golems, concentrating on one at a time to avoid their deadly explosions. Once you have eliminated them, grab the **Dungeon Key** they were guarding. The doorway to Area F is now open. Before leaving, though, use the Oil Barrel to melt the ice on the two small frozen ponds. Each contains a **Treasure Chest**! [20]

BURIED TREASURE!

Before leaving the area, take a moment to dig up some goodies. Run your magic target ring over the ledge where the Key was originally located. Grab the buried treasure and move on!

MULTIPLAYER TIP!

A HELPING HAND

Getting the Key on the stand is much simpler with another player helping out. One player can be ready with the Key while the other activates the post switch!

BURIED TREASURE!

Check for some buried treasure before heading into Area F. It's near the wall across from the doorway.

AREA F

Go to your right and acquire the contents of the **Treasure Chest**. Step down and deal with the Ice Bombs. There is a **White Barrel** to the left if you need to fill up your MP. [22] Though it may

look like you're jumping to your doom, launch yourself off the cliff near the **White Barrel** to the left to reach a small ledge below. Jump up and grab the pull switch that's just at the upper edge of normal jumping range and ride it up to reach a doorway to Area G.

AREA G

Plunder the **Treasure Chest** here, but be careful not to fall off the cliff. If you do, you must make your way back to Area F before you can continue. Head back to Area F once you've collected your loot.

AREA F

Drop onto the small ledge and ride the pull switch up once again. This time, jump to the right to reach the main part of Area F. Head towards the rope and pulley to face a **Floating Eye**. Once you take it out, use the steps cut into the back wall to reach the floating tile. [23] Once on it, it raises up to be level with the tile to the left. Jump from the floating tile to the rectangular tile and quickly over to the ledge. The rectangular tile begins to plummet almost as soon as you touch it, so you must be quick. [24] Having a **Selkie** in your party here is advantageous, since the double-jump makes this much easier. Once you make the jump, take a moment to heal if necessary and continue down the ledge to Area H.

BURIED TREASURE!

Don't be in too much of a hurry to use the rope and pulley! The area directly beneath the rope and pulley device is hiding a buried treasure.

AREA H

As soon as you enter, **Ice Plans** and **Ice Elementals** try to ruin your day! Take out the **Elementals** quickly and then concentrate on the **Ice Plans**. [25] With the monsters out of the way, move to the right to reach the **Save Stone** before moving on to Area I [26]. Remember, touching a **Save Stone** replenishes your MP and HP, so it is always a good idea to touch them, even if you don't want to save your game.

BURIED TREASURE!

Take a second to uncover the hidden stash that's right behind the **Save Stone**.

AREA I

Make your way up the steps, clearing out the **Ice Bombs** and **Floating Eyes** in your way. At the top, eliminate the **Ice Elementals** and **Sahagin** in the water to give yourself room to work. Note the positions of the two red floor switches beneath the water. Use **Blizzard** on the nearby **Ice Pot** and drop it into the water to freeze it. Position the moveable blocks over the red floor switches. [27] Once you have them in place, use the **Fire Pot** to melt the ice, dropping the blocks into place. This opens the way to the locked door for which you already have the **Dungeon Key**. [28] Use the **White Barrels** on the far side of the pond to replenish your MP and HP before going through the door into Area J.

MULTIPLAYER TIP!

FIRING TOGETHER

This is a great spot for a little multiplayer help. To open the doorway to Area F revealing a **Treasure Chest**, you must activate all three **Orbs** at the same time with your **Fire** magic. You only have a couple of seconds to do. Lock your rings in place, but it is much simpler with two players, and three just makes it easy. Once the **Orbs** have been broken, you can go through the doorway, take your loot, and head back into Area I to continue.

BOSS ENCOUNTER

The **Scale Toad** is one tough monster, but with a little perseverance, you can take it down. The **Scale Toad** has many troublesome attacks. It shoots bubbles that track and freeze the player and it slams its front "hands" down when in the pool. The **Scale Toad** can swipe its tongue in front of itself, clearing its front arc, or jump towards attacking players to squish them as it's getting out of the pool. [30] It also hops and slams players while out of the pool (especially

while someone is standing on it) and it rarely uses its frost breath while in the pool; however, this breath freezes whoever it touches.

Like all the bosses so far, this one has a weak spot. However, it's on its belly, so you must get it to flip over in order to expose it. The **Scale Toad** begins the battle in a small pond at the far end of the area. The best strategy is to stay as far away from it as possible while it is out of the water. Once it's back in the pond, use **Blizzard** on the nearby **Ice Pot** and drop it into the pond to freeze the water. [31] When you do this, the monster flops onto its back, exposing the diamond on its underside. Jump on it and give it all you've got to inflict plenty of damage. [32] Regular attacks don't do much damage, so concentrate on keeping yourself alive until you can force the boss out of the pond and flip it over.

FIRE MOUNTAIN

Cross back over the lava and go back over the bridge. Once there, turn left and jump onto the wooden plank holding a Water Jar. Like the plank below, this one sinks almost as soon as you touch it, so grab the barrel and jump back as quickly as you can. [35] Place the Water Jar near the fire and attack it to douse the flames! The way is now open to Area B.

Take out the Grappler Golem that advances to attack you, as well as the Vulcan Mu that appears near the two **White Barrels** to the left. Jump up and grab the pull switch here to raise a stone to the right. Before heading right, continue to the left to take on a Mimic masquerading as an innocent treasure chest. [36] Once you've claimed its loot as your own, head to the right and jump across the stones. Take down the Fire Elemental here. Then jump up, grab the pull switch, and ride it across until you can drop onto the next floating stone. [37] Hop up onto the ledge and be ready for a Fire Flan and a group of Mini Bombs. Grab the Oil Barrel once the coast is clear. Head down to the planks to reach the blocked doorway and use the barrel to open the portal into an isolated section of Area D.

A not-so-friendly Cockatrice is here to greet you as soon as you enter the area. Knock his feathers off and follow the path up the left-hand side of the room to take on the Bomb and Fire Bat there. [38] Cross the bridge over the lava and take on the Walking Plant on the other side. Once you vanquish this troublesome weed, an Oil Barrel appears near the entrance. Drop down and snatch it off the floating plank. You have to be quick! Once your weight hits the board, it quickly sinks into the lava. Place the barrel in front of the blocked area in the lower right, light it with your Fire magic, and collect the treasure inside! [39]

Collect your spoils from these two Treasure Chests before returning to Area B.

BURIED TREASURE!

Grab the secret loot hidden in front of the Treasure Chests. It'd be a shame to miss out on it.

Jump back up the planks, being careful not to step on them for too long. Clear out the Fire Flan and Mini Bombs here once again and head through the doorway into Area C.

A Grappler Golem moves to attack as soon as you enter Area G. Eliminate it and do the same for the next one, which appears as you approach the center of the room. A Cockatrice to the right of the door is spoiling for a fight as well. Once you've dealt with these foes, an Oil Barrel appears near the center of the room. Pick it up and place it next to the stone blocking the passageway on the right to clear the way. [40]

As soon as the stone is removed, you are met with a rolling lava rock! Do your best to dodge it and make your way up the path past Vulcan Mus and a Walking Plant to reach Area D.

Before you leave this area, grab the **Urn** and the **Water Jar** and take them over to the Blue Plate. Toss the Urn onto the Plate and quickly grab the Water Jar and jump onto the Urn and ride it up. Use the Water Jar to douse the flames on the ledge to reveal a Treasure Chest.

BURIED TREASURE!

Before exiting to Area H, take the buried treasure along the right-hand wall. [39]

Getting through this area requires you to be quick on the draw! Activate the post switch to cause several rock plates to slide out of the left-hand wall. Jump across these to reach the floating tile with a **Treasure Chest**. [40] Collect your loot and wait there. Use another character to activate the post switch again. As soon as it activates, switch to the character by the **Treasure Chest** and use it to jump the rest of the way across before the rock plates slide back into the wall. Watch out for the Fire Bat near the post switch and the Mini Bombs on the far side. [41] Stepping on the red floor switch holds the sliding plates out so your party can run across to you.

Head up the steps and past the Grappler Golem to reach another post switch guarded by a Fire Flan. Once the creature is out of your way, activate the switch and be ready for the plates to slide out, just as they did below. [42] Run across and jump onto the floating tiles. Watch out for the Fire Bat!

Jump from tile to tile to reach the **Treasure Chest** on the topmost one. [43] Jump back down to the first tile, and switch to a character who is still near the post switch. Activate the switch again and quickly switch back to the waiting character. Jump across the sliding rock plates as you did before to reach the far side.

If your trip through Area D depleted your HP and MP, there is a **White Barrel** as soon as you enter Area E. Make your way around the area, defeating the Fire Bats and the Adamantoise. Once you get them all, an Oil Barrel appears in the center. Pick it up and carry it to the blocked exit on the left. Light it up with your Fire magic to open the way to Area F. [44]

Before you leave, use the rising stone to grab the pull switch hovering over one of the lava pools. [45] This causes stepping stones to appear, which you can use to reach the **Treasure Chest** stuck in a nook along the wall. [46] Once you've collected your loot, head on to Area F. If you need to boost your HP and MP, avail yourself of the contents of the **White Barrel** to the right of the door on your way out.

It's possible to buy yourself a bit more time in this little platforming puzzle. Repeatedly hit the post switch until the plates are completely out. This will provide a few more seconds to make it across!

MULTIPLAYER TIP!

MAKE A RUN FOR IT

With help from a friend, it's possible to make it across the puzzle by actively hitting the post switch while another player moves to grab the treasure and makes it to the other side. If you find that you are having trouble, conscript a friend for some quick help.

Watch out for the falling lava rocks and make your way up the path, stopping to beat up the Cockatrice and Fire Bat in your way. Head to the right and jump across the floating plank. A **White Barrel** is there if you need it. Jump across to the tile and onto the red switch. [47] Once you are on the red switch, go to the very edge of it and bring your party to you. Jump up and, when the tile comes down, jump onto it. At least one of your party members should step onto the red switch. If not, you can move them to do so. This raises the tile so that you can reach the pull switch, causing a **Treasure Chest** to appear. [48] Release the switch and jump back onto the ledge to open the chest and claim your **Jewel**.

This room contains three of the fearsome Adamantoise. [50] These heavily armored monsters rely on their tough shells to stave off damage. Take them on one at a time to eliminate them with as little damage to yourself as you can manage. They don't move particularly quickly, so back off when you

need to and keep yourself healed up. This fight can be rough. Don't position yourself between the creatures; you don't want to take damage from more than one at a time. Once you've vanquished them all, the **Crystal Core Fragment** appears.

BURIED TREASURE!

Snag the buried treasure along the right-hand wall before clearing the room!

Proceed to the left, jumping across the chasms, until you reach the red floor switch. [49] It opens the door to Area G. Continue left to reach a **Save Stone**. Once you've saved your game, head back to the red switch and follow the path downward, past Grappler Golems, a Cockatrice, Mini Bombs, and a Walking Plant that all try to stop you. Watch out for the falling lava rocks as you make your way to Area G. There are a couple of **White Barrels** on your way down the path if you need to replenish your HP and MP.

Take the three fragments you found back to Eryll in the forest to learn about your past! Afterwards, speak to Waltrill in the village to obtain the **Key to the Library**. [52] Once you have it, return to town to see if you can find any clues to your next destination in the library.

BOOK LEARNING

Now that you have Waltrill's old key, it's time to find out if it still works. Make your way to the library to see what you can find.

THE LIBRARY

Several Mini Movers come out to attack as you enter the library. Clear them out and head to the right doorway at the back of the room to reach Area B.

AREA B

Move toward the white Book on the floor. As you do, a Goblin Lord appears! Take it out, coming at it from behind and using Charge Attacks when possible to get past its Guard. A post switch appears once you finish it off. [1] Activating the switch lowers a White Orb on the other side of the bookcase. Quickly pick up the Book and toss it onto the Lectern. Use your magic target ring to send the Book's magic to the White Orb. [2] When the Orb breaks, the bookcase slides aside, allowing you to pass.

AREA C

A Lizardman springs out almost immediately! Remember that his spikes hurt, so don't use any stomping attacks. Proceed and take out another scaly Lizardman. Once the area is clear, grab the ladder and push it to the wall. [3] Climb it to the upper level where you'll find a Bolt Golem. Once it is out of the way, continue to the left, dealing with a second one. Remember that, like their brethren, these can explode when they reach low health, so take them down quickly! Activate the switch to start the tile to the right raising and lowering. [4]

Jump down to the lower level to engage the two Needle Turtles. Once you've cleared the way, pick up the white Book and carry it over to the tile that is going up and down. [7] Hop onto the tile while carrying the Book and ride it up to the upper level, leaping off and placing the Book on the upper level. Jump back down and drag the bookcase directly in front of the moving tile, creating a bridge between the upper level and the White Orb floating nearby. [8]

Go to your right and climb the ladder to reach the upper level. Pick up the Book and throw it onto the Lectern. Quickly move over to the top of the bookcase, using your magic target to get the Book's magic to follow you to the White Orb. [9] The magic won't make it over to you unless it crosses the moving tile at the right time, so it can be a bit difficult. If you don't succeed at first, just start the process again. Once you activate the Orb, a Magic Pot appears below. Take it down, capturing the Book you need. Place it on the Lectern to open the way to Area D.

Move into this section of the room, but watch out for the two Skeletons that appear! Grab the purple Book and carry it forward to the Lectern. [3] As you saw during your first visit to the library, this sends a powerful burst of magic to a nearby monster, dealing a solid amount of damage. This is a great help against any foe, but especially against tougher creatures. Once you get rid of the Skeletons, the blocks holding the empty bookshelf in place move. Go to the end of the room and drag this bookcase back, opening up the way to Area C. [4]

BURIED TREASURE!

Before dropping down to move the bookcase, walk across it to reach the bookcase next to it. Use your magic target ring to uncover a hidden cache on the far edge of the bookcase.

AREA D

Two Bolt Golems are here to greet you as you enter Area D. Grab a purple **Book** and place it on the **Lectern** to make this fight a bit easier. [10] Once the Golems are clear, use the purple and white **Books** to deliver destructive magic to the Chimera on the other side of the bookcase. [11] The book magic follows your magic target rings. Chimeras are weak to Holy magic, so have your party cast this as well to put an end to the Chimera. Keep yourself healed up and stay away from the Chimera's magic. Once you defeat the creature, the bookcase slides down, allowing you to access the other side of the room, which holds a **Dungeon Key**. Take full advantage of the loot within the **White Barrels** before moving on.

AREA E

Upon entering Area E, you must deal with a vicious Magic Pot. Once you are finished, grab the **Treasure Chest** in the corner and haul the ladder over on top of the bookcase that has been pushed into the floor. [12] Stand on the bookcase next to the ladder and activate the switch. Drag the ladder off the bookcase once it reaches the upper level. Clear out the Lizardmen who try to stand in your way. When the coast is clear, pull the ladder over to the left-hand ledge and push it off. [13] Jump down to the lower level and take out the Mini Movers that appear. Next, drag the ladder onto the red floor switch to lower a **Lectern**. [14]

Hop over the low bookcase to the left and take on the two Magic Pots here. Once you do, a **Book** appears above. Go back to the ladder and climb up and jump over to the left to reach this part of the upper level. [15] Battle the Lizardman and Needle Turtle guarding the **Book**. Grab it and jump down to the lower level again and place it on the **Lectern**, opening the door to Area F.

AREA F

Take out the Bolt Golems that appear once you begin to move into the area. Once it's clear, pick up the white **Book** and toss it onto the **Lectern**. Quickly move to the left and grab the pull switch here to lower the Orb to the path of the **Book** magic. [16] This causes one of the bookcases to the right to start raising and lowering. Ride the bookcase to the upper level and clear out the Goblin Lords. [17] Watch out for that **Treasure Chest** in the left corner; it is actually a hungry Mimic! Once the area is secure, drop back down, grip the empty bookcase near the entrance, and pull it to the left of the moving bookcase. [18] Ride the bookcase back up and activate the switch to raise the bookcase next to it, carrying the empty bookcase with it.

Grab the empty bookcase and drag it onto the upper level. Take it all the way to the right and drop it. [19] Jump down to take out the Chimera before tackling the Mimic masquerading as the middle **Treasure Chest**. Once you clear out the monsters, loot the other two chests here as well. Pull the bookcase a bit to the right so it sits roughly equidistant from the left and right walls. Go left and back up the moving bookcase. Walk right and use the bookcase you dropped as a bridge to reach the ledge on the right. [20] This leads you to the upper level of Area A.

BURIED TREASURE!

Walk out onto the empty bookcase before you move it. Look for the buried treasure hidden in the doorway arch.

AREA A

Head to the right and drop onto the floor to reach Area B. Watch out for the Mini Movers who try to get in your way! If you want to get back to the upper level after dropping down, there is a tile behind the desk that functions like an elevator.

BURIED TREASURE!

Before dropping to the lobby floor, go all the way to the end of the right-hand ledge to find a buried treasure! [21]

AREA B

Walk back through Area B to reach the **Save Stone** at the end of the room. Approach the locked door to reach Area G and face the boss!

BOSS ENCOUNTER

Librarian

Reading these books is definitely not good for you. This vicious bookcase is ready to eat you alive! The Librarian has a vast array of attacks with which to ruin your day. It may charge directly ahead resulting in a stun for anyone caught in the rush, and it could pounce anywhere around it which knocks back the unfortunate target. The Librarian can throw (which knocks back) anyone standing on its head. It also casts spells like Bio, Slow, and Quake. This is a wild collection of abilities for a simple bookcase, no?

The strategy to employ is to take one of the two he throws at you and place it on the at the northern end of the room. The spell from the purple book will track the Librarian directly, while the one from the white book will follow you or one of your spells. When the spell from the book hits the Librarian, it will be stunned for about 14 seconds. Unleash your most devastating attacks once it's stunned. The Librarian's weak spot is hidden behind the circular shield that breaks after incurring about 190 damage. [22] When the shield is gone, physical damage dealt to the unprotected weak spot is quadrupled! When a spell hits and stuns the monster, take the opportunity to throw everything you've got at the weak spot to really bring the pain! [28] When the Librarian is not stunned, get to its sides since most of its attacks are directed toward its front.

Like the previous battle against Larkeicus, run directly through the spells towards the boss if you are at least three floor tiles away. That sets off the spell and leaves the boss open for at least a few swings. And, as long as you have no status effects on you, you shouldn't get hit with the spell.

Avoid the Librarian's magic, as it damages you and can stun you, leaving you too vulnerable for far too long. Keep a close eye out for its magic target ring. Also, beware of its ability to cast Bio and be ready to use Clear to remove the status ailment quickly. It is extremely important that you keep your health up throughout the fight so you don't find yourself KO'd by a few lucky attacks. Once you defeat the Librarian, collect your Crystal Core fragment. Return it to the forest and speak with Eryll.

A RETURN TO THE RUINS

After you return the Crystal Core fragment to the forest, villagers Ulz and Phelpe tell you all about the other passage in the old ruins where they used to play hide and seek. It sounds like there might be more to this place than you originally thought.

THE RUINS

AREA A

As you did on your first visit to the ruins, bring all of your party together to stand on the large red floor switch. [1] This time, instead of dropping you down a level, activating the switch opens the door at the top of the stairs. Head up the stairs, looting the **Treasure Chests** to the left and right of the doorway on your way, and enter Area B.

INVISIBLE STALKERS I

Speak to the soldier to the left of the red floor switch to learn about a new quest available at the Quest Shoppe! [2]

BURIED TREASURE!

Take advantage of the Selkie's double jump ability to climb onto the tall steps on either side of the doorway. Claim the hidden treasure on each side!

AREA B

When you enter this area, make your way up the steps to deal with the Lizardmen to the left and the Flans on the right. Watch out for the large spiked pendulums that guard the center area. [3] A large red floor switch appears in the center of the room once all four monsters have been eliminated. Once again, bring your party together on the switch to drop into Area C.

BURIED TREASURE!

Don't rush into Area C just yet. Take a moment to grab the hidden loot beneath the pendulum swinging in front of the entrance.

AREA C

Make your way down the stairs and walk all the way across so you can bring out the two Bolt Golems. Deal with them as you would any other monster that's hunting for you. Next, hop down onto the lower level and move toward the left side. Five red floor switches are guarded by a rolling alarm. Wait for the alarm to roll to the left, then run in and step on all the switches.

[4] This causes a **pyramid** to rise in the middle of the switches. Grab it quickly and move to the left. If you trip the alarm, a few monsters arrive to slow you down. The alarm can also cause several Oil Barrels to appear. If this happens, move far away from the switches until the barrels detonate.

AREA D

Defeat the Cockatrice and take the **pyramid** off its socket. Carry it over and stand on the red floor switch. This causes another **socket** to come towards you. Charge up the **pyramid** and drop it into place. [5] Next, go to the left and walk past the gauntlet of spikes. Wait for the spikes to retract into the floor, then quickly move past. Do this for each of the three traps to avoid taking damage.

Once across, you must deal with a Bolt Golem and two Daedaluses. Clear out the area, then grab the **pyramid** and take it down the stairs to the right. Set it down at the base of the steps, leaving your hands free to deal with the Thunder Elementals and Thunder Bombs. There is a **White Barrel** nearby if your HP or MP need replenishing. After you've cleared out the monsters, charge up the **pyramid** and place it on the **socket**, opening the door to Area E. [9]

Before rushing through the door, take the time to loot an out-of-the-way **Treasure Chest**. Walk back up the stairs, turn right, and stand at the edge of the floor. [10] Jump across to the next couple of pillars to reach the **Treasure Chest**. This chest contains a **Scroll**, so it is well worth your efforts. [11] Continue to Area E when you're ready.

Jump up and place the **pyramid** on the upper level. [5] Grab the pull switch at the far left and ride it up. Charge up the pyramid, pick it up, and carry it to the **socket** to the right. [6] This opens the door near the rolling alarm, which leads to Area D.

BURIED TREASURE!

You can find treasure in the most unlikely places! Run your magic target ring over the edge of the area to collect another stash. [7]

AREA E

Though this may simply seem like an area that you can blow through, think again. Pop in to raid the Treasure Chest in the bottom corner before making your way to Area D and continuing to Area F.

AREA F

Make your way around the rolling alarm to reach the **Treasure Chest** on the other side. [12] If you trigger the alarm, you must deal with the Daedaluses that appear. After opening the chest, head down the steps. Watch out for the falling rocks! They can knock you right off the ledge.

BURIED TREASURE

Before making your way down these stairs, run your magic target ring over the pillar to the left to grab some hidden loot! Standing on the pillar while doing this makes it easier to snag the Scratch Card before it falls into the abyss. [13]

Watch out for a Bat that tries to slow your progress at the foot of the stairs. Keep an eye on those falling rocks during the fight. Once you've cleared out the vermin, use the swinging rope to jump onto the upper ledge. [14] Avoid the rolling alarm and grab the **pyramid** in the center before jumping down to your right where a Daedalus is waiting. [15] Set down the pyramid, gather your party, and take the mechanical monstrosity down. Once you score a KO, continue to the right to find a **White Barrel** to replenish any lost HP or MP.

Continue following the path down the stairs, where another Bat gets in your way. Take the **pyramid** to the pull switch and carefully set it on top of the switch. [16] If you accidentally drop it into the chasm, you must retrace your steps and pick it back up on the upper ledge. Once the **pyramid** is in place, ride the pull switch up to the small floating tile. Jump onto it and immediately grab the **pyramid** before it swings out of reach. [17] Place the **pyramid** in the nearby **socket** on the left to open the doorway to Area G.

Before jumping back down, head to the left, vaulting across the pillars here to reach a **White Barrel** and a **Treasure Chest** containing a **Scroll**! [18]

AREA G

AREA H

There is a **White Barrel** to the right as you enter the room if you need to replenish your HP and MP. Make your way left down the steps, avoiding the falling rocks. Bolt Golems appear and try to stop you; remember to take them out before they explode! Head left up the steps to reach a pull switch. [20] Ride it down to the lower level. If you miss grabbing the switch you'll fall to the lower level anyway, but be ready to move. If you don't, you'll land right in the middle of sliding spikes!

BURIED TREASURE!

Don't head down to the lower level right away. Take a minute to reveal the buried treasure in a rather unusual spot. Run your magic target ring up the wall near the pull switch to uncover your prize.

Go to your right and drop onto the sandy floor below. Continue to the right and jump up on the tall ledge by using the tiles. [22] Once you reach the top, head to the top of the stairs and claim the

Scroll in the **Treasure Chest**. [23] Stack the boxes, allowing you to pick them both up at once and carry them to the left, across the floor to the base of the ledge on the other side. [24] The boxes function as a set of steps that lets you reach the upper ledge again.

As you enter the room, an angry Cockatrice and two Thunder Elementals put up a fight. [19] Once you've dealt with them, go to the left side of the room to take on a group of identical monsters. Clear the area and activate the left-hand post switch; hurry to do the same to the right. This raises the block from over the red floor switch near the lower corner of the room. [20] As soon as the second switch is activated, run to the switch that opens the doorway into Area H. Before leaving, loot the **Treasure Chest** in the lowest corner to acquire another **Scroll**!

Before climbing your makeshift stairs, grab the **pyramid** from the center of the floor. [25] Carry it over to the left and onto the ledge. Once up there, avoid the sliding spikes and proceed left up the steps to the **socket**. Charge up the **pyramid** and place it in the **socket** to open the door to Area I. [26] This also causes a **Save Stone** to appear to the left of the doorway. You are about to walk into a tough battle, so save your game!

AREA I

Make your way down the stairs and straight past any monsters that get in your way, then head up the stairs on the far side of the room. Remove the pyramid from the socket to disable all the spike traps. [27] Now you can face the monsters here without worrying about taking extra damage from the spikes!

Head back down the stairs to take on several Floating Eyes and Daedaluses. The monsters come in waves, two or three at a time. [28] Each individual foe is easily manageable, but together they can really wear you down. Keep your health up at all times. If you find yourself in trouble, retreat up the steps and hurriedly heal up or Raise any KO'd party members.

Once you have cleared out the creatures, a Crystal Core fragment appears. Before grabbing it, loot the **Treasure Chests**—one in the center and one to the right. When you are ready to move on, pick up the fragment to find yourself back at the World Map. Return it to Eryll in the forest!

BONUS/AREA

Don't worry about rushing into Area J for now. You can't access it yet, but when you visit the ruins again after returning all the Crystal Core Fragments to Eryll, you gain access to this area!

THE FOREST

Oh no! The forest certainly seems less friendly than when you were last here. The shortcut to the Crystal Core is blocked, and you must find another way in.

AREA A

When you enter the forest, you are faced with a Grappler Golem and a Bolt Golem. Take them down and head to the right of the entrance to reach a **Treasure Chest**. [29] When you approach, three Mini Mines move to attack. Eliminate these miniature threats and loot the chest before moving to the right to open the **Treasure Chest** at the foot of the ramp leading up. [30]

Clear out the Bat at the base of the ramp before proceeding upwards. Make your way up and to the left to reach another **Treasure Chest**. [30] There's a box next to the chest. Pick it up and carry it down the ramp a bit, then place it on top of the rusted switch to open the door below leading to Area B. [31] Before moving on, exterminate the Cloud Bees in the lowest corner of the map for extra experience.

AREA B

Follow the path around to reach the pyramid in the small clearing. [33] Relieve the **Treasure Chest** of its contents before dealing with the Mini Mines that move in to attack. Next, pick up the pyramid and cross the stream to the right.

On the other side, you'll find a Seedspitter and a Bat guarding the socket. Gather your party to you and take out the two monsters. Charge up the pyramid with your Thunder magic and place it on the socket, opening the way to Area C.

AREA C

Beware of the falling rocks! Head into the area, staying clear of the rocks that roll down the two trails in the clearing. [37] Clear the Goblins out of the area to open the way to Area D.

Drop to the right to grab the **Treasure Chest** stashed behind a large tree. [35] Proceed to the right and take on the Goblin that appears in front of the blocked door. Move up the ramp to the left of this door, making your way past the Seedspitter blocking the way. Loot the **Treasure Chests** from both of the branches. [36] Watch out for the spikes guarding the doorway to Area C. Take a moment to watch their movement and dash across them when they retract into the ground to avoid taking damage.

AREA D

Speak to Eryll to return the last fragment of the Crystal Core. She opens the way ahead, granting you access to the rest of the forest. [38] Cross the water to enter Area E.

AREA E

Touch the blocks to open the path. Here, you must deal with vicious Mus and Seedspitters. Once you've cleared the monsters, take advantage of the **Treasure Chest** along the upper wall as well as the one to the left of the entrance. [39] After you've collected your booty, jump into the stream to deal with the three Amenbos that appear. Cross the stream to reach the four red Orbs on the far side. Take out the Seedspitters that appear near the Orbs.

Notice the device in the center of the Orbs. It enables you to split your magic in multiple directions. Target it with your Fire spell to simultaneously shoot fire at all four Orbs. [40] This causes a crystal block to appear near the doorway to Area G. [41] Touch the box to send it into Area G for later use. Go back, past where you activated the red Orbs, to reach Area F.

AREA F

Golems and a few other monsters have overrun this section of the forest. Move around the area, taking out each monster as you come to it so you don't get overwhelmed. Use the Oil Barrels to increase your damage output. A good tactic is to freeze an enemy in place and ignite a nearby barrel. Move your party members away from the barrels before they explode! A crystal block appears once all the creatures have been eliminated. Touch the crystal block to move it into Area G. [42]

Before leaving the area, travel up the ramp to the left of the door to find a **Treasure Chest**. [43] When you jump back down, loot all the chests on the ground floor as well. There are a few stuck in the far corners.

AREA G

When you enter Area G, you'll see the two crystal blocks from Areas E and F. Touch them to lock them into place. [44] Eliminate the Seedspitters that appear near both blocks. Clear out the weeds, loot the **Treasure Chest** in the stream, and squish the Mini Mine that appears. [45]

Grab the device near the doorway to Area E and carry it toward the water. Continue past the crystal blocks, taking out the Grappler Golem that blocks your way. Place the device at the end of the central piece of land, near the moving red Orbs. [46] A Seedspitter pops up, so be ready to take it down quickly. Though they move at different times, the red Orbs all align with the device as they move. Be ready to cast Fire on the device when the Orbs move into range. Once all three Orbs have been activated, a crystal block appears near the edge of the water. [47] Touch it to move it into place with the other two.

Claim the **Dungeon Key** that appears once all three blocks have been moved into place. [48] It fits the locked door in the upper right of this area, where you can now find a **Save Stone**. For extra experience, take out the Bat and the Cloud Bees in the far left corner before using the key on the door.

BOSS ENCOUNTER

Berserk Guardian

When you enter Area H, you'll see the Berserk Guardian

pounding its fists against the gate. This can't be good! While this is the same Guardian you faced before, it is now stronger, tougher, and a whole lot angrier. The Berserk Guardian takes advantage of a variety of damaging attacks that can pound you into the dirt. Its single and double fist pound can stun, just like its whirlwind fist attack. However, the combo punch with the double fist pound can knock assailants down, and when it smashes its fists together it creates an explosion which stuns those standing on top of it. [49] If you back away out of melee range, which seems like a good idea, it can blast you with a light beam or a ring of light, the latter of which can stun. Again, if you were crazy enough to jump on its head and stand atop this beast, the Berserk Guardian can do a flip kick which knocks you off and stuns you.

When the Berserk Guardian unleashes its single fist attack, it's vulnerable to attack for about four seconds. Take advantage of this short period of weakness to jump onto its head and attack the helmet. After dealing about 150 points of damage, it breaks and reveals the Berserk Guardian's weak spot. [50] With the helmet removed, physical attacks inflict five times the amount of damage to the Guardian! That's no small increase. Also, after enough damage to its head, the Berserk Guardian will falter and drop to one knee, leaving it open to damage for approximately nine seconds. Dish out the damage and do what you can to bring this monster down. [51]

This can be an extremely difficult fight due to the multiple radial attacks (whirlwind, fist smash, and ring of light). Even though the Berserk Guardian doesn't move quickly, its long-range attacks are just as devastating as its crushing melee blows. Stay just outside of its reach without backing too far away to incite this giant into committing to its single fist pound. As it strikes, dodge and jump in to do as much damage to its helmet as possible. By using this stick and move tactic, and with some luck, you should be able to wear it down without taking a bit of damage. However, if you are taking damage during the battle, watch your health at all times and utilize your party members to heal themselves and each other. The Guardian doesn't move that quickly, so if you need to speedily back off and heal, you can—just watch out for the light beam. Alternate attacking and healing, and your patience will soon be rewarded.

After the battle, you meet up with Sherlotta, who shares some interesting revelations with you. Speak to everyone in the village before speaking with Sherlotta again to continue your journey.

LIFTING THE CURSE

After everything you've discovered, you must find a way to get to the mysterious tower. Talk to the people in town to learn the location of the graveyard, where you may just find the artifact you need. The curse they mention can't possibly be that bad, can it?

THE GRAVEYARD

The graveyard is your first introduction to dark foes. These monsters appear as shadows of themselves marked with glowing red Orbs in the center. [1] In this form, they take great reduced damage, so the first thing you'll want to do when you encounter one is to pop it out of this form. Use any of your Recovery-type spells (Cure, Raise, or Clear) to do this. Once you successfully cast the spell on them, the dark foes function like their normal counterparts and can be damaged accordingly.

Climb the first set of stairs to encounter a Dark Skeleton. Clear it out and locate a device like those you used in the forest—it's surrounded by a poisonous cloud! [2] Use Clear magic to cleanse the poison, freeing the device for your use.

Take the stairs up and loot the **Treasure Chest** hidden behind the tree in the corner. [6] Continue up the stairs until you see another device. Here, you encounter two **Onion Heads**! Whack these weeds and watch out for the **Dark Bat** that appears, flying to the right of this platform. Leave the device there for now and clear out the vermin; make use of the **White Barrel** and open the

Treasure Chest up the next small set of stairs. [7] As you approach the chest, a **Dark Cockatrice** appears. Use your **Recovery** magic on it, as you have against the other dark foes, and take it down. There is a **White Barrel** to your right as well.

Continue up the last set of stairs, ignoring the **Blue Orb** for now. At the top, you face a pair of **Dark Elementals**! These vicious creatures are even more dangerous than their counterparts. Like other **Elementals**, they are highly resistant to physical damage. Stack **Raise** and **Cure** on them to blast them with **Holy** magic, which inflicts a great deal of damage on these dark beasts. Then, head to the right to reach **Area C**.

Head to the right to liberate the goodies from the **Treasure Chest**. [4] Make your way up the stairs, eliminating the **Onion Head** and **Seedspitter** who try to get their leafy hands on you. Grab the device and bring it with you. At the top of the stairs, you encounter a few more **Dark Skeletons**. Take out the one just at the top of the stairs before moving on to the flat area, so that you can face one at a time. These bony bad guys can poison you, so be sure to use **Clear** right away if you become afflicted with this status ailment. There is a **White Barrel** here if you need to refuel after the battle.

Notice the red floor switch at the edge of this walkway. Stepping on it lowers a candlestick nearby. Place the device on the button and use your **Fire** magic on it to hit the candlestick, which opens the door to **Area B**. [5]

AREA C

Proceed to the right and down the stairs to encounter a pair of Dark Bats. Decimate them and find the two nearby **Treasure Chests** for you to empty. [8] Return to the entrance and take the small set of stairs down. Walk all the way down to the first block, eliminating the Seedspitter in your path.

There are three red floor switches that you must press in order to open the upper way into Area B. Grab the moveable block in the middle and drag it straight left across the track before positioning it on the switch. [9] Next, push the first block onto the switch at the end of its track. [10] Activating these two switches lowers the tiles that bar the way for the last block. Get the third and final block and drag it through

the tracks. [11] Bring it to the other end of the area and drop it onto the red floor switch, which is covered by water. [12] An Urn appears on the right-hand side of the area.

AREA D

Head to the left, taking out the Seedspitter and the Dark Bats in your way. A **White Barrel** and a **Treasure Chest** are there to reward your efforts. [14] Clear the area, pick up the box in the upper corner, and move down the stairs. Eliminate the Onion Head and Dark Bat in your way.

Pick up the Urn and drop it onto the **Blue Plate** near the entrance. Immediately jump on top of the Urn and ride it up to jump to the upper entrance to Area B. [13] Cross back into Area B and hit the switch. Drop down and run across the area with the Blue Orbs, avoiding (or fighting) the Dark Elementals, to reach Area D.

Clear the poison from the device and touch the crystal blocks to make them retract into the floor. [15] Carry the device up a level and set it on the tile at the edge. Once it is in place, go back down, get the box, and place it on the red floor switch in the alcove (the one revealed when you touched the crystal blocks). [16] This raises the tile with the device. Take the Urn and place it in front of this tile on the red floor switch to act as a step. Jump onto the tile with the device and cast Fire on it to ignite the candlesticks, opening the upper doorway to Area B. [17] Pick up the Urn and place it on the **Blue Plate**. Ride it up as you did in Area C to reach the upper doorway of Area B.

MULTIPLAYER TIP!

MULTIPLAYER TIP

This is a great place for some multiplayer fun. One player can sometimes like to get in the way when you are moving the box onto the red floor switch. If you've got a friend to help you out, maneuver everything into place.

BURIED TREASURE!

Before going up to Area B, be sure to grab the buried treasure located in the back corner. [18]

AREA B

Flip the switch to drop the third and last Blue Orb. Jump down and take out the Dark Elementals. Remember that Holy magic works wonders against these monsters. Go down the stairs past the foes that try to stop you, and take the device. Bring it up and place it on the pedestal between the Blue Orbs. [19] Use Blizzard to activate all three Orbs simultaneously; this opens the door to Area E, located directly behind the device.

AREA E

The air in this area is poisonous! Immediately pick up the Urn and place it on the **Purple Plate**. [20] This gives you protection from the poison for a short time. Take out the Bolt Golem that appears nearby. Pick up the Urn and carry it with you. Set it down near the water and use Thunder magic on the Orb in the center of the pool. [21] There is a Dark Sahagin lurking in the water, so you'll need to take care of it as well.

When you activate the Orb, a post switch appears on the left side of the water. Before activating it, carry the Urn over towards the doorway to Area F and set it down next to one of the covered floor switches. Eliminate the Cloud Bees and the Bolt Golem on this side of the room, then open the **Treasure Chest** here as well. [22]

Poison Protection

If at any time the Urn's poison protection runs out, return it to the Purple Plate to recharge, then pick it up and carry on.

Head back to the pool and activate the post switch which exposes the red floor switches. Quickly head out of the pool as soon as it activates. Grab the Urn and place it on one of the exposed floor switches. Swiftly step on the other one to open the door to Area F. [23]

AREA F

Take down the Cloud Bees that come at you almost as soon as you enter. Remember to Clear the poison if you get stung, and be ready for the Onion Head here as well. That isn't a **Treasure Chest** you see hidden in the alcove on the left but rather a lurking Mimic, waiting to pounce on unsuspecting adventurers! Take it out to claim its treasure for yourself. [25]

Grab the coffin closest to the far wall and drag it all the way to the right. [26] Push it onto the large tile and stand next to it, then hit the switch. [27] Push the coffin off the tile and deal with the two Dark Elementals that appear. Plunder the **Treasure Chest** on the left. Once the way is clear, drag the coffin over to the chasm in the middle of the room and push it into the hole. [28] There is only one spot where it fits, so place it correctly.

Before moving on, unearth the stash in the corner of the room! [24]

Cross over the coffin and deal with the Bolt Golem and Seedspitter. Crush these nefarious creatures, then grab the coffin and drag it across the coffin you previously placed over the chasm. [29]

Continue pushing it to the far right until it fits into the hole in the rock. [30] Now, drag the moveable block across this coffin and the chasm to the rusted floor switch in the depression near the door. [31] This opens the way to Area G.

BURIED TREASURE!

While digging in a graveyard might not always be the best idea, this time it pays off! Grab the buried treasure near the crack in the floor before continuing to Area G.

AREA G

When you enter the area, you have to contend with two Dark Sahagins. Use your Recovery magic to pop them out of the shadows as quickly as possible and let them have it. Stomping attacks work well against these slimy fiends. Move to the right of the entrance to take out the swarm of Cloud Bees. Be sure to get their hive as well! Once you've eliminated the monsters, grab the nearby coffin and drag it all the way to the left, past the **Key Pedestal**. [32]

Hop over to the other side, drag the first coffin to this same area, and drop it into the hole. [33] Next, get the coffin on the right that you moved nearby. Push it over until it fits in the center slot and activates the red floor switch in the depression. [34] This moves the tile out of the way. Finally, drag the remaining coffin from the back of the area up with the rest. Move it into position on top of the center coffin and push until it is sticking far out into the water—almost to the point where it looks like it might topple in. [35] Climb on top and use Clear magic to free the **Keystone** from its poisonous prison. If the **Keystone** drops into the water, the coffin isn't pushed out far enough. Move it a bit more and try again. Once you've got the **Keystone**, place it in the **Key Pedestal** to the right to open the door to Area H.

AREA H

This area is filled with poison! As soon as you enter, head straight for the first coffin. Grab it and pull it slightly towards the crypt, giving you space to get around it and push from the other side. Shove it completely into the crypt. [36] Grab the adjacent moveable block and pull it out and to the right; place it on the rusted floor switch. [37]

This causes a **Purple Plate** to appear beneath the Urn, giving you some protection from the poison. Don't be shy about bringing the Urn back here to recharge as you move through this area. The poison damage is too great to soak up for a long time. Quickly heal yourself, then open the **Treasure Chest** to find Ether and a Potion.

Pick up the Urn and carry it over near the next moveable block. Scoot the block back as far as possible, then grab the nearest coffin and push it back into its crypt. [38] Take hold of the coffin to its right and pull it all the way out to the crack in the floor. Push it to the left and into

the crack until it forms a makeshift bridge. [39] While you are moving coffins around, your party can sometimes get in your way. If this happens, just gather them behind you to clear your path.

Cross your new bridge with the Urn to take on the two Dark Cockatrices here. Once the area is clear, drag the moveable block from the other side across the coffin. Grab the Urn, remembering to recharge it if needed, and place it on the tile next to the switch. [40] Place the block on top of the Urn and activate the switch to raise the tile. You can now drag the block over to the rusted floor switch nearby. [41] When you jump up to the next area, there are two Dark Skeletons waiting. Move the Urn to give you protection from the poison, and take on these foes. The **Treasure Chest** nearby contains recovery items to help you out. Step on the red floor switch to open the doorway to Area I.

BURIED TREASURE!

Grab the secret stashes from behind the first coffin you moved from deep within the chasm dividing the area. You won't be sorry!

Make your way down the stairs to the moveable block. Drag it to about the halfway point of the post switch track and push it to the edge of the water where it is not blocking the track, but does not fall in the pool. [42] Activate the post switch and jump into the pool. When the water drains, pull the coffin out of the crypt before pushing it to the right. [43] Take a moment to loot the **Treasure Chest** in the right-hand corner of the pool to find a **Jewel**. When you activate the post switch, two Dark Elementals and a Dark Skeleton appear near the switch. Take them down while waiting for the pool to refill.

When the water comes back up, push the coffin farther to the right. Once again, use the post switch to drain the water and move the coffin underneath the block that is hanging over the water's edge. [44] When the water comes back, the coffin bobs to the surface underneath the block, and you can push the moveable block out onto it. Once the block is on the coffin, drain the water again, drop down, and pull the coffin away from the wall so it sits beneath the device floating overhead. Push the block to the end of the coffin. When the water fills back up, stand on the block to use Clear on the device, dropping it onto the block. [45]

Next, use Fire on the device to ignite the candlesticks. If the device is not in the correct spot, you can move the block or the coffin to get the perfect placement. Don't worry: if you drop the block or the device in the water, they reappear in their original spots. Once you light the candles, three Bolt Golems appear, along with a **Dungeon Key** next to the post switch. Take them out quickly before they can explode, and claim your prize! Head back up the steps to reach the locked door to Area J.

BOSS ENCOUNTER

Celeb

This cranky curse has been causing trouble in the graveyard for far too long! She begins the battle in shadows like the other dark foes you've faced in the graveyard. [46] Use your Recovery spells to snap her out. This is a challenging battle, so keep a close eye on your HP at all times.

Celeb has quite a few tricks at her disposal, including a poison attack that she uses quite often. Immediately Clear this when you become afflicted, and keep a close eye on your teammates as well. She uses her scythe to full effect. The scythe swing stuns those hit by it and when you stand on her, Celeb twists her scythe to remove you. She also can lift and hold an unfortunate victim rendering them unable to act while Doom is being cast on them. [47] This status ailment places a counter on a character that counts down from ten. Once it reaches zero, the character is automatically KO'd. The only way to avoid this is to Clear the status ailment. Do so as soon as you see this happen to a character, because you'll be casting Raise if you aren't quick enough. However, if you hit the attack and jump buttons, you will break out of the hold sooner and could possibly save yourself some major trouble.

This boss is not without her weaknesses. When Celeb charges, leaving a trail of evil flame in her wake, she can sometimes knock herself silly and become vulnerable to attack. Keep an eye out for this and take full advantage of this brief faux pas. Celeb makes up for this by being able to cast Doom, Bio, Fire, Blizzard, Lightning (which locks attack and magic), and a Charm spell.

This battle is extraordinarily HP- and MP-intensive, and you won't last long without being able to replenish your stores. Luckily, every so often Celeb summons a Black Diamond. Each Black Diamond casts Blizzard, Fire, and Lightning, damaging you and applying a troublesome effect (like freezing you in place). Together, two can cast even more powerful spells! However, when you take them out, they yield a Potion and Ether, allowing you to refill your HP and MP. Destroy these as soon as you see them to avoid the extra damage they cause. [48]

Just like the other bosses you have faced, Celeb has a vulnerable area. Hers is the diamond just behind her head. [49] Use Jump attacks to reach it and when you manage to knock her to the ground, take full advantage of her prone position to deliver the pain to this weak spot. [50] Thankfully, the best strategy is based on the fact that Celeb is the clumsiest boss ever! She will literally run into walls without any coaxing. Once Celeb hits that wall, she will come out of the shadows (without needing to cast a spell) and be stunned for approximately 15 seconds. You can cross the field and still be able to get in a few good attacks to Celeb's weak spot before she recovers. To do this, stay as far away from her as possible while you run around the outer edge of the room. Celeb eventually loses patience and charges at you from a distance and runs directly into the wall about 80% of the time! 20% of the time she'll hit you, but a Cure should negate the damage incurred.

Running around the edge of the room allows you to avoid all the physical attacks and spells cast by Celeb or the Black Diamond, and lets you conserve your MP from wasted spells that bring Celeb out of the shadows. The only spells you should worry about are those from the Black Diamond while you're stomping on Celeb's weak spot. Using this strategy and assuming that you'll get a bit o' luck, you may not take any damage at all during the entire battle. Soon Celeb will fall to your incredible skills and you'll be one step closer to unlocking the mystery surrounding the crystals.

A CLUE

Celeb has been defeated, but you still need an additional part to make the device work. Celeb seems certain that the part you need is located deep within a mine, but she doesn't know where to find this mystery mine! Head back to the library to see if you can find the information there.

As you enter the lobby, you are faced with two pairs of Dark Elementals. Avoid their magic target rings and be quick to use Holy magic to take them out. A secret passageway opens up behind the desk once you have eliminated all four. [1] Head through it to reach Area B.

BONUS BOSSES

After eliminating the four Dark Elementals, a portal opens in the floor of this area. Gather your party into it to access bonus boss battles. For more information on the various bosses, see the **Extras** section of this guide.

When you first enter this area, you are faced with a Magic Golem. This Golem is tougher than the usual ones you have faced, so make sure your whole party gangs up on it to take the creep down quickly before it explodes. Head up the ramp and take on the Magic Pot that tries to impede your progress. You encounter a Prickly Tortoise at the top of the ramp. Use your magic and Charge attacks to quickly get past its Guard. [2] Once you put it down, the passageway to Area C opens. Loot the Treasure Chest before moving on.

As you enter this area, another Prickly Tortoise rolls in to attack. Take it out and get ready for a tough battle before moving forward. Two Magic Golems and a Magic Pot attack at the same time! [3] Concentrate your attacks on the Magic Pot to eliminate it as your first priority. Next, attack the Golems. It's a good idea to use Blizzard on them to give you the chance to finish them off before they can explode.

A group of Elementals appears once you finish off these three monsters. Begin casting the appropriate magic to take them out as soon as you see them. The Dark Elemental in particular can inflict heavy damage, so be quick with your casting. [4] Once you've finished with the Elements, you are ready to move back into Area B.

Upon entering this section of Area B, you'll see a **White Barrel**—a welcome sight after the battle you just survived! Take down the Magic Golems blocking your path. Once you do, the bookcase slides aside providing access to both Area D and the other side of Area B that you previously visited. [5]

AREA D

When you enter this area, two Prickly Tortoises are there to greet you. Clear them out, pick up the white **Book**, and toss it on the **Lectern**. Quickly jump up on the sliding White Orb stand so that the **Book's** magic activates the Orb, which starts lowering and raising the center bookcase. [6]

If you don't want to bother with using the white Books, you can just use Holy magic to activate the White Orbs.

BURIED TREASURE!

Check between the bookcases to score a secret stash of buried treasure.

Ride the bookcase up and get ready for a tough fight, as you are immediately faced with two Magic Golems! Eliminating this threat reveals a Chimera on the left. [8] Blast this monster with Holy magic and keep an eye on your HP. Once it falls, you must activate the White Orbs: one on this side of the bookcase and the other on the opposite side. Walk to the right on the ledge and pick up the white **Book**. [9] Carry it to the left and place it near, but not on, the **Lectern**. Grab the other white **Book** nearby and throw it on the **Lectern**. Quickly move to the White Orb and use your magic target ring to guide the book's magic to the Orb. [10] As soon as the Orb activates, get the other **Book** and toss it on the **Lectern**. Use your magic target ring to guide the **Book's** magic to the White Orb on the other side of the

bookcase. [11] Be careful! If you are too close to the edge of the bookcase, it is difficult to get the target ring placed correctly. You've only got a few seconds before the first Orb reappears, forcing you to start the process all over. Once both Orbs have been activated, the bookcase slides back and you can access Area E.

AREA E

Make sure you're ready for a fight before moving on. Two vicious little Magic Pots and a Magic Golem are waiting to ambush you ahead. Once you've dealt with the creatures, pick up the **Book** and place it on the **Lectern**. Quickly guide the **Book's** magic with your magic target ring all the way to the White Orb. [12] This opens the blocks guarding the way to Area F, though the door is still closed.

Three Elementals appear as soon as you activate the Orb: Fire, Thunder, and Ice. Quickly use your magic to take them out. Defeating them causes a brown **Book** to appear. Pick it up and place it on the **Lectern** to open the door. [13]

AREA F

This small room contains two Chimeras and a Dark Elemental that eagerly attack as soon as you set foot in their territory. [14] Cast Holy magic to take out the Dark Elemental first. Concentrate your

attacks on one Chimera at a time to eliminate it as soon as possible. Though the room is small, use what room there is to avoid the enemy's magic and keep your HP up. These beasts can plunge you into Darkness, so quickly cast Clear if that happens. Hammer the Chimeras with Holy magic until they give in.

A bookcase containing a distinctive **Book** is at the back of the room. Read it to find the information you need and to return to the library doorway. [15] If you aren't equipped to deal with the Chimeras, or just don't want to, you can get the **Book** at any time.

BURIED TREASURE

The book found in the library contained the location of the mine where Celeb says you can find the piece you need to activate the gate. Head south of town to reach the mine entrance, but beware—some unsavory creatures have made the mine their home.

Enter the mine, but be careful. A Cockatrice and a Prickly Tortoise are waiting once you make your way down the steps towards the sign. Eliminate them and step onto the platform with the Red Orbs. This is a transportation device devised by the ancients. [1] To use it, cast Fire on any of the four Orbs to go in that direction. Don't run completely out of MP during your time in the mine; you can't move the platform unless you can cast Fire magic. When you move out into the water, a Sahagin appears! Head to the nearby ledge with the **Treasure Chest**. [2] Loot the chest, then move the platform all the way to the right and up. You'll encounter a Bat and another Sahagin on your way. Once they're destroyed, the doorway opens up to Area B.

A Prickly Tortoise tries to stop you at the entrance, but you are more than a match for this lone monster. Remember, Charge Attacks work well against its Guard. Not content to let the Prickly Tortoise have all the fun, an Icarus Mu soon joins the battle. Like their weaker cousins, you can pick these critters up and slam them against the wall, forcing them to occasionally drop extra items.

There is a **White Barrel** next to the entrance if you need to replenish your stores after the battle. Notice the large rock next to the sign. [3] It is blocking the way back into the lower portion of Area A. You are going to use the large falling boulders in the area to smash the way open, but to do that, you need to direct their path.

Take out the Magic Golem that appears and go up the ramp to open the **Treasure Chest**. [4] This is directly in the path of the falling boulders, so move up quickly and stand next to the chest when opening it. Move to the right of this ramp and around the wall to locate an Urn and a pull switch.

Eliminate the Cockatrice and pick up the Urn, then set it directly beneath the pull switch. [5] Stand on top of it. This makes it much easier for you to jump up and reach the switch that causes the nearby wall to slide into the floor. It also provides the falling boulders a new path to follow.

BURIED TREASURE!

Before moving on, run your magic target ring over the area next to the Urn's original location to unearth a buried treasure! [6]

Grab the Urn, continue down the ramp and around, and set the Urn on top of the **Blue Plate**. [7] Quickly jump on top of it to reach the pull switch above. This lowers the last wall, directing the falling boulders to smash into the rock blocking the exit. Knock out the Magic Golem that appears nearby before heading into Area A.

AREA A

Removing that block has lowered the water level in Area A, allowing access to the shelf on the far left side of the room. There is a **Treasure Chest** straight across from the entrance just waiting for you to collect its contents. [8] Once you have cleaned

it out, use the platform to make your way to the left side of the room, eliminating the Bat along your way. A Sahagin attacks as soon as you reach the ledge at the far left! [9] On its own, it shouldn't prove too difficult for your party. Remember that Stomping Attacks work well against this slimy foe. Grab the moveable block and drag it out of the niche in the wall, providing access to the **Keystone** inside. [10] Carry it onto the platform and move the vehicle to the right to reach the **Key Pedestal** guarding the doorway to Area C. Once you've dealt with the Sahagin guarding it, place the **Keystone** in the stand to proceed, but heal your party fully before continuing. [11]

To World Map

AREA C

This whole area is highly poisonous! Grab the **Urn** near the entrance and immediately place it on the **Purple Plate**. [12] This poison is much worse than anything you've seen before, and the protection won't last long.

Grab the charged **Urn** and get on the platform. This moves in much the same way as the vehicle you last used; however, instead of using magic to steer, you step on the red floor switches. Take the platform to the upper right until you reach the ledge containing a candlestick. You must take out the intervening **Dark Elemental** before you can light it. These guys are pretty nasty; quickly blast it with a Holy spell to KO it. [13] Hop onto the ledge and quickly light the candlestick using Fire magic.

Your poison protection is likely failing by now. Quickly jump back onto the platform and move it to the pillar in the center of the room. Place the **Urn** on the **Purple Plate** here to recharge it. [14] There is also a **White Barrel** here, so feel free to replenish your stores.

Take the **Urn** back onto the platform and move to the ledge on the left. Light the candlestick which opens the doorway to Area D. [15] Use the platform to move up to the door and into the next area.

AREA D

A **White Barrel** rests near the entrance to refill your HP and MP after making it through the poison in the last area. Jump onto the platform and exterminate the Bat that flies in to attack. Use your Fire magic to move the platform to the lower wall. Take on the Sahagin and another Bat that emerge to harass you. Wait for the pull switch to float by overhead and jump up, grabbing it. [16] This opens the gate to Area E. Move the platform over to the doorway to battle the **Magic Golem** that is guarding the passage. Take advantage of the **White Barrel** before heading in.

AREA E

Walk towards the switch and take down the Cockatrice that appears. Flip the switch to lower the tile, letting you jump up onto the upper level. [17] Jump onto this level and head left to loot the **Treasure Chest** there. [18] Locate the Chimera lurking on the far side of the room. Use your Holy magic to blast it from long-range to minimize the damage it can inflict. Once it is out of the picture, use your Thunder magic on the **Yellow Orb** that appears. [19] This causes it to levitate out of the way, allowing you to push the moveable block onto the rusted switch near the door. [20] You can now access Area F.

BURIED TREASURE!

Before moving on, be sure to dig up the loot in the far corner of the room, to the left of the doorway. [21]

AREA C

Walk straight ahead and activate the post switch. As soon as you do, the first set of spikes to the left retracts into the ground. [22] Move left, avoiding the remaining spikes until you reach the moving tile on the far left. [23] Ride it up to the next level and run to the right, being careful to avoid the spike traps. Don't run through here with low HP, just in case. Jump over the last set of three sliding spikes and onto another tile that is moving up and down. Ride it up to the tile with the Yellow Orb. [24]

AREA E

As soon as you enter, an Ahriman appears! Use Gravity to bring it down to your level and beat it down. The Ahriman can inflict hefty damage by casting Fire and Blizzard magic, so watch out for its magic target rings and get out of the way, even if you need to interrupt your own casting to do it. Attack it mainly from the side and back to avoid its powerful eyebeam as well, which hits everyone in front of it. [27] Circle around the monster and keep your HP up. Wear it down and claim the Oil Barrel it was carrying. Take the barrel over to the stone to the left of the doorway. [28] Ignite it with Fire and stand back! The explosion reveals a **Treasure Chest**!

Once here, use Thunder magic to activate the Orb, which starts it moving up and down. Ride it all the way down and activate the post switch again. Quickly jump back on the tile that held the Yellow Orb and ride it all the way up to the top. Head to the left until you see a group of four tiles sliding in and out of the wall. [25] Jump across to the ledge on the far side, watching the timing of the tiles so that you can safely move across. Using a Selkie with Double-Jump is helpful here, but not strictly necessary. The tiles' movement is activated by the post switch as well, so you've only got a few seconds to make it across. If you don't succeed on your first attempt, ride the tile back down and reactivate the post switch.

A horde of Mini Mines attacks once you reach the far ledge! [26] When you eliminate them all, a **Keystone** appears. Use it on the **Key Pedestal** next to the door to unlock the gate leading to the upper ledge of Area E.

MULTIPLAYER TIP!

EVERYTHING IS EASIER WHEN YOU BRING A FRIEND!

This room is an excellent place to have some multiplayer help. It's a lot easier to make it across the sliding tiles if you have someone below to keep triggering the post switch, giving you all the time you need.

BURIED TREASURE!

After activating the post switch, grab the buried treasure beneath the tile past the spike traps on the lowest level.

After claiming your prize, head all the way to the right and stand on the tile to reach the middle level. Once here, use your Thunder magic on the Yellow Orb. [29] This causes the tile to rise, clearing the way for you to drag the moveable block into position, though it takes a few steps. Grab the block and push it all the way down, dropping it onto the large tile. [30] Jump down and activate the switch, raising the tile. Use the other tile to the right, which travels up and down, to get back up to the middle area. Grab the block and drag it to the far left and onto the rusted floor switch, opening the doorway to Area D. [31] If the Chimera at the back of the room gives you any trouble, or if you just want the extra experience, take it out just like you did on your first visit to this room before moving on.

AREA D

When you enter the area, step on the red floor switch to trigger a falling boulder. It rolls down the ramp in front of you and smashes the rock at the bottom! [32]

Swim through the area opened up by the boulder and jump onto the platform vehicle. Drive it to the ledge with the box. [34] When you approach, a Magic Golem appears. Jump onto the ledge and take him down. Grab the box and place it on your platform. Next, steer the vehicle over to the ledge on the left with the doorway and red floor switch. [35]

An Ahriman attacks as you approach! As before, watch out for its eye beam as well as its stunning spin attack. Once it is out of commission, place the box on the red switch. This causes a pull switch to appear over the water to the right. Return to the platform and hop on, moving it if necessary. Grab the switch that opens the door to Area G. [36]

BURIED TREASURE!

Sometimes you can find good stuff in the most unlikely of places. Head halfway down the ramp and dig up the treasure buried there. [33]

AREA G

If you need to refuel, use the **White Barrel** nearby. Use Blizzard to charge up the Ice Pot here and carry it to the small pool. [37] Wait until the sliding tile floats all the way to the right, then toss the pot into the water. Now that the pool is frozen, slide the moveable block across the ice onto the rusted floor switch, which sets the nearby tile to moving vertically. [38] Take out the Cockatrice here before heading back across the ice and grabbing the .

Carry the Fire Pot to the moving tile and head up to the upper level of this room. Ignite the Fire Pot and throw it onto the small pool of ice, freeing a third Yellow Orb to join the two already there. [39] Go over to the rope and pulley and clear out the Magic Golems in the way. Ride the rope and pulley about halfway down and jump onto the small tile on the wall. [40]

AREA H

Walk straight ahead from the entrance to locate a **Treasure Chest**. [44] Once you have collected your loot, follow the path all the way down, watching out for falling boulders. When you pass the first pool, get ready for an attacking pair of Icarus Mus. After clearing them out, continue down the path until you reach the box near the bottom. [45] Pick up the box and toss it onto one of the red floor switches to save yourself time later. Make your way back up the ramp until you reach the first pool. Stand on the red floor switch to cover the pool and wait for a boulder to roll over it. [46] As soon as the boulder crosses, jump straight down to the second pool with the two switches. Since you've already placed the box on one of the switches, stand on the other switch before the boulder makes it there. [47] You are racing the boulder and a split second can make all the difference. Your work directs the boulder to smash into the stone at the bottom of the ramp, granting access to Area D.

Switch to another character and have them ride the rope all the way down to the end near the entrance. Activate the post switch and revert to the character on the small tile. The post switch causes the tile you are now on to slide over, and another one to drop down beside it, next to the wall. Walk onto this other tile and wait. [41] Once the post switch makes it all the way back down its track to the starting position, the tile you are standing on rises to be adjacent to a ledge. Jump onto the ledge to loot the **Treasure Chest** and take the device. [42]

There's a red floor switch located at the right-hand side of this ledge. Pick up the device and step on the switch to ride the tile back down to the lower level. Carry the device back up to the waiting Yellow Orbs. Place it in the center and use your Thunder magic on the device to activate all three Orbs at once, opening the way to Area H. [43]

AREA D

You've got a healthy-sized group of monsters to contend with in this small space! First, take on the Magic Golem that appears near the entrance. Don't let it explode, as you can ill afford the damage in the ongoing battle. Continue the fight by taking down the Chimera near the water. [48] Remember to use Holy magic to end the fight as quickly as possible. Next, clear out the two Amenbos and the Ahriman in the water. The Amenbos can dish out some damage with their magic, but the Ahriman is the true threat, so watch out for its vicious attacks. A dose of Gravity will knock it down, and then you can eliminate all three monsters. Once you've taken care of all the creepy creatures, the doorway to Area I opens. Loot the **Treasure Chest** across from the entrance before leaving. [49]

AREA I

There is a **White Barrel** directly inside the entrance to help you replenish your HP and MP after the battle you just survived. Using the platform, make your way around the room lighting the four candles, one on each ledge. [50] As you travel around, look out for the fire circles that appear over the water. [51] These damage and knock down anyone they hit; do your best to avoid them. An **Urn** will appear once the candles are lit. [52]

Pick it up and place it on the **Blue Plate** to ride to an upper ledge containing an Fire Pot. Bring the pot back down with you. Ignite it and toss it onto the ice to free the tile with the **Blue Plate**. [53] Now that the tile can move all the way to the right, use the **Urn** to ride it up to the right side. This is a bit trickier because the tile with the **Blue Plate** continues to slide back and forth. Time the rise of the **Urn** just right to get in range to jump onto this ledge. Step on the red floor switch to activate a tile next to you that moves up and down. [54]

Jump down and grab the **Urn**, then get back on the platform and steer it to the center pillar. Place it on the **Blue Plate** here and immediately jump on it and ride it up to reach a pull switch. [55]

The **Urn** has just enough power to get you in range of the switch, so be ready to jump! Activating the switch drops a **Keystone**. Pick up the **Keystone** and carry it back over to the vertically moving tile to reach the **Key Pedestal**. Insert the **Keystone** to open the way to Area C.

AREA C

This area is just as poisonous as it was before! Grab the **Dungeon Key** and step on the red floor switch to activate a moving tile that takes you to the ground level. [56]

BURIED TREASURE!

Before heading down, quickly run your magic target ring around the left-hand corner to find a buried treasure! [57]

Toss the **Urn** on the **Purple Plate** to gain some protection from the poison, even if it is short-lived. You won't be fighting here, so as long as one of you makes it through, you'll remain in good shape. Grab the **Urn** and jump onto the platform. Steer it to the upper left platform to enter Area D.

AREA D

There is a **White Barrel** as you enter the area that is a welcome relief after crossing the poisonous Area C. Heal your party, then hop down to the left and step on the red floor switch. [58] This causes three crystal blocks to appear at the bottom of the water. Jump into the water and clear out the Mini Mines and Amenbos infesting the pool. Once you are finished, dive down and touch each of the three crystal blocks to make them rise to the surface. Jump on the block on the right to reach the **Treasure Chest** in the small alcove. [59]

Use the two other crystal blocks to access the locked door by first jumping onto the middle block and then onto the left one. From here it is just a short hop to the door. A **Save Stone** appears when it's unlocked. Save your game before moving on.

BOSS ENCOUNTER

This slimy frog has the staff you need, and it isn't giving it up without a fight! However, Hecteyes only has a few attacks. Its nose job and stunning double swipe are the only direct melee attacks and it only uses them while in the water. It also has a jump spasm which stuns anyone unlucky enough to be standing on its back at the time of attack. Hecteyes also has a habit of jumping up on the walls of the cave. [60] When this happens, move in close and attack it (with Jump Attacks if necessary) to force it to drop into the water. It exposes its weak spot when it falls and you should take full advantage to unleash all your damage-dealing abilities to inflict the greatest amount of damage in the shortest amount of time. [61] Hecteyes hits anyone close enough with damage and stuns them as it jumps on/off the wall.

While it is on the wall and glows green, watch out! If you touch it you will immediately take damage and be stunned. While on the wall it may bulge up and spit into the water inflicting heavy damage and poisoning all who were at the surface of the water. However, diving straight down will work to avoid this attack, but it only avoids this attack. It won't avoid the devastating bubbles Hecteyes launches since the bubbles travel underwater just fine. Speaking of bubbles, while it's in the water, it tends to launch volleys of bubbles that inflict either Slow, Poison, or Gravity. Each of these can cause a great deal of trouble in this fight. The poison hits for quite a bit of damage, and since you are most likely in the water, you can't Clear it right away. Instead, you must have at least one character return to the ledge to cast Clear or heal the damage. Slow makes it difficult for you to escape attacks and can be really dangerous if Hecteyes decides to pile on the damage. Perhaps the most annoying attack of them all is the monster's Gravity bubbles. [62] If hit by these, you will be unable to jump up and attack the boss while it is on the wall, and you can't jump back onto the dry ledge either.

This is not a quick fight. A good tactic to use is to remain on land while it's in the water and jump in the water when Hecteyes is on the wall. It sounds counter-intuitive, but it allows you to avoid its melee attacks and provides ample time for you to avoid the bubbles it launches while you strafe back and forth or run in a circular pattern. When it jumps onto the wall, leap into the water and use jump attacks to damage Hecteyes while you can. Watch for the green glow and stop attacking when it's in the poisoning state. If it bulges up to spit poison into the water, quickly dive beneath the surface with the magic cast button, as the poison does not affect those underwater. When Hecteyes is dealt about 100 damage while it's clinging to the wall it'll fall into the water and reveal the weak spot on its belly. Jump on the weak spot and stomp, unless you have a quick melee weapon which may be more effective if you find a good angle of attack from the water's surface. If you can do this a few times and avoid taking massive damage from the bubble attacks between turns, victory will be yours.

OPENING THE WAY

Now that you've found both pieces of the instrument, you must find a way to use it to activate the gate. Travel to Fire and Ice Mountains to see if the ruins at the summit provide any help. This is familiar territory, and you should be able to proceed to the summits with little trouble.

FIRE MOUNTAIN

Take out the Bomb that you see as soon as you enter. Then, move up the ramp to the left and continue all the way up to the stairs in the corner. Take out the three Grappler Golems to gain extra experience. [1] Head partway back down the ramp and take the bridge that crosses over the lava to the right. [2] Battle the Bomb and the Fire Bats in your way. Grab the Oil Barrel when you reach the other side and drop down, leaving the rest of your party atop the summit. Place the barrel in front of the blocked area and use Fire magic to ignite it, revealing a **Treasure Chest** inside! [3] Switch to another character waiting by the door and gather your party together. You are now ready to move on to Area B.

LEVELING UP PARTY MEMBERS

The monsters here don't have the same high levels as the ones you just faced in the mine, which means the battles are much less dangerous. This is an excellent opportunity to bring along a party member that you wish to level up. This way, that character can gain experience without your party suffering from the weak damage output of a lower-level character.

Move forward and confront the Fire Bat that swoops in to attack. Stomp it into the ground and make use of the White Barrels to the left to refill your HP and MP. [4] Continue onward to take on a Fire Plan. Squish the creature, then move ahead to jump across the lava. [5] Remember that these planks are unstable and only float for a second after you touch them. You must be light on your feet to get across. A trio of Walking Plants and a Fire Bat appear after you've reached the other side. Clear out the group and move into Area C.

A Cockatrice attacks upon your entry into the next space. Eliminate this small threat and start making your way up the ramp to the left. This isn't as easy as it sounds because of the mass of falling lava rocks! As you make your way up, be on constant lookout for these quickly rolling stones that damage you and (more troublesome) knock you about. [6]

BURIED TREASURE!

There's no telling who came back here to bury their treasure after you took it the first time, but you can find another stash near the rock across from the entrance, just as you did on your previous visit. [7]

IN A HURRY?

Unlike your earlier visit, the doors between areas are wide open. If you are in a hurry, you can run past most of the creatures you encounter and just double-time it to the summit.

You've reached the top of the ramp. Open the **Treasure Chest** on the left-hand side before crossing to the other side of the path. Jump onto the sliding stone slab and ride it until you can jump on the stone attached to the wall and battle a waiting Grappler Golem. [8] From there, hop onto the small ledge to your right and then onto another stone slab. Dispatch the Fire Bat. Jump onto the sliding stone slab and ride it over to the ledge to reach Area D. [9]

AREA D

A Fire Bat arrives to defend its territory as soon as you enter. Head around the room to the right, eliminate the Fire Flan in your way, and locate the doorway to Area E. Clear out the Fire Flan and Fire Bat on the other side of the room if you want a bit more experience and loot.

BURIED TREASURE!

Before leaving this small area, take a moment to unearth the treasure stashed on the far side of the room, opposite the entrance. [10]

AREA E

Watch out for falling lava rocks as soon as you enter the area. Cross their path to reach the two **White Barrels** and replenish your HP and MP before moving on. Head to the right and jump onto the crystal block. [11] The block rises as soon as you step on it. When it reaches the top of the pillar, step off and deal with the Bomb on top. There's a pull switch located on the underside of the crystal block. [12] Jump over and activate it, making a **Treasure Chest** appear on top of the pillar. Collect your prize and jump back down to the ledge where you started.

Make your way up the ramp, dodging the falling lava rocks and dealing with any opposition you encounter. Keep your HP up, because the lava rocks can really knock you around. When the ramp opens up and begins to turn left, eliminate the Grappler Golem and Fire Elemental that appear, and then claim the **White Barrel** behind them. [13] Continue up the ramp, battling the Fire Bat and Cockatrice in your way. Find a **White Barrel** at the next bend to replenish your HP and MP. Watch out for a Grappler Golem and a Walking Plant at the top. Once you have defeated them, jump across the wooden plank to reach the entrance to Area F and a convenient **Save Stone**.

AREA F

You've almost reached the summit. Soon, various monsters come out in force to stop you, including Fire Bats, a Fire Bomb, Cockatrices, and Walking Plants. [14] Move around the room slowly, engaging the foes as they appear so that you don't have to take on the whole roomful of monster at once. When you've cleared the way, step on the red floor switch to reach the steps leading up to the summit. Jump up the stairs to reach the ruins at the top. [15]

ICE MOUNTAIN

AREA A

Use Entrance 1 to reach Area A. Open the **Treasure Chest** on the high ledge to the left before continuing deeper within. If you have a Selkie or other character with the double-jump ability, you can easily make it to the ledge. If not, jump onto the sign and then onto the ledge from there. [16]

A group of Snow Mus attacks once you walk forward! Take them down and make your way up the steps to Area B, eliminating the Ice Bomb and Bat in your way. As with the foes you faced in Fire Mountain, these aren't overly challenging for your level. Pay attention to your HP and work together to vanquish the foes, and you should have little difficulty making it to the summit.

BURIED TREASURE!

Before heading up the steps, grab the buried treasure located under the mound near the entrance. [17]

AREA B

A Sahagin attacks as you enter this area! Deal with it and proceed across the ice to take on the Snow Mu. [18] Once you've cleared the way, enter Area C.

STILL IN A HURRY?

As with Fire Mountain, the doorways here are unblocked so that you can rush through if you choose, but why give up all that experience and treasure? The materials dropped by the monsters frequently come in handy when custom-ordering equipment!

AREA C

As soon as you enter, locate the **White Barrel** on the left. Cross onto the ice and defeat the waiting Floating Eye. Use the tile as a stepping-stone to reach the next ledge, off to the right. [19] Exterminate the Ice Flan, then help yourself to the **White Barrel** and the **Treasure Chest**.

Step up to the rope and pulley, knocking out the Floating Eye in your way. Take hold of the rope and ride it all the way down to the other side to reach the doorway to Area D. [20]

AREA D

The Ice Bomb and Snow Mu are mightily displeased that you've entered their territory! [21] Exterminate them, and then avail yourself of the **White Barrel** behind them. Make your way across the tiles to the other side of the area. [22] An Ice Flan and a Bat attack you on the other side; finish them off and plunder the **Treasure Chest** before heading into Area E. [23]

AREA E

If you need to refill, find the **White Barrel** on the left at the entrance. If you approach the barrel, a Mini Bomb drops down in defense. Head to the right and down, passing a pair of Bats, an Ice Elemental, and an Ice Bomb before you loot the two **Treasure Chests**. [24] Once you've collected your spoils, head back up and straight out to Area G.

MONSTER COLLECTOR I

To open up this quest, enter Area F and speak to the researcher on the far side of the room. He is more than happy to put in a request at the Quest Shoppe so he can get some help with this task. [25]

AREA G

Open the **Treasure Chest** to the right of the rope and pulley. [27] Jump up, grab the rope, and ride it all the way down. Clean up the Mini Bombs and the Ice Bomb waiting on the other side, and then grab the pull switch. [28] Ride it up to the ledge to reach Area H.

AREA H

Two Ice Elementals and a Bat engage you in battle, eager to defend their home against your invasion. Once you've finished off these critters, continue along the ledge to reach the **Treasure Chest** in the corner. A Floating Eye appears as soon as you approach the chest! Put this bug down and claim your spoils. [29]

Use the floating rectangular tile to reach the pull switch. [30] Be careful! Those tiles begin sinking as soon as you step on them. Grab the pull switch and ride it over until you can jump off. Lightly step on the tile here to jump to the snowy ledge and find a **White Barrel**.

Defeat the attacking Sahagin and head down into the area, past the Mini Bombs that appear, to reach the doorway to Area I.

BURIED TREASURE!

While you don't need to travel into Area F to reach the summit of Ice Mountain, it's worth entering to collect the buried treasure in the lower left corner of the area. [26]

BURIED TREASURE!

Before moving on, run your magic target ring across the ledge in the left-hand corner to reveal a secret stash! [31]

AREA I

Several Mini Bombs come after you once you enter Area I. Eliminate the tiny creatures and move through the room to the opposite side. If you need to replenish your HP or MP, find the **White Barrel** along the wall. There's also a **Treasure Chest** nestled in the far left corner. And, you can touch the crystal block in the pool, revealing a hidden **Treasure Chest**! [32] Once you've collected your spoils, you are ready to move on to Area B.

AREA B

Gather the items from the **Treasure Chest** near the door; you can never have too much treasure! But watch out for two oncoming Ice Bombs when you jump off the small ledge near the door.

Head to the upper left corner of the room near the **White Barrel**. Make a blind leap to the left to reach a small landing. [33] Have faith; you can't see it, but it's there. Once you land, leap high up to your right to grab the pull switch. Ride the switch up until you see a ledge just on the left edge of your screen. [34] Jump over to it to reach Area A.

AREA A

You've arrived at a small upper ledge in Area A. Grab the contents of the **Treasure Chest** here, then make your way back into Area B.

AREA B

Drop onto the ledge and (once again) grab the pull switch, riding all the way up. Jump back to the right to reach this section of Area B. Defeat the Ice Bombs and slide down the rope and pulley until you can drop onto the rectangular tile. [35] Quickly run across the tile and leap to the opposite ledge to reach Area C.

AREA C

You must contend with two Ice Flans and a pair of Ice Elementals once you enter. After clearing them out, use the **Save Stone** to the right of the stairs, then head into Area D.

AREA D

Head up the steps on the left, defeating the Ice Bomb and Floating Eye along the way. An Ice Elemental and a Sahagin wait at the top of the stairs, but they are no match for you! There are two **White Barrels** on the opposite side, so take the time to fill up your HP and MP. When ready, enter Area J.

AREA J

A group of Grappler Golems tries to take you down as soon as you enter. Although your levels are much greater than theirs, you must finish the battle before they can explode. Use your magic to quickly eliminate the Ice Elemental in the center of the floor. Once you've cleaned up this paltry opposition, climb the steps to reach the summit and activate the gate! [36]

DROP TABLES

Refer to Walkthrough VII for the drop tables for both Fire and Ice Mountains. Walkthrough XIII has the same monsters, chests, and buried treasure locations and drop percentages.

A WAY AHEAD

Now that you've activated the gate, it is up to Sherlotta to find a way to the tower. The path is fraught with danger, but only by forging bravely ahead will you find the answers you seek.

THE BRIDGE

The staff you assembled functions like a key and, along with Sherlotta's special abilities, opens the Gate! A Bridge appears on the other side, leading all the way to the tower! Once the Bridge has been formed, head through the Gate! [1]

START
To World Map

AREA B

You soon find a Spin Spine as you advance! These spiky creatures are a bit tougher than their relatives you are familiar with, so keep an eye on your health when battling them. Use Charge Attacks and magic to get past their frequently used Guard ability and watch out for their spinning attack, which can hit any nearby party members.

Jump onto the ledge to the right of the Spin Spine to encounter a Dark Skeleton guarding a Treasure Chest. [2] There are several dark foes along the bridge, so cast your Recovery magic on them as soon as you see one. Next, jump down and head to the left side of this section of the Bridge to face another Dark Skeleton. Clear it out and push the moveable blocks behind it to cause the green pillars to drop, clearing the pathway. [3]

Climb the steps to face another Spin Spine. Once you have defeated it, secure the booty from the Treasure Chest nearby. [4] Two Icarus Mus move in to attack as you near the chest. Even though they are harder than the Mus you have faced elsewhere, they are still susceptible to Slam Attacks. Use that handy wall next to you.

Continue down the Bridge to take on the two Dark Skeletons on the right. Once you've put them down, notice the huge moveable block. [5] Push it out of the way to let the green pillars fall, revealing a Keystone. [6] Pick it up and carry it to the nearby Key Pedestal, opening the way into Area C. Watch out for the Icarus Mu guarding the stand, then make use of the White Barrel to the left before you leave.

BURIED TREASURE!

Don't rush into Area C just yet. Take a moment to expose the stash of loot on the left side of the area down the steps.

Some of the battles on the Bridge can be challenging. It is a good idea to keep your HP up at all times, especially before entering a new area.

A group of Mini Bombs moves in to attack once you enter this area. These monsters may be tiny, but as you've seen before, they are just as bad-tempered as their larger cohorts. Move ahead to face a Daedalus. These long-legged machines often use their missiles to stun you, so watch out. Loot the **Treasure Chest** here before moving on. [7] Head towards the bottom left section of the area and take out another Daedalus.

Next, activate the post switch to raise the block off of the nearby red floor switch. [8] Quickly jump up, avoid the sliding spikes, and step on the floor switch. This raises the green pillars to your right.

Jump back down to the post switch and give it another whack to buy yourself a valuable second or two. Head to the right of the switch then leap on top of the rising and falling green pillar. [9] Ride it up; when it reaches its apex quickly jump to the next green pillar and the next in succession until you reach the landing on the other side. [10]

Once there, defeat the Spin Spine. Walk to the far edge of the platform and step on the tile. [11] Ride it all the way to the first crystal block. Jump over, touch the block, and quickly land back on the tile. This tile begins to move back as soon as you step off of it, so be quick. Touching the crystal block causes it to lower, allowing you to step onto the top of the green pillar. Do the same thing to the second crystal block next to it. [12] Hop over to the platform, which leads to Area D.

Walk forward to battle an Adamantoise! Remember to attack from the back and sides to avoid the fiery balls it shoots from its maw. Batter it into submission and head left up the ramp to reach a **Treasure Chest**. [13]

Drop down to the right and activate the post switch, which lowers a tile along the side of the ramp. As swiftly as you can, head left up the ramp and activate the switch. [14] This releases a boulder that rolls down the ramp. With the tile in place from the post switch you activated, the boulder rolls into the block at the base of the ramp, opening the way to the rest of the area. [15]

Cross the thin walkway and finish off the two Magic Golems here. [16] These monsters can Zap you, making you useless for a few seconds; be ready to switch to another character and jump back into battle if necessary. Empty the **Treasure Chest** and take advantage of the **White Barrel** before moving up the ramp.

BURIED TREASURE!

Before moving up the ramp, take a moment to unearth the treasure near the top. Watch out for rolling boulders while you do! [17]

Make your way up the ramp, avoiding the boulders tumbling past you. At the top, watch out for the sliding spike traps and vanquish the Adamantoise in between them. [18] Once you've bested this foe, you are ready to move into Area E.

A Dark Sahagin waits for you upon your entrance into this section of the Bridge. [19] Quickly hit it with a Recovery-type spell, dispatching it before it can do too much damage. You'll then encounter two Magic Golems that need to be dealt with (to the left of the Sahagin). Avoid their magic target rings to keep from being zapped! Once the monsters are cleared out, head back to the right. Grab the moveable block and push it towards the ledge with the **Treasure Chest**. [20] Jump onto the ledge and claim your loot! Head back to where you faced the Golems and exit to Area F.

Head to the left and take out the Magic Golem. Jump down and disable the Daedalus, as well as the group of Mini Bombs nearby. [21] Once you do, the Urn is all yours. Carry it up the ramp to the Blue Plate on the right. A Magic Golem appears intent on stopping you! [22] Place the Urn on the Blue Plate and ride it all the way to the top to reach the doorway leading into an unvisited section of Area E. But before leaving, use the Urn to get yourself another Scroll! When the Urn is near its highest point, jump off to the right and catch the swinging rope. [23] Use the rope to swing over to an isolated pillar containing a **Treasure Chest**! [24] Grab your take and swing back over to enter Area E.

AREA E

The Spin Spine is not happy to see you in its territory. Eliminate it before moving towards the **Treasure Chest** in the back corner. A Dark Sahagin and Magic Golem engage you in combat. Take them down and get your reward from the chest. [25]

Head back to the right-hand ledge and grab the rope and pulley. Ride it down until you are over the middle section with the red floor switch. [26] Once here, step on the switch to make the tiles on the other side move towards you. Use the **White Barrel** before moving on.

Jump across the tiles to reach the part of Area E that you visited earlier. Grab the moveable block and pull it onto the red floor switch. This causes the green pillar to drop into the floor, revealing a **Keystone**. It also starts a tile moving between this area and the left side of Area E, where you entered. [27] Grab the **Keystone** and step onto the moving tile, riding it all the way back to the other side. [28] For extra experience and loot, battle the Magic Golem and Dark Sahagin that appear before you return with the **Keystone**. Hop up the steps once you reach the other side and place the **Keystone** in the **Key Pedestal** to open the way to Area F. [29]

Before moving on to Area F, pick up the **Urn** and travel back to the other side of this area where you got the **Keystone**. Once there, place the **Urn** on the **Blue Plate** and ride it all the way up. At its zenith, jump towards the left to reach a pull switch. This switch slides over, allowing you to reach a **Treasure Chest** on top of the pillar. Once you've collected your spoils, jump down and head back across to enter Area F.

AREA F

Grab the **Treasure Chest** to the left of the entrance and cross the ramp to take on the Magic Golem on the other side near the **Key Pedestal**. [30] You'll soon find an Adamantoise, quickly followed by another! Take out these armored monstrosities to reveal a red floor switch in front of the chest you just cleaned out. Step on the switch to release a rolling boulder. [31] This rock falls to the level below and crashes into the large block, letting the green pillars fall and putting the **Keystone** within your reach.

Jump down onto the level you had previously explored and make your way back to the Daedalus holding the **Urn**. You need to fight a few Mini Bombs to get there! After defeating the monsters, grab the **Urn**, place it on the **Blue Plate**, and ride it up as you did before to get to Area E. This time, instead of going there, vault onto the green pillar and grab the **Keystone**. [32]

Once you've got the **Keystone**, jump down and place it near the other **Blue Plate**. [33] Go back and get the **Urn**, then place it on this **Blue Plate**. Quickly grab the **Keystone** and jump on top of the **Urn**. Ride it up to the other part of Area F. Toss the **Keystone** in the **Key Pedestal** to open the passage to Area G.

BURIED TREASURE!

Grab the buried loot on the ledge before entering Area G.

AREA G

Walk down towards the large block in the bowl-like depression and clear out the Mini Movers. Move to the back side of this bowl and take on the Dark Sahagin lurking there. Once the coast is clear, empty the **White Barrel** and the **Treasure Chest**. [34] Step on the red floor switch to release a boulder onto the track. Quickly run down the track and grab the pull switch. This shunts the boulder towards the large block in the center of the depression, destroying it. [35] Look for the large floor switch in the hole in the center of the depression. Gather your party onto it and ride it up to reach another switch. Once your party is all on this one, you can ride it over to Area H.

AREA H

Dodge the falling rocks and jump your way up the steps and ramps to reach the two pyramids. [37] Watch out for the Spin Spines that appear. Grab each of the pyramids and place them on the upper level. Once you've got them both, jump up and take on the Spin Spine and Adamantoise waiting for you near the ledge. Eliminate these foes and grab the **Dungeon Key** that appears.

With these monsters out of the way, charge up the pyramids and place them in the two sockets. Jump down one step, grab the **Urn**, and place it on the **Blue Plate**. [38] Ride it up and jump to the right to reach a pillar with a **Treasure Chest** containing a **Scroll**! [39]

BURIED TREASURE!

Before activating the switch, snatch the buried treasure next to the tiles on the left of the track. [36]

BURIED TREASURE!

Before jumping down from the pillar, search under the chest to find a buried treasure. It's definitely sneaky to hide treasure underneath a **Treasure Chest**! [40]

Drop down to reach the rope and pulley. Hang on and ride it all the way down to the next landing. A Magic Golem waits, but you can reach Area I once you clear it out of the way.

AREA I

Cure any lost HP before moving ahead. There is a group of two Dark Skeletons and a Daedalus just waiting to attack. Separately, these monsters are no match for your party, but together they pose a significant threat. Concentrate on one target at a time to quickly even the odds.

AREA G

A post switch has appeared since your last visit here. Cross the ramp and step on the floor switch to start the boulders rolling again. As soon as you do, run over and activate the post switch, which slides the tiles to the right side of the track. [43] Now that you've shunted the rock down into this path, it shatters the large stone that was blocking the path. Follow the path down and back up to reach a **White Barrel** to prepare for the battle ahead. Jump onto the next step to take on the two Spin Spines. [44] Afterwards, go up another step to battle an Adamantoise. These monsters just don't quit! Once you have won, head into Area I.

AREA I

Walk straight ahead and take out the Icarus Mus that attack. A red floor switch will appear at the corner of the platform once the vermin have been exterminated. [45] Step on it to activate a

nearby tile that moves up and down. Next, use the rectangular tiles to reach the ledge across from this one. The tiles start sinking as soon as you touch them, so be quick. If you have a character with the double-jump ability, use him or her here to make it easier on yourself. Run across the first two tiles and jump over to the next two. Immediately step onto the other tile as soon you land and then leap up onto the ledge before the tiles plunge to the floor. [46] This is a difficult jump, so don't worry if you don't make it across the first time. If you fail, use the tile that you activated with the floor switch to get back to the starting point.

Heal up before continuing. Make your way to the bottommost corner of the map and take out the Dark Skeleton guarding a **Treasure Chest**! [41] Once you've finished it off and claimed your plunder, move on down the walkway to reach a **Treasure Chest** on the far end. Beware the chest on the very left edge—it is actually a Mimic! While it leaves you alone if you don't approach, this Mimic is holding onto a **Scroll**, so take it out anyway. Retrace your steps and take the doorway into Area G.

BURIED TREASURE!

Grab the treasure buried to the left of the chest here! [42]

Once you reach the opposite ledge, collect the buried treasure before moving on! [47]

Continue along the upper walkway until you reach another Icarus Mu and a Daedalus. Take them down and continue around to reach a **Save Stone** and a locked door. Use your **Dungeon Key** to move on to Area J.

BOSS ENCOUNTER

Two Machine-Type Omega and Machine-Type Sigma

You've bravely made it across the bridge, but before you can exit, you must make it past not one boss, but two! These devious machines do their best to stop you. Both machines have a plethora of attacks and they're all devastating!

Look out! Sigma has three volleys of three (or single missiles) that can inflict Gravity, Slow, or Dark. Avoid these! [48] It can also let loose with a Double Laser Blast. If someone's crazy enough to get on top of it, Sigma can throw that character. Finally, it has a "Death Beam" which stuns and you definitely don't want to be caught in this.

Omega is more of a magic-oriented death machine. It can cast Quake, Lightning, Fire, and Blizzard. It also has a throw and a volley of three missiles that inflict Slow on those caught on top of Omega. Finally, much like Sigma, Omega has a "Death Beam" that stuns. [49] The Death beams can cause so much damage that they can mean instant death for anyone below max HP. Avoid this beam by attacking from the flanks and back of the machines, which makes Sigma (the silver one) your primary target.

The best tactic allows you to conserve MP while inflicting the most amount of damage. It's a tried and true method: the ol' "run around in circles" technique. First, determine which of the two bosses is the bigger threat. Generally, spells are much easier to avoid than the ever-annoying character-seeking missiles.

You begin the fight to the lower right of the two bosses. Start running in circles around Sigma which is just south of Omega. The missiles and spells, which all inflict horrible status effects and damage, won't be able to catch up to you if you're constantly on the move. If there's a missile in the air and you stop for a single second, you will get hit. Continue running around Sigma until Omega successfully hits Sigma with its Death Beam. Ensure that you're not in front of or even relatively close to Sigma as it will discharge its excess energy from the blast. When you see Sigma stand and unleash a barrage of energy in its frontal arc for about three seconds and then slouch over for about ten seconds, jump in for the attack! Whack Sigma for around 60 damage to flip it onto its back and reveal its weak spot. Sigma will be stunned for 12 seconds while on its back, during which you should add on as much damage as possible. Be careful to avoid any spells or extra Death beams from Omega during your assault. Chill Omega out with a Blizzard spell of your own to lessen that threat.

This technique should make quick work of Sigma while conserving both your HP and MP. When Omega is (fittingly)

left standing and without a working Sigma, avoiding Omega's Death Beam and associated stun takes a bit more work. Cast Blizzard on Omega immediately. While it's frozen for four seconds, jump onto its back where you can control it. [50] As Omega thaws, press the attack button to blast its Death Beam toward the broken Sigma. The energy will flow through Sigma and cause the broken machine to spin and redirect the energy from the Death Beam outward. This energy will sometimes hit Omega and cause the same three-second energy discharge to happen, at which point you should back away. Once Omega is dazed from the discharge, inflict the requisite 60 damage or so to expose its weak post and pound on the fallen machine. Attack the weak spot until Omega stands upright and repeat the process until it's terminated as well. There are, of course, many strategies you could employ during this encounter, but this tactic should conserve the most HP and MP and leave you relatively unharmed.

CAUSE AND ORIGIN

It has been a long, strange journey, but you are nearing the end of your quest. You survived the harrowing crossing of the Bridge and only one thing stands between you and the answers you seek: the tower.

THE TOWER

There is a **Save Stone** to your right as you enter. The way ahead is treacherous, so it's a good idea to use it. Notice the **Blue Orb** at the left end of the platform. There is another one to the left of the entrance, floating barely in sight. Set the device so that when triggered, it hits both Orbs. [1] When both are activated, the green pillars fall into the floor, revealing a **Treasure Chest**! [2] Collect the contents and head into Area B.

Take on the **Chimera** as soon as you enter. Remember to blast it with **Holy magic** as much as possible. It's got a nasty habit of stunning anyone within melee range, making it difficult to destroy this monster with melee attacks alone. Grab the moveable blocks and drag them out of the way to reach an **Ice Pot**. [3] Cast **Blizzard** on it and toss it into the water. Now that the water is frozen, drag one of the moveable blocks over the ice until it is in position beneath the large block. Grab the **Oil Barrel** and set it on top of the moveable block. [4] Ignite the barrel and step away. It blasts the block apart, revealing a stairway.

Head upstairs, where you'll face another **Chimera**. Don't forget that these can plunge you into **Darkness** as well, so be ready to use **Clear** if necessary. Use the **White Barrel** next to the **Chimera** if you need to replenish your **HP** or **MP**.

Grab the **Oil Barrel** and walk into the water to the left. Jump onto the tile in the water and set the **Oil Barrel** on it. [5] Ignite it and toss it at the block in the wall to reveal a red floor switch. [6] Step on it to raise a tile on the other side of the pool. Cross the water and jump onto the tile here to reach a swinging rope. [7] Grab it and ride it across to the higher ledge.

You must contend with two **Dark Elementals** in the center of the area once you jump across. Quickly gather your party to you and hit these voracious creatures with **Holy magic**. They can poison you and do a great deal of damage, so you must put them down quickly. Once the battle is over, go to the left, jump up, and touch the crystal blocks to reveal a **Treasure Chest**!

When you are done collecting your spoils, freeze the **Ice Pot** and take it over to the waiting pool. Note the position of the red floor switch under the water. Drop in the pot to freeze the pool. Drag the moveable block onto the ice and position it right above the switch. [9] Ignite the **Fire Pot** and drop it onto the ice, sinking the block and activating the switch. **Water Barrels** start falling from the sky into the pool once you've activated the switch. Freeze the **Ice Pot** again and use it to refreeze the pool. Now, pick up a **Water Jar** and carry it across the ice to reach the flames in front of the door. [10] Smash the jar to douse the flames and open the way into **Area C**.

You've stepped onto an elevator platform that takes you higher into the tower! A trio of **Grappler Golems** attacks you! Get behind them to avoid their **Guard**. There is a **Lectern** here, just like in the library. Grab a **purple Book** and put it on the stand whenever a new monster appears to get some extra damage to take down your foes. [11] Once you take down the first trio of **Golems**, **Magic Golems** pop up to take their turn. An **Adamantoise** joins the battle as soon as the rest of your enemies fall.

Watch out! This area is highly poisonous! Grab the nearby **Urn** and run straight ahead to toss it on the **Purple Plate**. [12] Two **Bolt Golems** appear once the **Urn** touches the plate! Take them down before moving on. Now that you've got some protection, pick up the **Urn** and carry it with you to the post switch. Set it down between the wall switches and the post switch. Activate the post switch and hurry to the first wall switch. Push it almost in, but not all the way. [14] If you depress the first switch all the way, it comes back out once the post switch returns to its original position, and you don't have time to push in both. Return to the post switch and reactivate it. This time, push the remaining switch all the way in and quickly finish depressing the first switch. The doorway to **Area E** opens once you've pushed both of them into the wall.

Every so often, **White Orbs** pop up around the elevator platform. Move the device to the left of the **Lectern** so that it is in a position to direct spells at all the Orbs. [12] Throw a **white Book** onto the **Lectern** and use your magic target ring to direct the **Book's Holy magic** to the device, shattering the Orbs. This allows you to reach the **Treasure Chests** hidden beneath the platform! You only get a few chances to do this before the elevator stops, so be quick! Once the elevator reaches its destination, gather your party onto the giant red floor switch to enter **Area D**.

MULTIPLAYER TIP!

THE MORE, THE MERRIER

You can handle this set of switches much more quickly with some multiplayer help. If you've got a partner, one of you can operate the wall switches while the other keeps the post switch activated so that you've got all the time you need to push in both wall switches. If you've got three people playing together, the third is on **Urn** duty and can move it wherever needed, and even refresh the protection at the **Purple Plate**.

AREA E

At least this area isn't poisonous! Still, the first thing you see when you enter is an Ahriman! If you are low on HP, heal up quickly before taking on this monster. Once it's down, continue forward, making your way past the Adamantoise. With the monsters out of the way, jump onto the swinging rope overhead and ride it all the way across the lava to the other side. [15] Watch out for the spikes when you land!

Step on the floor switch to send the tile over to another path. [16] Battle the angry Cockatrice before moving onto the next floor switch. Ride the tile to the next platform and walk up the ramp to reach the next area. Watch out for the spiked pendulums. If one of them connects, you may find yourself trying to swim in boiling lava!

BURIED TREASURE!

Before heading out, take a moment to unearth the loot hidden near the exit. [17]

AREA F

Area F is highly poisonous, but you won't be here for long. Take out the Cockatrices that attack as soon as you enter. The doorway to Area D will open once they have all been defeated.

AREA D

This area is also poisonous, and the only way you can make it stop is to activate the wall switches in the correct order. Quickly Cure any lost HP and approach the switches. From left to right, think of the switches as being numbered one through four.

Push the third switch in first. [18] Do the same for switches one, four, and then two. Once all four switches are flush with the wall, the poison will lift. Take advantage of the **White Barrels** and heal your entire party before moving through the now-open door into Area E.

AREA E

Locate the **White Barrel** as soon as you enter this area. Take advantage of it, making sure your party is battle-ready before moving forward. Step onto the platform. [19] Like the one you used in the mine, you can control this platform by using magic on the Orbs. Move the platform forward with the Blue Orb until you engage the Ahriman that attacks. Use Gravity to knock it down onto the platform where you can more easily attack it. Once you are finished, move the platform over to the far ledge, next to the Urn.

Step off and deal with the two Cockatrices guarding this walkway. Grab the Urn and place it on the **Blue Plate**. Ride it up until you can jump onto the floating tile containing the Yellow Orb. [20] Activate the Orb with Thunder magic to open the door at the end of the walkway. Jump down and face the Chimera guarding the door. Once you have defeated it, move on into Area F.

AREA F

Defeat the Cockatrice that charges you as you enter. There is a **White Barrel** next to the entrance if you need to replenish your HP or MP. Walk forward and pick up the **Keystone**. It's always good to have a **Keystone**, but you need to get it across the chasm to the **Key Pedestal** on the other side. Place it on top of the pull switch you see here. [21] Grab the pull switch and ride it all the way across until it stops. Quickly jump off and move onto the ledge. Take the **Keystone** from the top of the pull switch before it travels all the way back to its starting point. [22] If you miss it, there

is another pull switch on this upper ledge that takes you back across the lava to the other side, where you can try again.

Place the **Keystone** in the **Key Pedestal** to open the nearby door. Be careful when approaching the **Key Pedestal**; two Dark Sahagin lurk nearby, waiting to draw you into battle. Once you clean out the monsters, head to the edge of the walkway and use the rectangular tiles to reach the tall pillar far out into the lava. [23] These tiles sink as soon as you touch them, so you must be light on your feet. The **Treasure Chest** on top of the pillar contains a **Scroll**, so it is well worth the effort! Once you've collected your bounty, you are ready to proceed to Area G.

AREA G

You've made it to the second elevator! [24] As it takes you up the tower, avoid the rolling alarm in the center to keep the amount of damage you take to a minimum. Triggering the alarm unleashes spike traps and Oil Barrels. Cockatrices, Dark Sahagin, and Dark Elementals engage you in battle while the elevator continues to rise. Of these, the Dark Elementals are by far the most dangerous. Hit them with Holy magic before they can do much damage.

Look for a swinging rope on the left-hand side of the platform, then jump up and take hold of it. When it swings all the way towards the tower, hop off and up to reach a second swinging rope. Ride this one over to reach a small platform containing a **Treasure Chest**. [25] It may take you more than one attempt to reach the chest, but it's worth your time to gain another **Scroll**! Once the elevator reaches its destination, step on the floor switch to reach Area H.

AREA H

Upon your arrival in Area H, locate the **White Barrel** to help you replenish your HP or MP. Cross the platform and go down the steps to the right, where you face two Dark Bats. Use your Recovery magic to pop them out of shadows so you can better damage them. Once the way is clear, jump to the next platform. Be careful here! There is a gap between the stepping stones that you must jump across. Use the stepping stone to the left to make the jump easier. [26]

Attack the Chimera on the next platform, defeating it with a few good blasts of Holy magic. Use the rectangular tiles to the right to reach the next platform. [27] Remember that this type sinks when you touch one, so be quick! Two Grappler Golems appear once you open the **Treasure Chest**! Move around to their backs to get in good hits past their Guard. You don't have much room here, so take them down before they can explode. Exit the platform and climb the steps to reach Area I.

Defeat the three Grappler Golems and charge up the pyramid. Step onto the tile next to the socket and place the pyramid in the socket. [28] Once you do, the tile starts moving to the next platform. If you happen to place the pyramid and fail to ride the tile over, there is a swinging rope at the upper edge of the platform you can use to get across. When you arrive, pick up the pyramid and jump onto the platform. You must be really quick to do this successfully, as the tile will return to its original position as soon as you lift the pyramid out of the socket.

Once you have the pyramid, go to the edge of the platform where you can see another empty socket. [29] Drop the charged pyramid into it. This sends it over to the other side of the area where you can pick it up later. Contend with the Grappler Golem and move toward the spike traps. Watch the pattern the traps take, because they slide on different paths. To sneak safely by, wait until one of the traps is at its closest point. As soon as it starts to go back down the path, follow it closely. [30] Once the trap sliding next to you passes your location, step onto its track and continue. This way, you can make it past without getting stuck!

BURIED TREASURE!

Before running past the spikes, grab this well-guarded treasure hidden in the floor! [31]

You'll face a few Bolt Golems after clearing the spike traps area. Once you eliminate them, it is time to get that pyramid you had earlier. Grab the nearby rope pulley and ride it down to the large tile with the red floor switch. [32] Once there, stand on the very edge of the switch to make the tile slide to the left. By standing on the extreme edge, you are in range to grab the pyramid when the tile passes next to it. [33] If you miss it, just step off the switch. The tile slides back, and you can try again.

Once you've got the pyramid, continue riding the tile all the way back to where you fought the Bolt Golems. Jump quickly onto the walkway. The tile is going to start back to its original position as soon as your feet leave the switch, so be quick. If you drop the pyramid, you must retrace your steps, going back to retrieve it from where you entered this area.

You've safely brought the pyramid to you; now head down the walkway with it, past the sliding spike traps and the pair of Daedalus, to reach the end of the walkway. [34] After vanquishing these metal foes, charge up the pyramid and step onto the tile, placing the pyramid in the waiting socket. Ride the tile to the other side. [35] Pick up the pyramid, hop down onto the platform, and place it in the socket to open the door.

Be ready for battle before moving forward! There are quite a few monsters packed into this small room, so heal up and employ spells like Barrier and Haste to give you the advantage in the coming encounters. Every bit of extra damage you do, or every bit less damage you take, can mean the difference between a victory and a KO!

Your first foe is an Adamantoi. Avoid standing directly in front of it as much as possible. Stomping on its shell never hurts, either. Two Ahriman appear as soon as that armored monstrosity hits the floor. As long as they're flying, this can be a tough fight. Use Gravity on them to bring these flying eyeballs down to earth, where you can have at them with little difficulty. No sooner do the Ahriman fall than you've got two Dark Sahagin to battle! [36] If you find yourself hurting from the battles you've already faced, give yourself some room and heal yourself before heading back in to take them on.

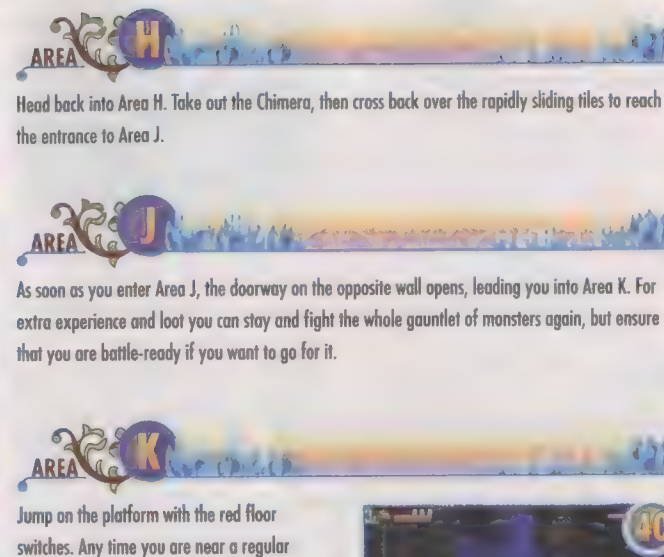

A Grappler Golem, a Bolt Golem, and a Magic Golem near the entrance appear once you've finished the fight above! Attack them from behind to get past their pesky Guard ability and avoid the Magic Golem's target rings. Now that you've finally cleared out all of the monsters in this room, grab the pyramid and place it in the empty socket to open the door to Area H. [37]

Step onto the moving tile when it comes into range and use it to reach the one sliding next to it in the opposite direction. Be careful! These tiles move much faster than the ones you are used to. From there, grab the pyramid out of the socket. [38] Ride the tile to the next platform and jump onto it, still carrying the pyramid. Make your way past the Chimera here to place it in the socket. This opens the door to Area K.

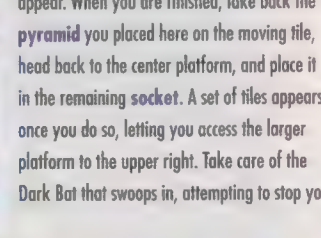

You must take on three Bolt Golems as soon as you enter the area. Once you've eliminated the threat, grab the pyramid and place it in the socket on the rapidly raising and lowering tile on the other side of the platform. [39] This makes a tile appear near one of the other platforms in Area K, but you can't reach it from here.

Head back into Area H. Take out the Chimera, then cross back over the rapidly sliding tiles to reach the entrance to Area J.

As soon as you enter Area J, the doorway on the opposite wall opens, leading you into Area K. For extra experience and loot you can stay and fight the whole gauntlet of monsters again, but ensure that you are battle-ready if you want to go for it.

Jump up the tiles to reach the next platform and make your way past the Magic Golem and the Adamantoise to reach Area L. [44]

BURIED TREASURE!

Before leaving Area K. Carry the three boxes near the exit onto the moving platform. Drive the platform all the way over to the right until you reach the tall pillar. Stack the boxes on top of each other and climb up on top of them. From this height you can reach the top of the pillar and uncover a Buried Treasure, as well as plunder the Treasure Chest!

You have almost reached the top of the tower! Use the Save Stone here before unlocking the door and entering Area N!

You have almost reached the top of the tower! Use the Save Stone here before unlocking the door and entering Area N!

You have almost reached the top of the tower! Use the Save Stone here before unlocking the door and entering Area N!

BOSS ENCOUNTER

Larkeicus

This boss encounter has two stages. During the first part, you face Larkeicus in his unaugmented state. However, he's no pushover! His most common attack is to swipe at you, afflicting you with Poison. [43] Cleanse this right away. You don't need to take the extra damage, and the interruption to your spellcasting can be a major hindrance when you are trying to keep your party healed.

Larkeicus can also focus his energy into his claw-like hand and blast a target for massive damage. [49] When you see him begin to charge up, back away from him to avoid taking the hit. He can also gather dark energy to him and release it in a massive blast that hits everyone near him. As soon as you see the large circles begin to form over his head, run as fast as your legs can carry you away from him. [50] This ability causes heavy damage, often killing your entire party. Wait until he unleashes this attack, then run in to let him have it with your melee strikes.

The old scholar is a formidable foe on his own, but he also summons Golem minions! [51] Each time he summons three of them: a Grappler Golem, a Bolt Golem, and a Magic Golem. Once they appear, focus on attacking them. The extra damage they inflict makes it difficult to engage Larkeicus at all. Even if this weren't the case, you must destroy them so that you can get the Ether and Potions they drop. This is a long fight, so prioritize keeping your HP up before any other concern.

Even when you finally manage to kill Larkeicus, he doesn't stay dead. He uses the power of the crystals to come back even stronger! The battle isn't over yet! [52]

This version of Larkeicus also has a few nasty tricks up his sleeves. He still uses a version of his energy blast, which can really damage a target. In addition, he can rain fiery crystals down from the sky to wreak havoc on any party members caught in this storm. [53]

Once you get him to half HP, he summons three cones. [54] Destroy them to release much-needed Ether and Potions. He also summons a larger version of his claw. Attack this as if it were Larkeicus himself to lower his HP. [55]

Stay on the move and keep an eye out for enemy magic circles while keeping yourself and your party healed. Remember to use the two Phoenix Downs on either side of the battleground if you get KO'd. You've got plenty of room to move around here, so don't let yourself get boxed in by the enemy. This is a tough battle, but with a lot of perseverance and a little luck, you can win the day!

Congratulations! With Larkeicus's defeat, you have protected the present from the sins of the past. History is once again secure, and you can breathe more easily knowing your family and friends are no longer in danger. You have solved the mystery of the tower, but your adventure need not be over. There is still plenty of work for a hardy adventurer! Visit the Quest Shoppe in town to take on odd jobs, or try your skills against the special bosses lurking about. Whatever you decide to do, the skills and items you've collected will definitely help you on your way.

Really, only one question remains: where to now?

QUEST SHOPPE

The Quest Shoppe allows people from all over to hire adventurers to fulfill their various needs. Taking on quests is a great way to earn gil and items, as well as extra experience. You can speak to the moog near the docks at any time while you're in Town to see what quests are available. To accept a quest, you must pay a fee, which varies depending on the quest's difficulty and reward. Once you have accepted the quest, you are transported into the appropriate area to complete it.

The entries below list everything you need to know to successfully complete each quest. Though each quest is unique, they all share certain attributes:

Difficulty Level (DL)

The game's difficulty level determines the cost and reward of all quests. The first time playing through the game and the Normal difficulty on "Start+" share the same cost and reward. Hard and higher difficulty levels share the same cost and reward.

Cost

The Quest Shoppe charges a fee for each quest. The costs differ greatly, but the rewards are always well worth the price.

of Players

Many quests can be done during solo play, but some require one or more multiplayer partners. If this number lists as 1-4, you can take the quest on by yourself or with help from your friends. If it says 2-4, the quest can't be done at all during solo play. Please note that this refers to the number of *players*, not characters in your party.

MP Type

During multiplayer mode, each quest is handled one of two ways: **Co-Op** quests allow you and other players to work together toward the same goals, while **VS** quests pit you head-to-head against each other to see who wins the day.

Reward

After you successfully complete a quest, you are returned to the Quest Shoppe and presented with a gift box and a Treasure Chest. The chest can contain material, Orb, and gil rewards, but each quest also has a special reward contained in the gift box you see. This is always something useful and can be a Scroll, a Jewel, or materials used to customize and create your own equipment. If you do exceptionally well on a quest, you may also earn bonus materials. You only have a few seconds to collect your rewards once they hit the ground, so be swift!

In addition to the rewards they provide, quests are a great deal of fun with little risk. If you fail at a quest, you are given the options to Try Again or End Quest. If you choose to Try Again, you will restart the quest immediately, and free of any additional charges. If you choose to End Quest, you are returned to the Quest Shoppe (minus the quest fee, of course), and can try the quest again anytime you'd like. The list of available quests is always growing as you progress through the game, so check back often.

Don't Forget Your Map!

When working on a quest, keep an eye on your map to see the location of power-ups, marked with a "?", as well as the location of your opponent in VS quests.

AREA 051X

(DL)	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	90	1-4	CO-OP	Iron
Hard	225	1-4	CO-OP	Iron Silk

Oh no! Aliens are trying to abduct the cows. After you complete your task on Ice Mountain in "Repaying a Debt," this quest becomes available at the Quest Shoppe.

Upon accepting the quest, you are transported to the forest where six cows graze. The alien light tries to pull them up; it is up to you to prevent that! When you see the yellow light begin to abduct a cow, get underneath it, jump up to grab its legs, and pull it back down to the ground. If you lose more than four cows, you'll fail the quest, so be quick! You have 90 seconds to keep the cows safe. Watch the shadow of the beam along the ground and try to anticipate its movement. It moves quickly from cow to cow, so you must be speedy! If not, the light will take the bovines before you have a chance to save them.

AVAILABILITY

Automatically opens after completing Ice Mountain for the first time.

START

AREA 151X

(DL)	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	180	1-4	CO-OP	Iron
Hard	450	1-4	CO-OP	Seraph Dust

The aliens are at it again! This time, you must save the cows in the village. This quest is more difficult than "Area 051X" because the village is a larger area with seven cows to watch, and your time limit is still the same. Just to make things more interesting, there are now two alien beams of light!

Keep an eye on the crosshairs on your map; these represent the two alien beams. To give yourself an edge, grab the multicolored boxes to gain Haste. This makes it much easier to run after those pesky aliens. This is a great quest to use some multiplayer help to even the odds against those UFOs!

AVAILABILITY

Automatically opens after completing both the Ruins for the first time and "Area 051X."

Those aliens really like their beef! You have one and a half minutes to keep six cows safe from alien abduction in the graveyard. A few dark foes also lurk around here. Avoid them if possible so they don't distract you from saving the cows. Keep an eye on the alien light and take advantage of power-ups when you can get them to keep your bovine charges safely on the ground.

AVAILABILITY

Automatically opens after completing both the graveyard for the first time, and "Area 151X."

BALLOON BOPPERS 1

(DL)	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	30	2-4	VS	Silk
Hard	75	2-4	VS	Platinum

Each player is given a balloon to protect and the object of the game is to pop your opponent's balloon using the multicolored ball that appears in the center. Each time you pop someone else's balloon, that player gains a point. It isn't as easy as it sounds, though! You can't pick the ball up, but instead must move it around the board by attacking it. Drive it towards the other balloons while trying to keep it away from your own.

Pick up and move the boxes in the room to set up a defense around your own balloon, making it more difficult for your opponents to score. Grab the power-up boxes when you see them to gain an advantage like Stealth, Blind, or Slow. After three minutes the scores are tallied, and whoever has the least points wins!

AVAILABILITY

Automatically opens after confronting Larkeicus for the first time.

BALLOON BOPPERS 2

(DL)	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	40	2-4	VS	Black Silver
Hard	100	2-4	VS	Mythril

Similar to "Balloon Boppers 1," in this quest you have three minutes to score as many points against your opponent as you can. When you reach the time limit, the player with the most points loses. Make the environment work for you. Each balloon is flanked by two switches. When activated, they slide in front of the balloon, protecting it from frontal attacks. Use the bombs and power-ups to give yourself an offensive advantage. The ball is extra-bouncy, so directing it properly takes some practice. Use your attacks and even your own body to keep it headed towards your opponent's balloon.

AVAILABILITY

This quest opens after completing "Balloon Boppers 1," and after Sherlotta joins your party.

BALLOON BOPPERS 3

(DL)	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	60	2-4	VS	Sulfur Dust
Hard	150	2-4	VS	Holy Orb

This is the most challenging "Balloon Bopper" yet! This quest takes place in the water. Players' balloons are arranged around a large central pillar where the ball appears. Because you are swimming, you can't move as quickly as you did in the previous battles. This makes it occasionally difficult to control the ball's bounce, as well as to quickly get back to your balloon for defense. Keep an eye on the ball at all times. Remember to use your map to assist you with this. Use the power-ups, like Stealth and Blind, to give you every possible advantage over your opponents. As with the other "Balloon Boppers" quests, the player with the least points wins!

AVAILABILITY

This quest opens after completing "Balloon Boppers 2," and after activating the bridge.

BARREL BATTLE 1

(DL)	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	20	2-4	VS	Iron
Hard	50	2-4	VS	Black Gold

The object of this quest is to collect the most bags within the three-minute time limit. These bags are hidden throughout the forest in White Barrels. Break each barrel you see and pick up the bag to score a point. Large barrels contain more bags! Look all over the forest (even up the ramp) to find them all. At the end of three minutes, the player with the most points wins!

This quest sounds simple enough, but the challenge lies in keeping other players from collecting more than you. Use Blizzard to slow them down, and grab any power-ups to give you an advantage. Locate the few bombs scattered around the board and use them on your opponents to make them drop all the bags they've collected! Quickly swoop in and pick them up to score some easy points while simultaneously depriving your opponent of them.

AVAILABILITY

Automatically opens after completing Ice Mountain for the first time.

BARREL BATTLE 2

DIFF	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	40	2-4	VS	Silver
Hard	100	2-4	VS	Seraph Dust

Once again, you've got three minutes to grab all the bags you can! The aqueducts area is your battleground this time. There are plenty of White Barrels here, but move quickly to grab them before your opponents do. This "Barrel Battle" adds a few twists. Keep an eye out for the red floor switches when they appear. All players must step on one to activate it. The switch can cause either a large barrel or a group of Oil Barrels to appear!

This challenge sports several Oil Barrels around the area. These are self-igniting, so steer clear. If one of them catches you in its blast, your bags pop out and are fair game for any opponent to grab. Pick up these barrels and throw them at your foes to clean up their loot, but be careful you don't catch yourself in the blast.

AVAILABILITY

This quest opens after completing "Barrel Battle 1," and after Sherlotta joins your party.

BARREL BATTLE 3

DIFF	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	70	2-4	VS	Platinum
Hard	175	2-4	VS	Dark Orb

In "Barrel Battle 3," you've once again got three minutes to find as many bags as you can, this time in the graveyard. After the first few at the beginning, the majority of barrels on this board appear in the sunken area in the center of the room. Going down there gets you bags, but also makes you vulnerable. Use the red floor switches in the center to catch your opponents in the flames when they enter or exit the circle. Quickly scoop up all their bags when they are stunned.

The bombs sitting in the center are inert until you pick them up and throw them. However, activating the Red Orbs drops a bomb that is already charged up and ready to explode, great for taking down an opponent. The most important thing to remember during this quest is to keep an eye on your opponents. Collecting bags is great, but you can often get more points by stealing from your fellow players.

AVAILABILITY

This quest opens after completing "Barrel Battle 2," and after crossing the bridge.

BIGGEST BADDEST BOSSES

DIFF	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	450	1-4	CO-OP	Scroll-Mage Mail
Hard	1125	1-4	CO-OP	Ultima Silk

This quest becomes available at the Quest Shoppe after completing "Even More Bosses." This time, you've got 30 minutes to vanquish 13 bosses! That's a lot of fighting! This is a great quest in which to call for some multiplayer help. While the bosses are random, you've faced them before. Remember the techniques you used to defeat them the first time around; they'll serve you well here. Make sure you are taking them out as swiftly as possible, because the clock is always ticking!

AVAILABILITY

Automatically opens after completing the story and viewing the credits, and finishing "Even More Bosses."

BRING THE COWS HOME 1

DIFF	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	90	1-4	CO-OP	Scroll-Hero Mask
Hard	225	1-4	CO-OP	Scroll-Beast Sallet

A wayward bovine has gotten herself stuck on Fire Mountain! You must use the red flag to guide her home. Your cow starts with 10 HP. Monster attacks hurt her, so you must intercept them and minimize the damage to your charge as much as possible.

Pick up the flag, making the cow follow you. She doesn't move quickly, so don't just take it and move to the exit as quickly as you can. The cow won't follow, and it just costs you time. Use Blizzard magic to stop incoming monsters in their tracks and get to them before they get to your cow.

You've got seven minutes to make it all the way down Fire Mountain, so be quick. If you drop the flag in the lava, you must retrieve it from the start of the area you are in. The cow gladly stays by the flag, so you can leave her there while you jump onto ledges to grab barrels or

activate switches. Once you've led her down the mountain safely, jump into the portal to complete the quest.

AVAILABILITY

This quest becomes available once you read the sign near the entrance in Fire Mountain.

BRING THE COWS HOME 2

	Normal	Hard	330	825	1-4	1-4	CO-OP	CO-OP	Seraph Dust	Scroll-Sunglasses
--	--------	------	-----	-----	-----	-----	-------	-------	-------------	-------------------

This time, the heifer is lost in the mine! Use the red flag to lead her to safety. You've got 15 minutes to get her past all the monsters and puzzles. This cow is a bit harder than the last one and has 20 HP, but you may need every one. Besides the usual trials you face, some of the areas you must move through are poisonous, which tends to eat up some of the cow's HP no matter how quickly you move. Place the Urns on the Purple Plates to provide some protection from this danger when able.

AVAILABILITY

This quest becomes available after you have read the sign in the mine.

Switch Red

BRING THE COWS HOME 3

	Normal	Hard	390	975	1-4	1-4	CO-OP	CO-OP	Scroll-Sniper's Eye	Scroll-Monster Mask
--	--------	------	-----	-----	-----	-----	-------	-------	---------------------	---------------------

There's no telling what the cow is doing on the bridge in the first place, but getting her home again is much more challenging than rescuing the other two cows. The same basic principles apply: get the cow to follow you by using the red flag. She's got 30 HP, and you have 20 minutes to bring her safely out.

The bridge contains many dangers, including dark foes, rolling rocks, and multiple different levels to navigate. When you come across a blue floor switch, your cow must activate it. Maneuver the red flag so that the bovine does her part to get back home.

AVAILABILITY

Make your way through story mode the first time, revisit the bridge, and then read the sign near the entrance that tells of this quest.

CARRY TAG 1

(DL)	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	10	2-4	VS	Copper
Hard	25	2-4	VS	Seraph Dust

Like the quest name says, this is a game of tag. When the quest starts, each player runs towards the red floor switch to see who is "it" first. Whoever is "it" quickly runs towards another player in an attempt to pick that person up. Once you have been picked up, you are "it" and must then pursue your opponents.

The "it" person constantly accumulates points. The player with the fewest points at the end of the session wins, so the object is to remain "it" for as short a time as possible. Use the power-ups like Slow and Blind to give yourself an advantage. Use the Ice Bombs scattered around to freeze opponents in place, allowing you to catch them if you are "it," or giving you some breathing room if you are being chased. Use the door switches to your advantage as well by tossing someone into a room and flipping the switch, providing extra time to run away and grab a power-up or Ice Bomb. You've got three minutes to play in the aqueducts. At the end of that time, whoever has the fewest points wins!

AVAILABILITY

Automatically opens after you receive the crystal sickness medicine.

CARRY TAG 2

(DL)	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	30	2-4	VS	Leather
Hard	75	2-4	VS	Black Gold

This quest works much like "Carry Tag 1." The "it" person must tag opponents by picking them up. Fire Mountain's the location this time around. Use the various Ice Bombs to slow your opponents down; you'll find a large stash in the cave at the lower right. Keep an eye out for the spike traps on the bridge, which can knock you right off into the lava! The board also features a couple of switches that drop unsuspecting opponents into the lava. Use these to slow pursuers down while you collect power-ups as they appear. Whoever has the fewest points at the end of three minutes wins!

AVAILABILITY

Automatically opens after confronting Larkeicus for the first time, and after completing "Carry Tag 1."

CULINARY CAPERS 1

(DL)	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	30	1-4	CO-OP	Silk
Hard	75	1-4	CO-OP	Fine Leather

Accepting the quest takes you to the forest, where you'll find plenty of the mischievous Mus for the chef's recipe. Per his instructions, roast these little critters to perfection by defeating them all by only using Fire magic.

You need to roast 10 Mus in under five minutes to complete the quest successfully. Only the Mus slain with Fire magic count towards your total, so be careful. The forest has plenty of Mus, but remember to check everywhere, including up the ramp, to get each and every one. Using all that Fire magic can drain your MP fairly quickly, so also defeat the Bats and Goblins in the forest to replenish your MP with the fruit they drop.

AVAILABILITY

Speaking to the chef near the library steps in town opens up this quest at the Quest Shoppe.

ICON	DESCRIPTION

FIRE FIGHTERS 2

TYPE	COIN	# OF PLAYERS	MAP TYPE	REWARD
Normal	120	1-4	CO-OP	Jewel-Franny Nugget
Hard	300	1-4	CO-OP	Jewel-Gil Maria

During this quest, you have three minutes to douse five flames on Ice Mountain. Make your way past the starting point to find the Water Jars to the far left. They keep reappearing in this spot, so stack them on top of each other and carry them to the flames to save time. Once you douse the first two, three more appear. You'll have to be expeditious! Douse all the flames to collect your reward!

AVAILABILITY

Automatically opens when the crystal shatters, and when you have completed "Fire Fighters 1."

ICON	DESCRIPTION
	Fire
	Water Jar

FIRE FIGHTERS 3

TYPE	COIN	# OF PLAYERS	MAP TYPE	REWARD
Normal	180	1-4	CO-OP	Gold
Hard	450	1-4	CO-OP	Red Orb

This time, you've got six minutes to put out seven blazing fires in the library! Start by walking straight past the two fires and using the empty bookshelf to get across to the other ledge. Activate the post switch there, which makes the Water Jars appear on the lower level. You're good to go!

Stack all four jars on top of each other and use the elevating tile in the corner to get them to the fires. Just flip the switch to raise them while you push the ladder over to reach. Your jars always appear in the same place, so keep dousing those flames until all seven are gone!

AVAILABILITY

Automatically opens when you retrieve the crystal fragment from the Library, and when you have completed "Fire Fighters 2."

ICON	DESCRIPTION
	Fire
	Water Jar

FIRE FIGHTERS 4

TYPE	COIN	# OF PLAYERS	MAP TYPE	REWARD

START

LOTSA BOSSES

MODE	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	210	1-4	CO-OP	Iron
Hard	525	1-4	CO-OP	Jewel-Ko Gem

In this quest you have 10 minutes to defeat four bosses! Don't worry; they don't all come at you at once. Each boss battle includes some regular monsters that you can defeat to replenish your MP and HP. After defeating each boss, you can scoop up treasure and gil and break the White Barrels for Ether and Potions to prepare for the next battle!

The bosses you face are random. If you are defeated by one of them, even the last one, you fail the quest and must start all over, so be cautious. Above all, keep yourself healed and keep a sharp eye on the clock. Stick to the same tactics you used to defeat them before, and you'll make it through successfully!

AVAILABILITY

Automatically opens after completing the ruins for the first time.

MATERIALS HUNT!

MODE	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	270	1-4	CO-OP	Scroll-Bomb Mask
Hard	675	1-4	CO-OP	Scroll-Lucky Sling

You've got 12 minutes to make your way through the ruins and collect 20 pink bags of materials. Avoid the monsters when you can; stick to fighting only those blocking your path or those that have a pink bag on their head. There are many, many spike traps, so make sure you can jump over them. While any character can do this, a Selkie with a double-jump ability is the best choice. Check every ledge, behind every corner, and on top of every creature to find the bags you need!

AVAILABILITY

Once you've completed the boss fight in the graveyard, check out the sign near the entrance to the ruins to open up this quest.

SMASH-O-RAMA 1

Mode	Cost	# of Players	MP Type	Reward
Normal	10	2-4	VS	Silk
Hard	25	2-4	VS	Seraph Dust

The object of this quest is to knock your opponents out of the ring. You can do this by driving them to the edge with your melee attacks, or by using Blizzard on them and tossing them out. The area also offers more creative ways to do this. Push the red floor switches to bring bombs and Ice Bombs up. Use these to freeze opponents you can then toss out of the ring, or use the bombs to knock them out with the force of the explosion. Watch out for the sliding tiles that sweep across the board. If you let them push you around, they knock you right out of the ring. Jump on top of the sliding tiles to avoid this hazard. Grab power-ups when they become available to gain the advantage in the fight. Each time you are knocked out, you get a skull. After three minutes, whoever has the least amount of skulls wins!

AVAILABILITY

Automatically opens when you arrive in Town.

Mode	Cost	# of Players	MP Type	Reward
Normal	20	2-4	VS	Copper
Hard	50	2-4	VS	Sulfur Dust

Knock your opponents out of the ring to win this quest. You've got three minutes to cause as much trouble for your rivals as you can. Use the two floor switches at opposite ends of the ring to damage your foes. When you step on one, it rises, and sheets of flame immediately sweep across the ground, knocking off anyone in their path.

Use the regular switches to drop the floating platforms into the chasm, scoring a skull on any opponents who happen to be caught on them. Use the power-ups to gain Stealth, Slow opponents, or even Zap them. Stay moving and be aware of your opponents' moves, and you'll have gone a long way towards winning.

SMASH-O-RAMA 3

Mode	Cost	# of Players	MP Type	Reward
Normal	50	2-4	VS	Silk
Hard	125	2-4	VS	Holy Orb

The goal of this "Smash-O-Rama" is to knock your opponents into the pools of magma! Each time you do, you score a skull on your foe. Watch out for the circles of flame scattered around the pools and keep an eye out for the power-ups to give yourself every advantage. You can also find a secret weapon high up on the wall! This powerful fan is strong enough to blow your opponents right into the magma; just pick it up to activate it. At the end of three minutes, the player with the fewest skulls wins.

SMASH-O-RAMA 4

Mode	Cost	# of Players	MP Type	Reward
Normal	70	2-4	VS	Seraph Dust
Hard	175	2-4	VS	Abyssian

The battleground for this head-to-head challenge is one of the most simple, yet one of the most challenging. The battle takes place on a wide ledge with six spiked pendulums all swinging on different timers. Use these to knock your opponent out of the ring, but don't get caught by them yourself! Ice Bombs and power-ups can appear at different locations along the ledge. Without a lot of room to move around, remain on your guard constantly, keeping a close eye on your opponent at all times!

SMASH-O-RAMA 5

(DL)	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	80	2-4	VS	Platinum
Hard	200	2-4	VS	Abyssian

This battle is rather challenging. The walkways are dangerously narrow, making it easy to get knocked off. Lure your opponents onto the rails so that you can more easily drop them off the edge! Use the switch on the central platform to drop bombs that are already primed to explode. As soon as you flip the switch, get out of there! The bombs either blow your foe around (maybe even off the elevator) or send them scurrying to one of the rails where footing is less sure. To really win the day, grab the powerful fan to blow your enemies right out of the arena!

STARFEST COUNTING SONG 2

(DL)	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	40	2-4	VS	Iron
Hard	100	2-4	VS	Iron Silk

The goal of this quest is the same as in "Starfest Counting Song 1," but there are a few differences to the playing field. This time, you have two blue switches you can hop on to grab extra points. There are also switches that change the water to ice and back again. This is a great way to catch your opponent, letting you grab the magicite. Keep an eye out for power-ups and always be ready to seize the magicite to rack up the points and win the quest!

AVAILABILITY

This quest opens after finishing "Starfest Counting Song 1," and after completing the ruins for the first time.

STARFEST COUNTING SONG 1

(DL)	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	10	2-4	VS	Leather
Hard	25	2-4	VS	Sulfur Dust

The goal of this quest is to get as many points as possible without having the magicite explode on you. You've got three minutes to pick up the magicite and carry it around the town. The longer you carry it, the more points it's worth, but the magicite explodes when the timer reaches five, so look out! You lose half of your points if the magicite explodes on you. To gain some extra points, carry the magicite up the stairs to reach the blue switch in the center of the upper level. Touching the switch awards bonus points!

Only one magicite spawns at a time, so be ready to take it from your opponents. Pick them up and throw them to get them to drop it. Be on the lookout for power-ups to give you an advantage. Whoever ends up with the most points is the winner!

SWITCHES GALORIFIC 1

DIFF	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	20	2-4	VS	Silk
Hard	50	2-4	VS	Fine Leather

This quest is all about the switches! You have three minutes to activate as many switches as you can, and they come in all types! All switches are worth one point each, while placing a Key in the Key Stand earns you two points. Score more points than your opponent to earn your reward! The switches can appear anywhere, so make the best use of your time. Don't spend too long trying to get a difficult, remote switch when you could be racking up the points on easier switches.

TREASURE HUNT 1

DIFF	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	30	1-4	CO-OP	Scroll/Steel/Lorsiet
Hard	75	1-4	CO-OP	Mu Parchment

You've got five minutes to find the eight pink bags scattered throughout the forest. Check behind every tree and knoll to locate them all, and go up the ramps as well. Creatures occasionally carry these on their heads, so defeat them to grab the bags and complete the quest! But don't waste time fighting creatures you don't need to; if you can't see a bag, then the monster doesn't have one.

AVAILABILITY

This quest opens when you speak to the moogles in the forest after visiting Town for the first time. Keep an eye out, because the moogles like to hide behind stuff in the forest.

WHIRLPOLO 1

(DL)	COST	# OF PLAYERS	MP TYPE	REWARD
Normal	20	2-4	VS	Leather
Hard	50	2-4	VS	Black Silver

This quest pits you against your opponents in a game of skill! There are two whirlpools, one at each end of the water-filled area. The goal is to take the multicolored ball and lob it into the whirlpool, earning a point each time you make it in. More than one ball can be in play at a time, so be on your toes. To make things more interesting, there are the usual power-ups as well as Ice Bombs. Use the Ice Bombs to freeze your opponents and grab the ball before they can stop you. Also, watch out for the swinging pendulums guarding the whirlpools. Whoever scores the most points in the three minutes allotted wins the game!

AVAILABILITY

EXTRAS

RIVER BELLE

River Belle is a small area in the southeast of the World Map that allows you to battle various creatures and even a boss for extra loot and experience. This special area becomes available once you've completed the story mode of the game. River Belle is laden with poison, so your initial goal when entering the area is to look for the Urn and find the Purple Plate. The poison is strong, and its constant damage isn't something you can just heal forever.

This area hosts water-dwelling Sahagin, Cockatrices, Adamantoises, Mus, Goblins, and even Mimics. Though the area is filled with danger, it is also filled with a good amount of treasure. Treasure chests abound, as well as Buried Treasure spots, so this is a good place to spend some time once you've completed the story mode of the game.

CRAB

Once you make it past the first two areas filled with monsters, you reach the boss. Make sure you are ready to take him on before entering his domain. This humongous crab is nobody's dinner! As with the other areas, make sure you grab the Urn and place it on the plate as soon as you enter to protect against the poison damage.

Attack the Crab from the back and sides as much as possible to avoid his wicked claw and stunning head bash move. Keep yourself and your party healed at all times. The boss likes to jump up into the air and land on you, squishing you with his bulk which can quickly KO you if you aren't prepared. Watch for its shadow and move quickly to avoid this. This is a challenging fight and one for which you should call on your best party members with the strongest equipment. If you should need them, there are two Phoenix Downs in the pool. Though the fight is difficult, the boss always drops at least one Scroll, so it is well worth your effort.

BONUS BOSSES

For a special challenge, revisit the library. A warp hole forms after you have conquered the four Dark Elements in the entryway. Gather all of your characters onto it to be transported to the rare books room. Place a Book on the Lectern when you are ready to face a boss! Players familiar with *Final Fantasy Crystal Chronicles: Ring of Fates* will recognize these foes. Each Book transports you to a separate boss battle. Progress through these skirmishes to reveal more Books. You are transported back to the rare books room at the end of each battle, but your HP and MP are not automatically set back to full the way they usually are when you completely leave an area. Make use of the Recovery items around the battlefield or those dropped by bosses before returning to the rare books room to face the next battle. Don't worry though, if your health is too low to battle, just leave the rare books room and save your game in the Library or in Town. You will only have to fight the four Dark Elements to get back to the rare books room, where all the books you've unlocked await. For an in-depth look at each of these foes, check out the Bestiary in the Data section of this guide.

1. Hakka Scorpion
2. Babby Behemoth
3. Zu
4. Angry Flower
5. Dragon
6. Lich
7. Cu Chaspel
8. Great Galdes

HAKKA SCORPION

This overgrown bug is ready to squish you! It has a wicked fast claw swipe that can take out anyone standing in front of it. The Scorpion moves around a lot, so stay on your toes and move to the side or back to attack as much as possible. This bug also has a powerful eyebeam that blasts anything in front of it. It can also charge up its stinger and drive it into the ground, which does quite a bit of damage if it hits you. However, the stinger becomes stuck in place for a few seconds after performing this move.

Like every boss, it has a weak spot, and this one is in the most obvious place—the stinger! Jump up onto the Scorpion's back and let the stinger have it, or wait until it drives it into the ground for easier access. A good chain of attacks goes a long way towards taking this beast down. Locate the Treasure Chests in the corners if you find yourself in need; they contain Recovery items. Even if you don't need them during the battle, take advantage of them before returning to the rare books room.

BABY BEHEMOTH

While there are no Recovery items available for this fight, the Baby Behemoth is less challenging than the other bosses you face—luckily. Of course, that doesn't mean it isn't dangerous! Watch out for its fiery breath as you bring your melee party members within range. When you see the beast rear up on its hind legs, it is getting ready to stomp on you! Quickly move away to avoid this damage. Offensive spells make it flip over onto its back, exposing its soft underbelly. When this happens, focus your attacks on this weak spot to take off good-sized chunks of his HP. If you are planning on reading more of the rare books without saving, conserve your MP during this fight as much as possible while also keeping your HP up.

BABY BEHEMOTH DROP TABLE

ZU

This vicious bird is a challenging foe and can be a pain, as many flying enemies are. Use Blizzard magic on it or Gravity to get it to come down to your level and fight. Zu often swoops down to attack and sometimes dives beak first into the ground, damaging anyone nearby. When this happens, aim for the red patch on the top of its head; this is its weak spot! However, this tactic is not without danger. After you've gotten in a few good hits, Zu takes off and flies upside down, knocking you off. Freeze the bird to give you a few more seconds to pummel the red patch.

You can jump up and hang onto Zu and perform Hanging Attacks, but this bird is no dodo! It flies over the edge of the cliff and knocks you off into the chasm below if you give it the chance. Lure the bird to the center of the battle areas, so that you don't fight too close to the edge where your chain attacks can easily send you over. There are no Recovery items available during this battle, so spend your MP wisely.

ANGRY FLOWER

This ferocious flower doesn't like adventurers encroaching in its garden, and it is ready to weed you out! The red foliage surrounding the plant is poisonous, so stay within its circle. This flower can send out poison spores, so be ready to Clear it off of your party members to avoid unnecessary damage. It can also Stun anyone within melee range, as well as inflict Gravity and send out Flower Buds to attack you. Destroy them to gain Recovery items and force the flower to open its petals.

When its petals are folded closed, the Flower is quite well-armed, protecting its weak spot in the center. When the Flower opens up, you can jump up on the petals to access this weak spot more easily. While attacking, don't let your health get too low, because the Angry Flower can rapidly spin its petals and knock you off. Once you can attack the weak spot, the battle is soon yours! Use the Recovery items here before moving on.

DRAGON

This scaly monstrosity is as foul-tempered as nearly every dragon seems to be. Watch out for his teeth and the spikes on his face, which deal out the damage when he attacks. This hulking reptile also stomps around, stunning any nearby foes. Stick to side and back attacks as much as possible and use Blizzard on the monster to get your licks in with no interference.

The Dragon is heavily armored, and you need to focus on his weak spot at the tip of his tail to take him down. However, this tail isn't defenseless, and you'll need to keep an eye out for the beam that shoots out of it. If you see the tail start to glow, back off! You've got plenty of room to move around during this battle, so if you need to back off a bit to Cure or Raise, use the space to do so. There are no Recovery items here, so manage your MP well, making sure your party is healed.

LICH

The undead tend to be a bit cranky, and the Lich is no exception. This monster is a tough foe and not to be taken lightly. When the battle begins, the Lich is like other Dark foes, and you must use your Recovery magic to force it out of the shadows. Being a creature of darkness, the Lich is susceptible to Holy magic. The Lich can cast Poison and Gravity on you; while the Gravity isn't a huge hindrance, Clear the Poison right away. There are no Recovery items available during this battle, so you must spend your MP wisely.

Without a doubt, the ability to cast Doom is the most dangerous ability of the Lich. For characters afflicted with this, a counter appears over their head counting down from ten. Once it reaches zero, the character instantly dies. Doom must be cleared as soon as it is inflicted. The best course of action is to not get it in the first place. When the Lich begins casting it, a large vortex of dark matter appears in its hands. Back away as soon as you see this to avoid this potentially battle-ending affliction. The Lich's weak spot is located on its chest, so jump up there and give it all you've got with regular and chain attacks.

LICH DROP TABLE

CU CHASPEL

This strange masked foe puts up quite a fight! He rises into the air to cast spells, and can afflict you with Poison or plunge you into Darkness. In either case, make sure you Clear the affliction right away. When he finishes casting, this sinister figure charges downward, stunning his target as he hits the ground. He stays on the ground for a few seconds, so use this time to hit him hard and fast.

As if one foe weren't bad enough, Cu Chaspel creates two copies of himself after losing a third of his health. When this happens, defeat the copies to gain Recovery items. Watch your health and avoid his magic to win the day!

CU CHASPEL DROP TABLE

GREAT GALDES

The final challenge of the rare books room pits you against Great Galdes. This battle is the most challenging one yet, so be sure you are prepared before placing the Book on the Lectern. Great Galdes surrounds himself with Red Crystals, which cast a variety of offensive spells. Their spells can be overwhelming when too many are in play. Take them down to give yourself a fighting chance and to gain Recovery items.

Galdes himself possesses a strong beam attack. When you see him begin to charge up, get to the side or back. He also can rain crystals down upon you, which damage and Stun you. Focus your attacks on the spikes running around the edge of Galdes' dais. A red gem becomes visible in his chest once you've destroyed all the spikes. This is his weak spot, as well as your most likely shot to win. Without exposing this spot, Great Galdes doesn't take much damage, and his damage output far outweighs what you can usually dish out. Keep an eye on your health at all times, be ready to switch between characters often to keep everyone up, and use Clear when necessary.

MERCENARIES

While the Adventurers' Guild allows you to create new party members to join your band for free, in some sense you get what you pay for. Mercenaries come with requirements, either of gil, hours played, or something else, but they can be great additions to your party. The information below lists the mercenaries you can hire, along with their requirements and other relevant information. Note that any stat listed for max level is listed for having the base equipment only and can change depending on your equipment.

GERALD

Tribe: Clavat Gender: Male

STARTING	LEVEL	HP	MP	ATK	DEF	MAGIC ATK	MAGIC DEF
	12	177	135	255	142	42	29
	FIRE	ICE	THUNDER	STUN	SPACETIME	DARK	
ATK	304	304	304	20	402	304	
DEF	307	307	307	35	307	307	
MAX	HP	MP	ATK	DEF	MAGIC ATK	MAGIC DEF	
	514	448	999	331	216	203	

STARTING EQUIPMENT
Septentria Blade, Berserk Mask, Royal Armor, Guard Ring

STARTING ABILITIES
Sword Charge, Magic Stack 3

ACQUISITION
Speak with Gerald on the World Map after starting a new game on Hard mode and having killed 1000 monsters.

AMENHART

Tribe: Yuke Gender: Male

STARTING	LEVEL	HP	MP	ATK	DEF	MAGIC ATK	MAGIC DEF
	45	213	388	121	143	157	469
	FIRE	ICE	THUNDER	STUN	SPACETIME	DARK

DEF	214	214	160	182	165	165	
MAX	HP	MP	ATK	DEF	MAGIC ATK	MAGIC DEF	
	361	695	262	173	825	326	

STARTING EQUIPMENT
Reaper's Scythe, Sniper's Eye, Gambler's Gear, Magic Ring

STARTING ABILITIES
Magic Stack 3, Staff Charge, Magic Stack 4, Ring Lock 2, Charge Guard, Magic Stack 5, Guard Counter

ACQUISITION
After completing the game on Normal, you can find Uruha standing on top of the bridge in the town entrance where she asks you to find her. To reveal this mercenary, go out to the World Map and find the Buried Treasure spot between the last two of the more solitary trees, just outside the forest (approximately halfway between Aqueducts Entrance 1 and the Village, on the tan ground.)

KOO EL

Tribe: Selkie Gender: Female

STARTING	LEVEL	HP	MP	ATK	DEF	MAGIC ATK	MAGIC DEF
	59	547	552	154	331	121	178
	FIRE	ICE	THUNDER	STUN	SPACETIME	DARK	
ATK	12	5	12	577	179	242	
DEF	15	4	15	320	178	240	
MAX	HP	MP	ATK	DEF	MAGIC ATK	MAGIC DEF	
	877	902	194	491	201	298	

STARTING EQUIPMENT
Wasp Sting, Assassin's Mask, Assassin's Vest, Mind Ring

STARTING ABILITIES
Paddle Charge, Paddle Chain 2, Bow Charge, Paddle Chain 3, Three-way Shot, Magic Stack 3, Charge Guard, Straight Arrow, Guard Counter, HP +20, Bow Smash, Ring Lock 2, Five-way shot

ACQUISITION
You must be playing multiplayer on Hard mode and have five or more friends on your roster. You can speak to her on the World Map after returning the crystal fragment from the ruins. She may be hard to see on the World Map at times, as she lurks behind the ruins.

ELEN DOK

Tribe: Lily Gender: Female

STARTING	LEVEL	HP	MP	ATK	DEF	MAGIC ATK	MAGIC DEF
	99	325	255	325	263	258	257
	FIRE	ICE	THUNDER	STUN	SPACETIME	DARK	
ATK	255	255	255	285	255	255	
DEF	255	255	255	275	295	295	
MAX	HP	MP	ATK	DEF	MAGIC ATK	MAGIC DEF	
	325	255	325	263	258	257	

STARTING EQUIPMENT
Dragon Tusk, Pavlov Mask, Pavlov Clothes, Seer Stone

STARTING ABILITIES
Spear Charge, Hammer Charge, Spear Chain 2, Charge Guard, Magic Stack 4, Guard Counter, Spear Chain 3, ATK +5, Spear Smash, Ring Lock 2, Straight Arrow, Paddle Chain 2, Paddle Chain 3, Hammer Chain 3, Critical Hit Boost, Hammer Smash, HP +20, HP +50, ATK +10, Lily Soul

ACQUISITION
This mercenary stands outside the library after completing Ice Mountain for the first time, and gladly joins you when you play on Very Hard mode.

RID DEK

Tribe: Lily Gender: Male

STARTING	LEVEL	HP	MP	ATK	DEF	MAGIC ATK	MAGIC DEF
	1	28	20	33	57	4	8
	FIRE	ICE	THUNDER	STUN	SPACETIME	DARK

	588	344	244	645	102	302	

STARTING EQUIPMENT
TWINKLING MACE1, Pot, Steel Corslet, Power Ring

STARTING ABILITIES
None

ACQUISITION
This mercenary is found near the Adventurers' Guild. He becomes available after you have spent more than 100 hours playing the game.

ALINE

Tribe: Clavat Gender: Female

STARTING	LEVEL	HP	MP	ATK	DEF	MAGIC ATK	MAGIC DEF
	36	206	256	138	170	200	176
	FIRE	ICE	THUNDER	STUN	SPACETIME	DARK	
ATK	260	260	260	123	330	260	
DEF	250	250	250	166	260	336	
MAX	HP	MP	ATK	DEF	MAGIC ATK	MAGIC DEF	
	415	445	327	374	452	428	

STARTING EQUIPMENT
Graf Besen, Nun's Wimple, Nun's Habit, Guard Ring

STARTING ABILITIES
Sword Charge, Magic Stack 3, Sword Chain 4, Charge Guard, Guard Counter

ACQUISITION
Once you locate the book in the Library which informs you of where the mine is, re-enter the library. From the entrance take the left path, and in the third room you will find a librarian dressed as a nun. Agree to speak with her, and then accept her quest. Head to the Quest Shoppe and complete the quest Monster Mash 2. After completing that quest, return to the library and speak with the librarian again to have her join your party.

COMPARISON CHART

Here is a quick comparison chart if you wish to maximize your party's potential. All the following characters were given the same gear (Wooden Hammer, Traveler's Hair Clip, Travel Clothes, and Power Ring), and are at level 99. Please keep in mind that this is purely based on character stats, which doesn't account for tribe specialties (e.g. Selkie Double Jump, Lily Lift Strength), abilities, attacks, or pure aesthetics. Also keep in mind that equipment alters stats greatly.

	HP	MP	ATK	DEF	MAGIC ATK	MAGIC DEF	AVG STAT
Aline	415	445	318	376	409	407	385.5
Amenhart	321	658	212	211	327	999	454.7
Del Dee	217	354	519	505	505	498	433.0
Elen Dok	325	255	279	260	255	255	271.5
Gerald	429	374	999	234	206	203	407.5
Koo El	877	902	112	399	201	296	456.2
Rid Dek	588	313	238	639	102	302	363.7
Uruha	361	695	215	115	818	326	421.7
Yuke Generic	528	506	314	323	304	304	379.8
Lily Generic	606	380	333	310	203	301	355.5
Selkie Generic	446	658	312	299	204	309	356.3
Yuke Generic	401	525	213	207	421	321	348.0

STORY MODES

After you complete the story mode portion of the game, and save it after the credits, you can keep playing on Normal mode, complete various quests, revisit areas, or explore River Belle. When you are ready for another challenge, try out Hard mode. From now on when you start up the game, you are given the choice to begin a new game on Hard. This allows you to keep all of the party members you gained, along with all of your items and experience. The foes you face are also more challenging, but they can drop a higher quality of items. Once you progress all the way through Hard mode, you can give Very Hard a try. You still get to keep all of the items and experience you gained in your first two playthroughs, but the enemies you face are much, much stronger!

WEAPONS

Purchase:
Cost of the items at Ye Can't Beat Adventurer.
Not all items can be bought there, however.

Scroll:
Where to obtain the Scroll that allows you to custom order the item from Custom Fabrications. Many Scrolls can be purchased at the Shoppe itself, but many others must be hunted down or earned as prizes!

Elements:
Changes to elemental-based stats when equipped. Weapons only affect attack stats, while head and body armor only affect defense stats. Accessories can affect either (and sometimes both).

DEFENDER

Purchase: 600g
Scroll: Shoppe (15g)

Recipe:
150g, Iron x3, Copper x3

ATK	DEF	MATK	MDEF
30	—	—	—
★	★	★	★

JEWEL SLOTS **PRE-EQUIPPED JEWELS**

Equip: All
Created Jewels: Stamina Stone 1 / Guard Stone 2 / Tiny Pearl d'Lux

Equip: Which tribes/genders can equip the item.

Created Jewels:

What Jewels can be made from the item at Custom Fabrications once they've been properly leveled up. The first Jewel listed is what you get for converting on item at levels 3 through 9, the second is 10 through 19, while the third is for level 20 and up.

Recipe:

The gil and Materials cost to Custom Order the item from Custom Fabrications. Not all items can be Custom Ordered, however.

ATK/DEF/MATK/MDEF:

Base (Level 1) stat increases when the item is equipped. Most equipment is capable of stat improvement by raising levels; the maximum each item's stats can reach is given in parenthesis.

Jewel Slots:

The number of empty jewel slots on the item.

Pre-Equipped Jewels:

Some items have built-in Jewels for automatic Equipped Bonuses. These cannot be removed by customization.

WHAT'S IN THE BOX?

Keep in mind that the contents of treasure chests are partially randomized. Scrolls found in chests may not pop up the first time you open a chest, so keep coming back to the area in question to try again!

Though most weapons can be equipped by any race, not all races can make the most use out of each type of weapon. For example, only Selkies can use the paddle-style weapons' charged projectile attack.

SWORDS

Swords are a handy all-around weapon, mixing strength, speed and reach. Many of the more powerful swords can only be equipped by Clavats, however.

BOWS

Bows are perfect for long-range attacks, striking enemies while keeping well out of their reach. They also have a good chance of stunning their target. These advantages are mitigated by a slow rate of fire, however. If an enemy gets close, you can really be in trouble! Bows are best used if you have another player to cover you with a melee weapon.

ABYSS KILLER

STAVES

Staves are comparatively weak melee weapons, but that's not what they're really meant for. They are far better at boosting magical attack power, making your spell-slinging more potent. They are best used to boost the Yukes' inherent magical strength.

ACCESSORIES

Acquire:

What monsters, chests, quests, and Scratch Cards from which you can obtain the accessories. Monsters and chests list the areas and difficulty levels that contain the item. Also, you may be able to purchase the item directly, or buy a scroll that will allow you to have it created. These are listed along with the associated costs in gil.

Purchase:

Cost of the items at Ye Complete Adventurer. Not all items can be bought there, however.

Scroll:

Where to obtain the Scroll that allows you to custom order the item from Custom Fabrications. Many Scrolls can be purchased at the Shoppe itself, but many others must be hunted down or earned as prizes!

Elements:

Changes to elemental-based stats when equipped. Weapons only affect attack stats, while head and body armor only affect defense stats. Accessories can affect either (and sometimes both).

FLAME BADGE

Equip: —
Purchase: 500g
Scroll: Shoppe (13g)

Recipe: 130g, Mu Nosa x3, Elemental Gem x1, Red Fay Dust x5

EQUIP	JEWEL SLOTS	PRE-EQUIPPED JEWELS	
All	2	Anti-Burn Stone 1	All

Created Jewels: Anti-Burn Stone 1 / Anti-Burn Stone 2 / Anti-Burn Stone 3

Recipe:

The gil and Materials cost to Custom Order the item from Custom Fabrications. Not all items can be Custom Ordered, however.

ATK/DEF/MATK/MDEF:

Base (Level 1) stat increases when the item is equipped. Most equipment is capable of stat improvement by raising levels; the maximum each item's stats can reach is given in parenthesis.

Jewel Slots:

The number of empty Jewel slots on the item.

Equip:

Which tribes/genders can equip the item.

Created Jewels:

What Jewels can be made from the item at Custom Fabrications once they've been properly leveled up. The first Jewel listed is what you get for converting an item at levels 3 through 9, the second is 10 through 19, while the third is for level 20 and up.

Pre-Equipped Jewels:

Some items have built-in Jewels for automatic Equipped Bonuses. These cannot be removed by customization.

JEWELS

Jewel:
The name of the Jewel.

Effect:
The name of the effect the Jewel confers, plus the nature of the effect. The higher the level of the equipment you add the Jewel to, the more powerful the effect of the Jewels!

Equip:
What equipment types the Jewel can be added to. Weapons, Helmets, Body Armor, Accessories.

Obtain:
Different places to obtain the Jewel. Most are obtained by converting old equipment at Custom Fabrications. The number by the item represents what level range the item needs to be in; (1) is levels 3 through 9, (2) is 10 through 19, and (3) is 20 and up. Jewels can also be taken from chests or from defeated monsters, or earned as Quest prizes.

Jewel	Effect	Equip	Obtain
ALBINO	White Mage Wisdom (Slowly regenerate lost HP)	✓✓✓✓	Weapons: Holy Judgment, Holy Lance Helm: Ahniman Mask, Desert Sallet, Conquy Cuchuma, Feathered Hat, Head Maid's Hat, Impresario's Mask, Justice Mask, Pot, Traveler's Hair Clip, White Mage Hood Body: Ahniman Mask, Desert Sallet, Conquy Cuchuma, Feathered Hat, Head Maid's Hat, Impresario's Mask, Justice Mask, Pot, Traveler's Hair Clip, White Mage Hood

MATERIALS

Materials are the raw items needed to create new equipment at Custom Fabrications. Found in random-stock chests, dropped by monsters, or earned through successful quest completion, it really pays to have a healthy stock of materials handy, as you never know when you'll find a new Scroll with a nifty piece of equipment to make!

Buy:	Recipe:	Acquire:
Cost to purchase the material straight from Custom Fabrications.	The gil and materials cost needed to Custom Order it from Custom Fabrications. You must purchase the appropriate Scroll from the Shoppe before you can Order the material.	What monsters, chests, quests and Scratch Cards you can obtain the materials from. Monsters and chests list the areas and difficulty levels that contain the item.

ABYSSIAN	—	270g, Mythril x1, Holy Orb x1, Yellow Orb x1 (Hard)	Scroll: Shoppe (14g, Hard) Chests: Mine (Hard) Monsters: ... Quests: ...

STOCKUP!

Early on, materials do not seem too important, as most of the equipment you can Custom Order is also readily available for sale intact at Ye Compleat Adventurer. However, as you progress through the game, more and more powerful equipment becomes available only through Custom Order by finding Scrolls hidden throughout the world. This is especially true in the Hard and Very Hard difficulty modes! Several of these pieces also require very special materials available only from defeated Boss characters.

As such, it is highly recommended that you re-visit old areas often to re-battle these bosses, ensuring that you have a healthy stock of those unique materials (as well as gaining more experience for you and your current equipment). Plunder every treasure chest on the way to gather up as many of the more common materials as you can; the chests re-stock with semi-randomized items each time you re-enter the world map, meaning a nigh-limitless supply of materials! This is especially useful if you have several CPU-controlled characters to equip! Make sure you have a healthy stock of everything possible before starting a new game at a higher difficulty level as well, since all the old areas will be locked again!

BESTIARY

This guide lists the enemies grouped by the area in which you encounter them, as an enemy encountered in one location will have considerably different stats than in another location—and even the same location as earlier during a different chapter in the story!

Statistics:

Each enemy's statistics change depending on what area you encounter them in, as well as the game mode. Both story mode and multiplayer have Normal, Hard, and Very Hard settings. Multiplay stats are marked **MN**, **MH**, and **MV**.

Resistances:

The enemy's ability to resist different types of attacks. 0 indicates they have no special resistance or weakness. A positive number means they can resist the attack, a negative number indicates they're weak to that type of attack. The greater the number in either direction, the stronger/weaker they are against it.

Drop Items:

Every enemy can drop several semi-randomized common Materials (Branches, Dust, Stones, etc.) and types of elemental Orbs when defeated, typically the same Materials found in the area's treasure chests. However, most enemies also have Materials that can only be obtained by defeating foes of their type! Any Jewels, Scrolls, or Accessories the enemy might have are also listed here.

EQUIPMENT EFFECTS

By adding different jewels to your equipment at **Custom Fabrications** you can increase the attributes of your character. The following is a complete list of Equipment Effects available. See the Jewels listing in the Data section of this guide to see which Jewels offer which effects. Status Boosts are an exception to this as they attach themselves to your character instead of equipment and can be found throughout the game in chests and buried treasure spots.

STATUS BOOSTS

Item	Effect
ATK Boost	ATK rises (Maximum + 150%)
MATK Boost	MATK rises (Maximum + 150%)
DEF Boost	DEF rises (Maximum + 150%)
MDEF Boost	MDEF rises (Maximum + 150%)
HP Boost	Maximum HP rises (Maximum + 150%)
MP Boost	Maximum MP rises (Maximum + 150%)
Crimson Essence	Fire's attribute strength rises (Maximum + 150%)
Azure Essence	Ice's attribute strength rises (Maximum + 150%)
Gold Essence	Thunder's attribute strength rises (Maximum + 150%)
Silver Essence	Stun's attribute strength rises (Maximum + 150%)
Violet Essence	Spacetime's attribute strength rises (Maximum + 150%)
Sable Essence	Dark's attribute strength rises (Maximum + 150%)
Jade Essence	Cure magic's recovery amount increases (Maximum + 50%)
Anti-Burn Boost	Fire's resistance attribute rises (Maximum + 150%)
Anti-Frost Boost	Ice's resistance attribute rises (Maximum + 150%)

SCRATCH CARDS

Below you find a complete list of every Scratch Card in the game and where you can find them. Take them to the Scratch Card Stall in Town to play. Winning cards in each series give you special rewards such as a discount at a shoppe in Town or a boost to your stats! Some winning cards have special rewards as well. If a card gets you an item, it is listed under Rewards. Scratch Cards are most commonly found in buried treasure spots but can also sometimes be dropped by monsters, or received as a reward for winning on another Scratch Card. Unless otherwise noted, you can find the Scratch Cards in the locations below on any difficulty. Keep an eye out for Rare Cards of each series!

01 21 SERIES

Numbers are hidden behind each scratch patch. Scratch numbers that add up to 21 to win. Winning cards in this series give you a 10% discount at Custom Fabrications for three minutes if it is a Normal card, while Rare cards give you a 20% discount for 10 minutes when you win!
